MULTISPECTRUM INFRARED

X3301 Protect•ir Multispectrum Infrared Flame Detector

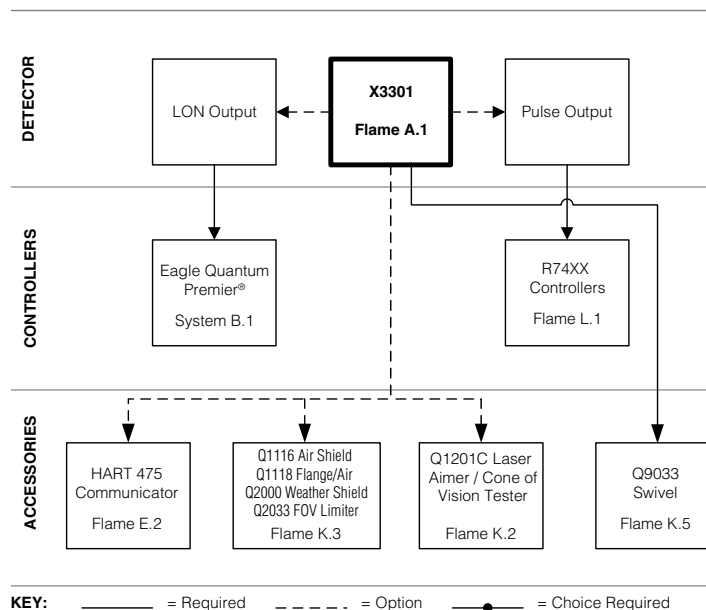

X3301 Protect•ir Multispectrum Infrared Flame Detector (Spec Sheet: 90-1143, 90-1144, 90-1190) establishes the benchmark in multiple-fuel fire detection performance and false alarm rejection. The detector utilizes advanced signal processing algorithms supported by an embedded 32-bit microprocessor to provide continuous protection in the presence of false alarm sources and environments with infrared radiation present. The Long Range version has a detection range of 210 feet to a 1 square foot n-Heptane fire and is recommended for any indoor/outdoor application. The Medium Range version has a detection range of 100 feet to a 1 square foot n-Heptane fire and is recommended for outdoor applications such as offshore oil/gas platforms where flares or other friendly fires are located. The detector is available in aluminum or 316 stainless steel. Standard outputs include fire alarm, auxiliary alarm, and fault relays and RS485 Modbus. Optional 4-20 mA, Eagle Quantum Premier®, or HART output is also available. Pulse output is available for easy retro fitting into controller-based systems.

- Eagle Quantum Premier compatibility
- Increased sensitivity, certified performance to multiple fuel types
- MTBF of 145,000 hours
- New standard set for cone of vision, 100 feet on and off axis for methane
- Microprocessor controlled heated optics enable optimal performance in adverse environments
- Data logger for event time and date stamping
- RS485 Modbus output
- Automatic optical integrity check on each sensor
- **Calibrated** manual testing/mag oi, no test lamp required
- Four conduit entries for easy installation
- IECEx, FM, CSA, ATEX/CE, DNV, ULC
- EN 54 part 10 certified by VdS, LPCB
- Meets Construction Product Directive
- Patent number: 5,995,008; 5,804,825; 5,850,182
- **Models available with SIL 2 certification**
- Optional HART output and AMS aware
- Models available with integral explosion proof camera option (xWatch)

Meets NFPA-33 Response requirements for under 0.5 seconds (available when model selected).

MULTISPECTRUM INFRARED

X3301 Model Matrix

MODEL	DESCRIPTION
X3301	Multispectrum IR Flame Detector
TYPE	MATERIAL
A	Aluminum
S	Stainless Steel (316)
TYPE	THREAD TYPE
3M	3 Port, Metric M25
3N	3 Port, 3/4" NPT
4M	4 Port, Metric M25
4N	4 Port, 3/4" NPT
TYPE	OUTPUTS
11	Relay
13	Relay and 4-20 mA
14	Eagle Quantum Premier (EQP)
15	Relay and Pulse
16	Addressable Module Only (third-party type)
21	Relay - Automotive
22	EQP - Automotive
23	HART, Relay, and 4-20 mA
33	Relay and 4-20 mA / NTSC (xWatch)
34	Eagle Quantum Premier / NTSC (xWatch)
43	Relay and 4-20 mA / PAL (xWatch)
44	Eagle Quantum Premier / PAL (xWatch)
TYPE	APPROVALS*
T	SIL/FM/CSA/ATEX/CE/IECEX
W	FM/CSA/ULC**/ATEX/CE/IECEX
A	FM/CSA
B	BRAZIL
R	VNIIPO/VNIIIFTRI (RUSSIA)
U	TCCEXEE/UKRCEPRO (UKRAINE)
Y	CCCF (CHINA)
TYPE	CLASSIFICATION***
1	Division/Zone Ex d e
2	Division/Zone Ex d

*Type Approval can use one or more letters to designate the approvals of the product

**ULC approval is not part of the LON output (Type 14 & 22)

***Detectors are always Class I, Div. 1. See Manual.

-035	Very High	De-energized, Non-Latching	De-energized, Non-Latching	Energized, Non-latching	Hangar**

*Available only on type 21 and 22 (Automotive) outputs.

**Consult factory for recommendations.

Application Recommendations

These are typical industry application settings. They may not be applicable to all installations. Contact factory for application guidance.

General Duty	001
Offshore	001, 004
Turbine	001, 004
Compressor	001, 002
Hangar	002, 034 or 035
Automotive	005

NOTE: Latching relays cannot be used in voted systems.

MULTISPECTRUM INFRARED

X3302 Protect•ir Multispectrum Infrared Flame Detector

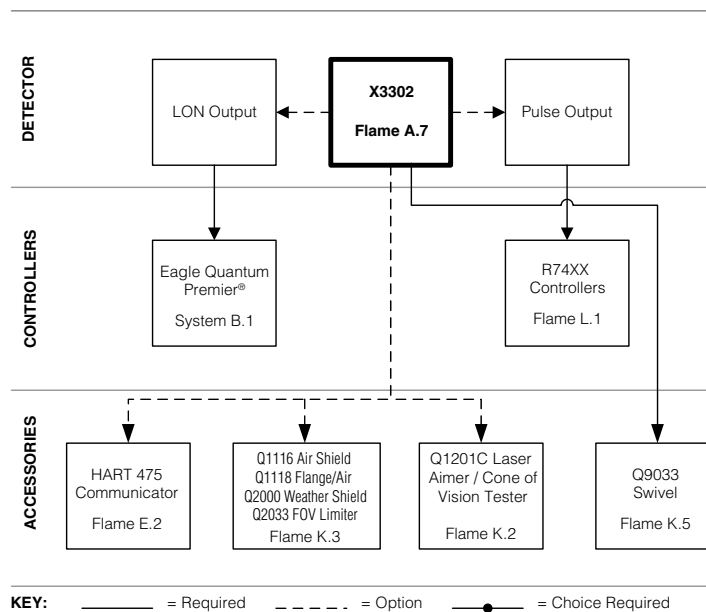

X3302 Multispectrum Infrared Flame Detector (Spec Sheet: 90-1185) provides a solid cone of vision for hydrogen fire detection coupled with superior false alarm rejection. The detector utilizes advanced signal processing algorithms supported by an embedded 32-bit microprocessor to provide continuous protection in the presence of false alarm sources and environments with infrared radiation present. The Long Range version has a detection range of 100 feet on and off axis to a hydrogen fire and is recommended for any indoor/outdoor application. The detector is available in aluminum or 316 stainless steel. Standard outputs include fire alarm, auxiliary alarm, and fault relays and RS485 Modbus. Optional 4-20 mA or Eagle Quantum Premier output is also available. Pulse output is available for easy retro fitting into controller-based systems.

- Eagle Quantum Premier compatible
- Increased sensitivity and certified performance
- MTBF of 145,000 hours
- New standard set for cone of vision, 100 feet on and off axis for hydrogen
- Microprocessor controlled heated optics, enable optimal performance in adverse environments
- Data logger for event time and date stamping
- RS485 Modbus output
- Optional HART output and AMS aware
- Automatic optical integrity check on each sensor
- Calibrated manual testing/mag oi, no test lamp required
- Four conduit entries for easy installation
- IECEx, FM, CSA, ATEX/CE
- VdS verified
- Patent number: 5,995,008; 5,804,825; 5,850,182
- Models available with integral explosion proof camera option (xWatch)

Meets NFPA-33 Response requirements for under 0.5 seconds (available when model selected).

Dash	Sensitivity	Alarm Relay	Aux Relay	Fault Relay	Special
-002	Very High	De-energized Non-latching	Energized Non-latching	Energized Non-latching	None
-007	Very High	De-energized Latching	De-energized Latching	Energized Non-latching	None

ULTRAVIOLET/INFRARED

X5200 UVIR Flame Detector

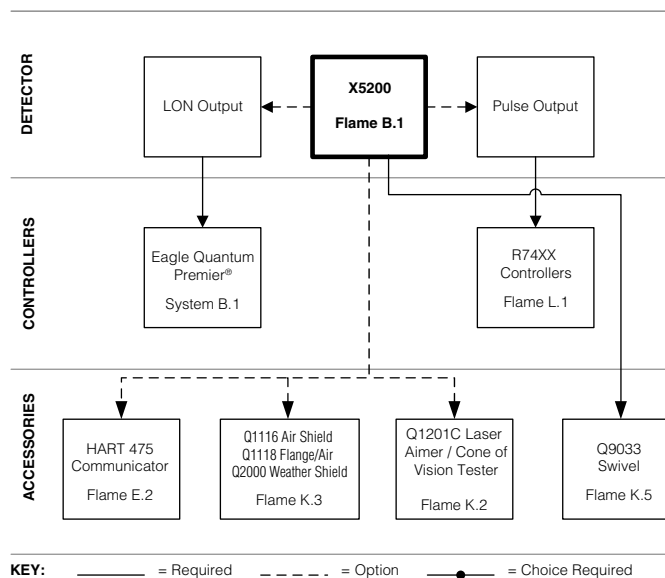

X5200 UVIR Flame Detector (Spec Sheet: 90-1156) meets the most stringent requirements worldwide with advanced high speed detection capabilities and immunity to extraneous sources, combined with a superior mechanical design. The combination of Arc rejection on the UV sensor and TDSA/Quick on the IR sensor make this detector the highest false alarm immune UVIR available. The mounting arrangement allows the UV and IR sensors to monitor the same hazardous location with a 90-degree cone of vision. When both sensors simultaneously detect the presence of a flame, an alarm signal is generated. The detector has Division and Zone explosion-proof ratings and is suitable for use in indoor and outdoor applications.

The standard output configuration includes fire, fault, and auxiliary relays and RS485 Modbus. Optional 4-20 mA or Eagle Quantum Premier output is also available. A model with pulse output is available for easy retrofitting into existing Det-Tronics' controller based systems. A multi-color LED on the detector faceplate indicates detector status condition.

The X5200 housing is available in aluminum or stainless steel, with NEMA 4X and IP66 rating. Typical applications include: Hangars, munitions, petrochemical applications, and turbines.

- Eagle Quantum Premier and Eagle Quantum compatible
- Patented signal processing, TDSA, Arc
- A new level of false alarm rejection
- Responds to a fire in the presence of modulated blackbody radiation (i.e., heaters, ovens, turbines) without false alarm
- High-speed capability
- Optional HART output and AMS aware
- Microprocessor-controlled heated optics for increased resistance to moisture and ice
- Automatic, manual, or magnetic optical integrity (oi) testing
- Pulse output for compatibility with controller-based systems (optional)
- IECEx, FM, CSA, ATEX/CE
- EN 54 part 10 certified by VdS, LPCB
- Meets Construction Product Directive
- Integral wiring compartment for ease of installation
- Class A wiring per NFPA-72
- EMI, RFI, EMC Directive Compliant
- Built-in data logging / event monitoring
- Meets NFPA 33 Response requirement for under 0.5 second (when model selected)
- Models available with integral explosion proof camera option (xWatch)

*The last 3 digits of the part number identify the software configuration. Please see table B1 to choose the correct option.

The EQP detectors are completely configurable using the S³ configuration software and are shipped defaulted to the -001 setting.

NOTE: 3 year warranty excludes xWatch camera. All X5200 models with xWatch are approved for Class I, Div. 1. Models listed above come with a 2.3 mm lens on the camera, which emulates the 90° field of view of the flame detector.

*Available only on the X5200M model

ARC = Arc Rejection. An algorithm that prevents false alarms from transient UV sources.

TDSA = "Time Domain Signal Analysis" Patented signal processing algorithm for superior IR false alarm rejection.

Quick = Signal processing for explosive IR events.

Application Recommendations

These are typical industry application settings. They may not be applicable to all installations. Contact factory for application guidance.

Offshore	001
Compressor	002
High Speed	003
Hangar	004
Automotive	005
Turbine	006

NOTE: Latching relays cannot be used in voted systems.

SINGLE FREQUENCY INFRARED

X9800 IR Flame Detector

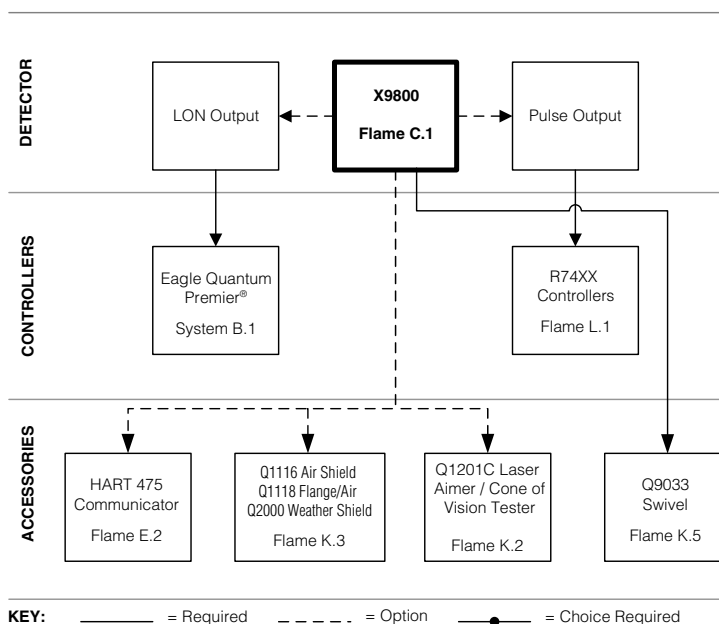

The **X9800 IR Flame Detector** (Spec Sheet: 90-1160) meets the most stringent requirements worldwide with advanced detection capabilities and immunity to extraneous sources, combined with a superior mechanical design. The detector is equipped with dual signal processing (high speed operation) and automatic/magnetic manual oi test capability. The detector has Division and Zone explosion-proof ratings and is suitable for use in indoor and outdoor applications.

The standard output configuration includes fire, fault, and auxiliary relays and RS485 Modbus. Optional 4-20 mA or Eagle Quantum Premier output is also available. A model with pulse output is available for easy retrofitting into existing Det-Tronics' controller-based systems. A multi-color LED on the detector faceplate indicates detector status condition.

The X9800 housing is available in aluminum or stainless steel, with NEMA 4X and IP66 rating. Typical applications include: turbines, petrochemical applications, automotive applications, and dirty environments.

- Eagle Quantum Premier compatible
- Unequaled false alarm rejection, TDSA
- Responds to a fire in the presence of modulated blackbody radiation
- High speed capability — 40 milliseconds
- Microprocessor-controlled heated optics for increased resistance to moisture and ice
- Automatic, manual, or magnetic optical integrity (oi) testing
- Optional HART output and AMS aware
- Pulse output for compatibility with controller-based systems (optional)
- Tricolor LED indicates normal operation, fire, and fault conditions
- IECEX, FM, CSA, ATEX/CE
- EN 54 part 10 certified by VdS, LPCB
- Mounting swivel allows easy sighting
- Integral wiring compartment for ease of installation
- Class A wiring per NFPA-72
- Meets NFPA-33 response requirement for under 0.5 second (available when mode selected)
- Built-in data logging / event monitoring
- Models available with integral explosion proof camera option (xWatch)

*The last 3 digits of the part number identify the software configuration. Please see table B1 to choose the correct option. The EQP detectors are completely configurable using the S³ configuration software and are shipped defaulted to the -001 setting.
NOTE: 3 year warranty excludes xWatch camera. All X9800 models with xWatch are approved for Class I, Div. 1. Models listed above come with a 2.3 mm lens on the camera, which emulates the 90° field of view of the flame detector.

Table C1 - X9800 Software Part Number Configuration Matrix

Dash	IR Sensitivity	Alarm Output IR Qualification	Alarm Relay	Aux Output Function	Aux Output IR Qualification	Aux Relay	Fault Relay
-001	High	TDSA	De-Energized Non-latching	Follows Alarm	TDSA	Energized Non-latching	Energized Non-latching
-002	High	TDSA or Quick	De-Energized Non-latching	Follows Alarm	TDSA or Quick	Energized Non-latching	Energized Non-latching
-003	Very High	TDSA or Quick	De-Energized Non-latching	Follows Alarm	TDSA or Quick	Energized Non-latching	Energized Non-latching
-004	Very High	TDSA	De-Energized Non-latching	Follows Alarm	TDSA	Energized Non-latching	Energized Non-latching
-005	High	TDSA or Quick	De-Energized Non-latching	Independent	Quick	Energized Non-latching	Energized Non-latching
-006	Low	TDSA	De-Energized Non-latching	Follows Alarm	TDSA	Energized Non-latching	Energized Non-latching
-007	High	TDSA	De-Energized Latching	Follows Alarm	TDSA	De-energized Latching	Energized Non-latching
-008	High	TDSA or Quick	De-Energized Latching	Follows Alarm	TDSA or Quick	De-energized Latching	Energized Non-latching
-009	Very High	TDSA or Quick	De-Energized Latching	Follows Alarm	TDSA or Quick	De-energized Latching	Energized Non-latching
-010	Very High	TDSA	De-Energized Latching	Follows Alarm	TDSA	De-energized Latching	Energized Non-latching
-011	High	TDSA or Quick	De-Energized Latching	Independent	Quick	De-energized Latching	Energized Non-latching
-012	Low	TDSA	De-Energized Latching	Follows Alarm	TDSA	De-energized Latching	Energized Non-latching
-013	High	Quick	De-Energized Non-Latching	Pre-Alarm	None	Energized Non-Latching	Energized Non-latching

TDSA = "Time Domain Signal Analysis" patented signal processing algorithm for superior IR false alarm rejection.
 Quick = Signal processing for explosive IR events.

ULTRAVIOLET

X2200 UV Flame Detector

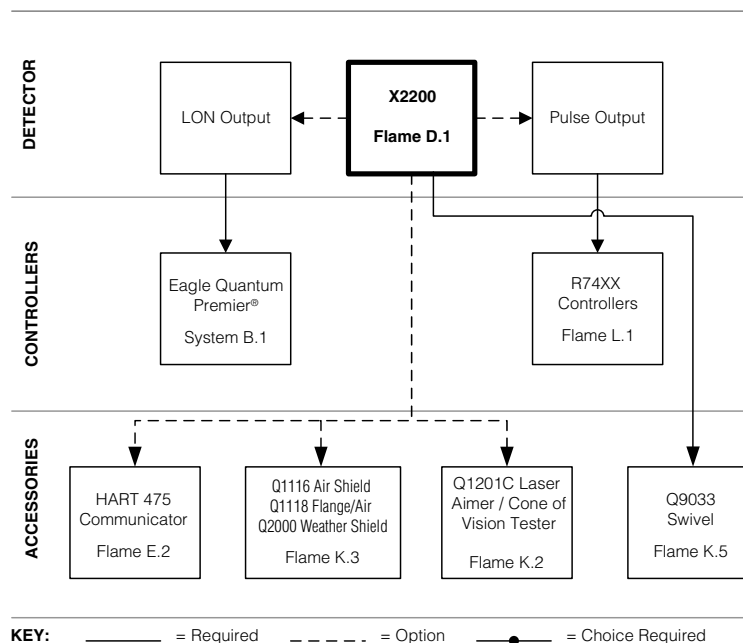

X2200 UV Flame Detector (Spec Sheet: 90-1157) meets the most stringent requirements worldwide with advanced signal processing and immunity to extraneous sources, combined with high speed capability. The detector is equipped with both automatic and manual oi test capability. The detector has Division and Zone explosion-proof ratings and is suitable for use in a variety of applications.

The standard output configuration includes fire, fault, and auxiliary relays and RS485 Modbus. Optional 4-20 mA or Eagle Quantum Premier output also available. A model with pulse output is available for easy retrofitting into existing Det-Tronics' controller based systems. A multi-color LED on the detector faceplate indicates detector status condition.

The X2200 housing is available in aluminum or stainless steel, with NEMA 4X and IP66 rating. Typical applications include: hydrogen storage, munitions, and silane storage.

- Eagle Quantum Premier and Eagle Quantum compatible
- Advanced signal processing
- Unequaled false alarm rejection, Arc
- Responds to a fire in the presence of modulated blackbody radiation without false alarm
- High-speed capability
- Optional HART output and AMS aware
- Automatic, manual, or magnetic optical integrity (oi) testing
- Pulse output for compatibility with controller-based systems (optional)
- IECEx, FM, CSA, ATEX/CE
- EN 54 part 10 certified by VdS, LPCB
- Tricolor LED indicates normal operation, fire, and fault conditions
- Mounting swivel allows easy sighting
- Integral wiring compartment for ease of installation
- Class A wiring per NFPA-72
- Meets NFPA-33 response requirement for under 0.5 second (available when model selected)
- EMI, RFI, EMC Directive Compliant
- Built-in data logging / event monitoring
- Models available with integral explosion proof camera option (xWatch)

*The last 3 digits of the part number identify the software configuration. Please see table D1 to choose the correct option.

The EQP detectors are completely configurable using the configuration software and are shipped defaulted to the -001 setting.

NOTE: 3 year warranty excludes xWatch camera. All X2200 models with xWatch are approved for Class I, Div. 1. Models listed above come with a 2.3 mm lens on the camera, which emulates the 90° field of view of the flame detector.

Table D1 - X2200 Software Part Number Configuration Matrix

Dash	UV Sensitivity	Arc Rejection	Alarm Relay	Aux Output Function	Aux Relay	Fault Relay
-001	High	High	De-Energized Non-latching	Follows Alarm	Energized Non-latching	Energized Non-latching
-002	High	Very High	De-Energized Non-latching	Follows Alarm	Energized Non-latching	Energized Non-latching

X7050

X7050 xWatch[®] Explosion-Proof Surveillance Camera

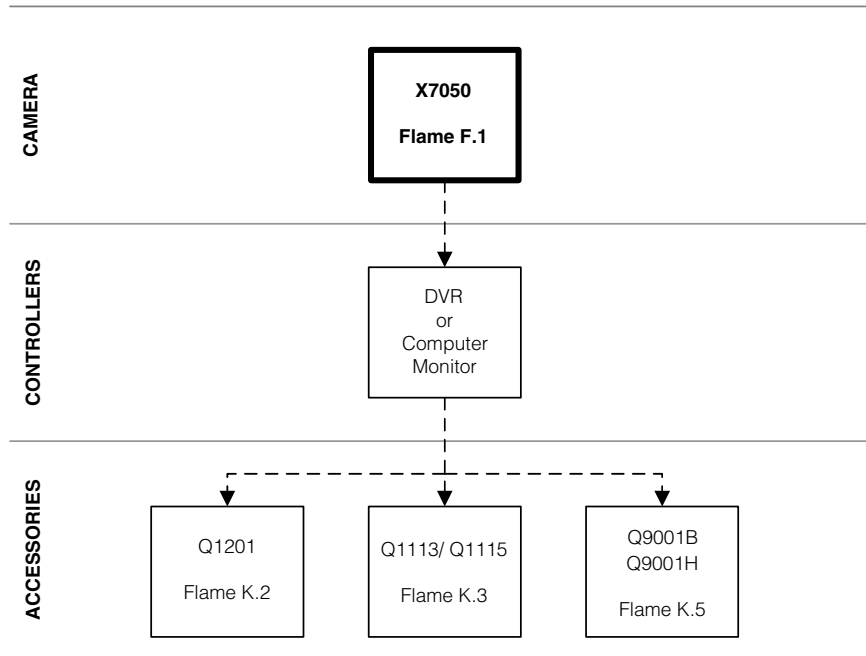

X7050 xWatch Explosion-Proof Surveillance Camera (Spec Sheet 90-1193) An explosion-proof surveillance camera providing high-resolution color images of activity in the monitored area, which allows the capture and recording of fires and other activities on video. When a detector goes into alarm, the operator can immediately view the monitored area in real time and accurately assess the risk and location of the fire. The camera can be used with any video switcher or server for a live video feed and the output can be directed to a DVR or computer monitor.

xWatch camera features:

- Easy connection to a video switcher using twisted pair wiring
- Existing wiring can be used in most applications
- IECEX
- Three lens choices for field of view
- Retrofit into a standard C7050 housing by simply replacing the tube module with the DE2020 camera module

Three configurations are available:

- As a stand-alone device to perform typical CCTV functions
- Retrofitted into a C7050 Detector, replacing the UV tube module with the camera module
- Ordered as a combined unit with any of the X-Series Flame Detectors (see flame detector sections for specific models)

000499-073	Screw Terminal Balun, Passive , converts single composite CCTV video signal from CAT-5 twisted pair wiring to BNC coaxial connector on DVR or video multiplexer, passive type, suitable for distances up to 750 ft.	<1 lb (<0.45 kg)

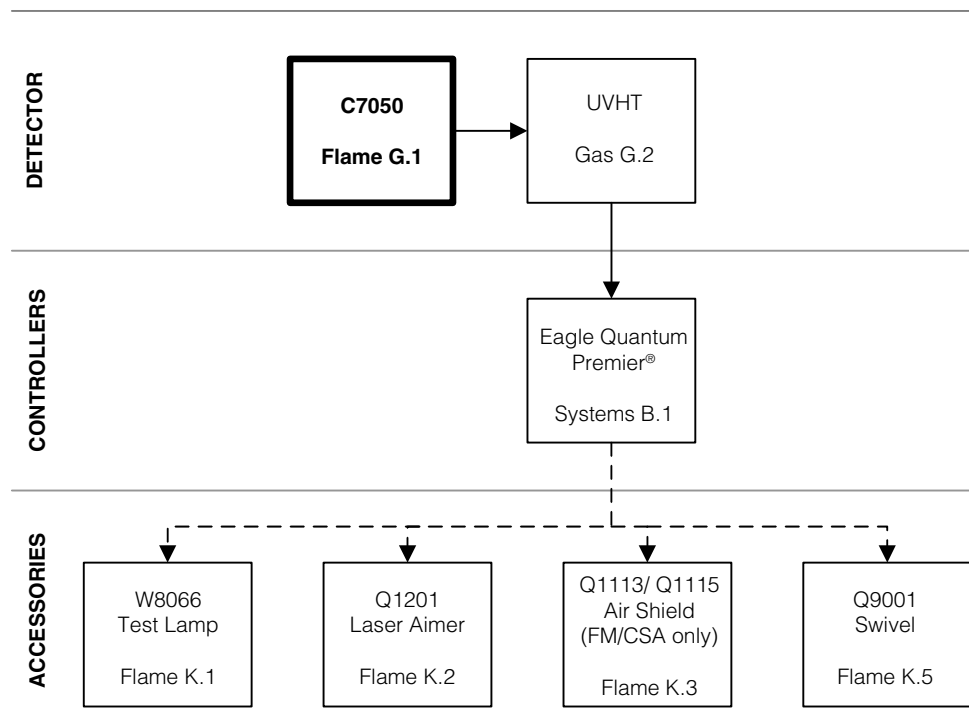

C7050

C7050 Detector

C7050 Detector (Manual: 95-8214) combined with the EQ2200UVHT (95-8570) on an EQP (or as a replacement on an older EQ system) provides fast, reliable flame detection in a wide variety of applications. The detector has the Automatic Optical Integrity (oi) feature, providing a continuous check of detector optical surfaces, detector sensitivity, and electronic circuitry of the detector/controller system. Not recommended for applications where welding or lightning may be present.

- Replaceable tube module
- External Automatic oi
- Internal Automatic oi
- Standard temperature option
- High temperature option, 125°C continuous duty
- Variable sensitivities available to match hazard
- FM, CSA, ATEX, CE

C7050 LENS CAP/BODY	004907-022	SS	N/A	N/A	X	1 lb (0.45 kg)

*High temperature rating - continuous duty at 125 degree Celsius, for environments that normally exceed 75 degree Celsius operation.

**One (1) Electronic Module (EQxxxxUVHT) is required for use with each C7050B Detector (-037, -038, or -039 only).

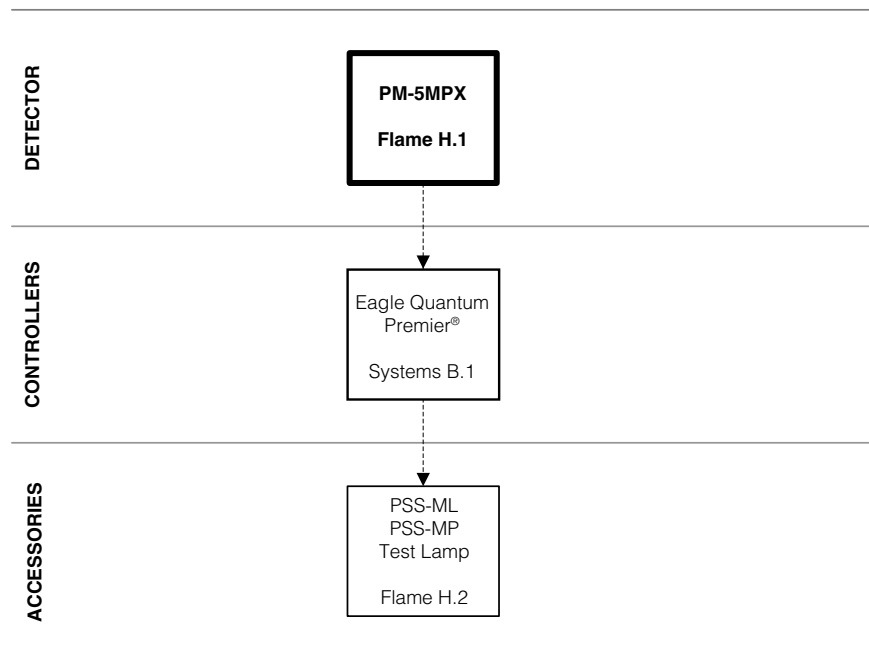

DUAL SPECTRUM INFRARED

Det-Tronics PM-5MPX Dual Spectrum Flame Detector

Det-Tronics PM-5MPX Dual Spectrum Flame Detector (Spec Sheet: 90-1182) is optimized for the rigorous semiconductor fabrication industry, which is beset with many hazards that result in stringent and application-specific requirements for fire protection safety systems.

- Complies to FM wet bench performance standards
- Approved to FM3260: 2000
- Dual Spectrum IR design
- Compact size
- LED indicator for operational status
- Built-in mounting plate
- Typical response of <0.5 sec
- Fast response—as fast as 25 milliseconds
- Polypropylene housing: Excellent resistance to corrosion and contamination effects
- FM approved for intrinsic safety
- CE marked
- Highly resistant to false alarms

KEY: _____ = Required - - - - - = Option —●— = Choice Required

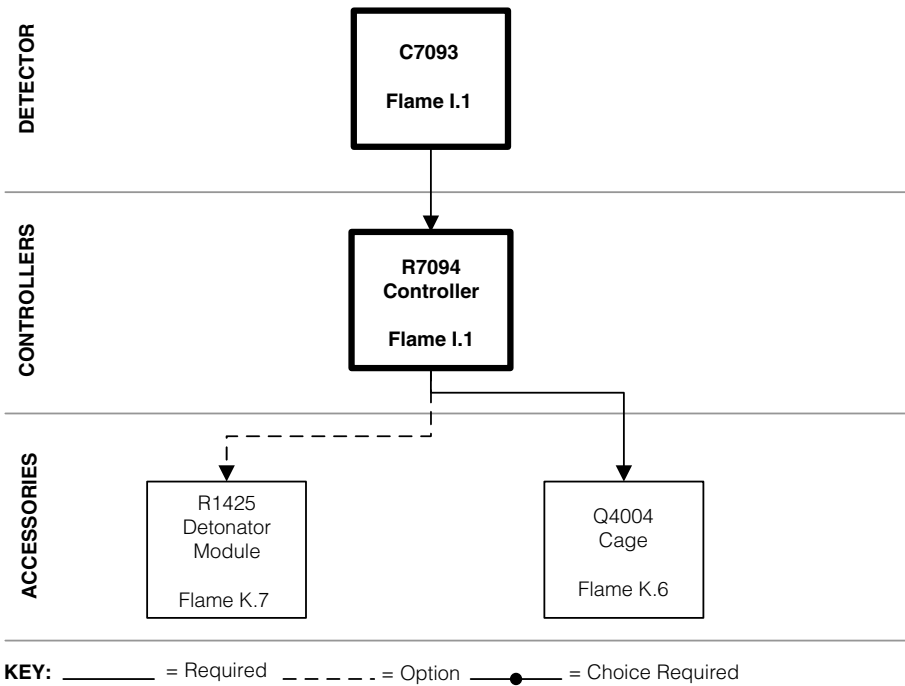

HIGH-SPEED INFRARED

C7093/R7094 High-Speed Infrared Flame Detection System

The C7093/R7094 High-Speed Infrared Flame Detection System (Spec Sheet: 90-1028) responds in less than 5 milliseconds to a high-intensity flash fire. Designed specifically for applications such as munitions manufacturing, the C7093/R7094 can trigger high-speed extinguishing systems.

- Extremely fast response (under 5 milliseconds) to flash fire
- Remote test feature provides manual test of optical and electrical components and interconnecting wiring
- Can be used with an external disarming circuit
- Provision for a manual external emergency actuation with circuit (“Manual Pull”) for any contact closure device (Class B Supervised)
- Electronically supervises external detonator circuit
- Provisions for an optional external power supply for use with solenoid valves, etc.
- Auxiliary solid state outputs make the system compatible with other Det-Tronics’ systems
- Can be connected to remote “Armed” and “Fault” lamps
- Adjustable cone of vision
- Intrinsically safe design

SMOKE DETECTORS

U5005 and U5006 Smoke Detectors

U5005 Smoke Detector (Spec Sheet: 90-1101) is a sensitive, yet rugged, state-of-the-art protection device that is designed for classified areas in hazardous industrial and commercial locations. The detector is designed to operate effectively with both slow smoldering and fast-burning fires. Includes an external alarm indicating LED and one set of normally open relay contacts for alarm and one set of normally closed relay contacts for power supervision.

- Trouble-free photoelectric operation
- Standard 4-wire 24 Vdc operation (U5006)
- Rugged design for environmental extremes
- Explosionproof junction box with terminal board
- Auxiliary relay
- CSA approved Class I, Div 2, Groups A, B, C, and D

U5006 Air Duct Smoke Detector (Spec Sheet: 90-1101), using the technology of the U5005 Smoke Detector mounted into a fiberglass NEMA 4 enclosure, is designed to detect the presence of smoke for the primary purpose of controlling blowers and dampers in air conditioning and ventilation systems. The unit mounts directly to heating, ventilating, and air conditioning ducts and uses a cross-sectional sampling tube arrangement that allows large volume air sampling. Includes an auxiliary alarm relay contact, which can be normally open or closed.

- Trouble-free photoelectric operation
- Standard 4-wire 24 Vdc operation (U5006)
- Designed to meet ANSI/UL 268A smoke obscuration limits
- 600 to 4000 feet per minute airflow range
- Rugged design for environmental extremes
- Explosionproof junction box with terminal board
- Auxiliary relay
- CSA approved Class I, Div 2, Groups A, B, C, and D

	000119-008	Smoke Detector tester (canned smoke)	1 lb (0.46 kg)

ACCESSORIES

Test Lamps

W8066 Portable UV Test Lamp (Spec Sheet: 90-1055) is used for on-site testing of all UV detector types. It replaces W866. Consists of a UV lamp powered by a replaceable 9 volt battery and is contained in a plastic enclosure. Intrinsically safe.

W867C Portable UV/IR Test Lamp (Spec Sheet: 90-1055) is used for on-site testing of UV, single frequency IR, or UVIR detectors. Consists of a high-energy broad band lamp powered by rechargeable batteries and is contained in an explosionproof non-ferrous metallic enclosure.

W8067S Long Range Test Lamp (Manual: 95-8626) for on-site testing of the UVIR and single frequency IR detectors.
NON EXPLOSIONPROOF - CANNOT BE USED IN HAZARDOUS LOCATIONS.

Laser Aimer, Laser Holder, W6300 Detector Inspector

Laser Aimer/Cone of Vision Tester is for use with the Q1201A and Q1201C Laser Holder in sighting and testing the area of flame detection coverage. Battery-powered laser projects a red beam of light and has a rotary switch for turning the device on and off. When used with its holder, the laser beam identifies the center and edges of the detector's COV. Includes battery.

Q1201A Laser Holder (Manual: 95-8404) is for use with the Laser Aimer for sighting and testing area of flame detection coverage. Easily attaches to the front of Det-Tronics' older model UV, single frequency IR and UV/IR detectors for use during system startup, checkout, and re-alignments. Designed to hold the Laser Aimer (which projects a red beam of laser light) to show exact location of the center of the detector's COV. Two additional holding positions are available for locating the outside edges of the COV at either 40 degrees off center (80 degrees total COV) or at 45 degrees off center (90 degrees total COV). While laser is being used to locate edges of the COV it can be rotated 360 degrees to identify the entire area of flame detection coverage.

Q1201C Laser Holder and Laser (Manual: 95-8596) is for use with X3301, X3302, X2200, X5200, X9800 and X3300 flame detectors. Easily attaches to the front of Det-Tronics' X-Series flame detectors for use during system startup, checkout, and re-alignments. Designed to hold the Laser Aimer (which projects a red beam of laser light) to show exact location of the center of the detector's COV. Two additional holding positions are available for locating the outside edges of the COV at either 30 degrees off center (75 degrees total COV) or at 45 degrees off center (90 degrees total COV). While laser is being used to locate edges of the COV it can be rotated 360 degrees to identify the entire area of flame detection coverage.

W6300B Inspector Connector with Inspector Monitor Software (Manual: 95-8581) for use with X3301, X3302, X5200, X9800 and X2200 flame detectors. Allows for validation of configuration and uploading of important detector status data such as power-up/down, faults and alarms to a personal computer (PC) where it can be displayed, saved and/or printed.

ACCESSORIES

Detector Hardware

Q1113A Universal Air Shield Assembly (Manual: 95-8321). Use on UV, IR, and UV/IR detectors (C7050A, B and H, C7051, C7052, C7098, U7600, U7602 and U7698) in areas with high levels of airborne contamination. Consists of Delrin (solvent-resistant plastic) air shield housing with bronze sintered air diffuser. Quick connect air line fitting accepts 1/4 inch O.D. nylon tubing for instrument grade air supply of 5 to 15 psi at 3 or more cubic feet per minute. Easy to install on existing detectors.

Q1115 Universal Air Shield/Flange Mount Assembly (Manual: 95-8467). Use on UV and IR detectors (C7050B, C7098, U7600, U7602 and U7698) in areas with high levels of air-borne contaminants. Available in either aluminum or stainless steel with a sintered air diffuser. Quick connect air line fitting accepts 1/4 inch OD nylon tubing for instrument grade air supply of 5 to 15 psi at 3 or more cubic feet per minute.

Q1116 Universal Air Shield Assembly (Manual: 95-8597). Use on X3301, X3302, X2200, X5200 and X9800 in areas with high levels of air-borne contaminants. Available in aluminum with a sintered air diffuser. Quick connect air line fitting accepts 1/4 inch OD nylon tubing for instrument grade air supply of 12 to 20 psi at 3 or more cubic feet per minute.

Q1118 Universal Air Shield/Flange Mount Assembly (Manual: 95-8595). Use on X3301, X3302, X2200, X5200 and X9800 in areas with high levels of air-borne contaminants. Available in either aluminum or stainless steel with a sintered air diffuser. Quick connect air line fitting accepts 1/4 inch OD nylon tubing for instrument grade air supply of 10 to 20 psi at 3 or more cubic feet per minute.

Q1198 Dual Air Shield/Flange Mount Assembly (Manual: 95-8598). Use on X9800 in areas with super high levels of powder air-borne contaminants. Aluminum with a sintered air diffuser. Quick connect air line fitting accepts 1/4 inch OD nylon tubing for instrument grade air supply of 10 to 60 psi at 3 or more cubic feet per minute.

Q2000 X-Series Weather Shield provides added weather protection.

Q2033 Field of View "FOV" limiter / Weather Shield for the X3301 or X3302
For applications with friendly fires or flares, which require a controlled cone of vision. Order the 10° model for the greatest reduction in field of view, the 20° for standard limitation, or the 30° to maintain the field of view and use as a weather shield.

Power Supplies

000507-005 and 000507-006 24 Vdc Power Supplies (Spec Sheet: 90-1035). Open frame construction and designed to operate on 120/240 Vac 50/60 Hz to handle the power requirements of IR detection systems, UV/IR detection systems, and larger UV detection systems that typically need higher levels of current than rack-mounted voltage converters can deliver. Use in Q1020 Wall mount enclosures (sold separately) or in other enclosures containing Det-Tronics' fire detection equipment. **DOES NOT MOUNT INTO THE Q4004 MOUNTING CAGE.** Can be used with any controller-based or unitized system designed to operate on 24 Vdc.

000507-005 and 000507-006 Power Supplies

Model	Part Number	Output Rating	Ship Weight
N/A	000507-005	24 Vdc@3.6 amps	6.5 lb (3.0 kg)
N/A	000507-006	24 Vdc@12.6 amps	19.5 lb (8.9 kg)

Mounting Cages and Enclosures

Q4004 Universal Mounting Cage (Manual: 95-8241) for use with R6006, R6007, R7094, R7404, R7405, R7409, R7484, R7494, R7495, R1425 and W4220. Also holds R8471 gas controllers.

Q4004 Universal Mounting Cages

Model	Part Number	Number of Flame Detectors	Ship Weight

Blank filler plates	002188-001	N/A	0.3 lb (1.04 kg)

NOTE: Q4004A2019-R has Russian approvals.

Q1020A Wall Mount Metal Enclosure (Manual: 95-8350) with metric cage assembly rated IP55. Suitable for indoor applications primarily to provide a degree of protection against dust and/or spraying water. Enclosure features a three-hinged compartment design, locks, and a front viewing window.

Installation and wiring of backplates at factory to a field wiring terminal strip. Provided are one standard electrical and one mechanical drawing. Additional drawings (i.e., COV layout, detector placement) and engineering provided at our standard rate. Additional enclosure charges will include a pre-wiring fee of \$300 per module slot for R74XX controllers or \$150 for all other controllers. **NO DISCOUNTS ALLOWED ON THIS CHARGE.**

Q1020A Wall Mount Enclosures

Model	Part Number	Dimensions	Use With	Ship Weight
Q1020A1001	000803-001	13" x 24" x 21"	8 flame/16 gas	80 lb (36 kg)
Q1020A2001	000803-002	26" x 24" x 21"	16 flame/32 gas	160 lb (72 kg)

ACCESSORIES

Output Devices for R7XXX Controllers

R1425 Rack Mount Detonator Module (Spec Sheet: 90-1021) for high-speed extinguishing systems. Features two independent capacitive-discharge detonator firing circuits monitored for opens. Use with the R7404 controller. Mounts in Q4004 Cage Assembly (sold separately). Operates on 12 or 24 Vdc.

R1425 Rack Mount Detonator Module for the R7404 Controller

Model	Part Number	Description	Ship Weight
R1425A2024	002791-001	Standard Model	3 lb (1.4 kg)
R1425B3001	002791-002	Requires "UV" and "Matrix" inputs at the same time (Hercules Model)	3 lb (1.4 kg)

R6006 Rack Mount Relay Output Module (Spec Sheet: 90-1016). Units have eight individual form C relay outputs rated at 3 amps per relay. Relays can be operated by solid state outputs from one R7404, R7409 or R7494 controller. Zone relays can be grouped for voting outputs. R6006C and R6006D have load monitoring capabilities. Operates on either 12 or 24 Vdc. Mounts in Q4004 Cage Assembly (sold separately).

R6006 Rack Mount Relay Output Module

Model	Part Number	Ind Relays	Alarm Relays	Fault Relays	CSA	Ship Weight
R6006A2001	002320-001	6	1	1		4.5 lb (2 kg)
R6006B3004	002321-001	8	-	-		4.5 lb (2 kg)
R6006C1008	002478-002	6	1	1	X	4.5 lb (2 kg)
R6006D4009	002479-002	8	-	-	X	4.5 lb (2 kg)

R6007A Auxiliary Relay Output Assembly (Spec Sheet: 90-1029). Provides relay contacts actuated by solid state outputs from one R7404, R7409, R7484, or R7494 controller. Four, eight, or twelve relays are supplied on either one or two PC boards. All relays are form C (N.O./N.C.) rated 3 amps at up to 30 Vdc or 250 Vac. Only one controller per R6007A. Mount on Q4004 Cage Assembly (sold separately). Operates on 12 or 24 Vdc. SPECIFY CONTROLLER MODEL AND NUMBER OF RELAYS.

R6007 Auxiliary Relay Output Assembly

Model	Part Number	Zone Relays	Fire Logic Relays	Common Alarm Relay	Common Fault Relay	Data Strobe Output	Ship Weight
R6007A1006	003436-004	0	A and B	X	X	-	2.2 lb (1.0 kg)
R6007A1003	003436-002	8	-	-	-	-	2.2 lb (1.0 kg)
R6007A1002	003436-001	8	A and B	X	X	-	2.2 lb (1.0 kg)
R6007A1009	003436-015	0	B Only	X	X	X	2.2 lb (1.0 kg)
R6007A1008	003436-014	8	B Only	X	X	X	2.2 lb (1.0 kg)

CONTROLLERS

R74XX Controllers

The R7404 Controller (Spec Sheet: 90-1014) provide fast, reliable flame detection in a wide variety of applications. The microprocessor-based controller simultaneously monitors up to 16 C7050 ultraviolet detectors in up to eight different zones. The detector has the Automatic Optical Integrity (oi) feature, providing a continuous check of detector optical surfaces, detector sensitivity, and electronic circuitry of the detector/controller system. Selectable time delay. (Indoor applications.)

NOTE: Check X-Series flame detector pulse retrofit options.

The STAR (Selectable Transient Arc Rejection) (Manual: 95-8294) logic program for the R7404 Controller has been specifically designed to reject transient electric arcs, such as those produced in electrostatic powder coating or paint spraying booths emitting UV radiation, which can cause false actuation of a UV flame detection system. Supports up to eight detectors in up to eight different zones using adjustable transient arc rejection parameters. (Outdoor applications.)

- Automatic oi
- Adjustable sensitivity and time delay
- Automatic fault identification
- Individual zone identification with eight voting options
- Latching ZONE LEDs identify the zone responding to fire
- Selectable latching or non-latching output circuits
- Individual detector output (count rate) can be measured and observed on digital display
- CSA certified

NOTE: Check X-Series flame detector pulse retrofit options.

The **R7494** controller continuously monitors up to eight detectors and generates the fire alarm in response to the detector's fire signal. The front panel provides switches for selecting mode of operation and initiating test functions.

- Ignores false alarm sources such as arc welding, x-rays, gamma radiation and radiation from flickering hot objects
- Fast response—typically 1 to 5 seconds for an intense hydrocarbon fire
- Each detector independently registers an alarm
- Microprocessor control provides continuous diagnostics and automatic fault identification
- Automatic oi for both UV and IR sensors
- Explosion-proof (flame-proof) detector housing
- Count test mode allows monitoring of actual detector output
- Voting circuitry for improved false alarm rejection
- Up to eight controllers can be wired to provide up to 64 voting detector zones
- FM and CSA certified

NOTE: Check X-Series flame detector pulse retrofit options.

INFRARED

PointWatch Eclipse® PIRECL Infrared Hydrocarbon Gas Detector

The **PointWatch Eclipse PIRECL Hydrocarbon Detector** (Spec Sheet: 90-1138) is our most rugged stainless steel, point infrared gas detector providing detection of methane and other flammable hydrocarbon gases in the LFL range. Standard signal outputs include isolated 4-20 mA output, HART communication protocol, and RS-485 serial communication supporting Modbus. An Eagle Quantum Premier version is also available. A tri-color LED provides visual display of operating status. The weather baffle provides excellent optics protection with an easy twist-lock removal. ATEX 94/9/EC and EN 60079-29 certified for global certification compliance. Additional features include:

- Eagle Quantum Premier System-compatible version available
- Internal wiring compartment saves money and time
- Heated optics
- Non-intrusive calibration
- Immune to poisoning
- Handheld communicator capability
- Optional 2-alarm, 1-fault relay package
- Ex d, e, ib protection designs
- IECEx, FM, CSA, ATEX/CE certifications plus others
- **Models available with SIL 2 certification**
- Available as a standalone detector, but is compatible with:
 - FlexVu UD10 Universal Display
 - U9500H Transmitter
 - R8471H Controller
- Remote calibration capability using UD10 or model PIRTB junction box

KEY: ——— = Required - - - - = Option —●— = Choice Required

PointWatch Eclipse Model Matrix

MODEL	DESCRIPTION
PIRECL	Point Infrared Eclipse Gas Detector
TYPE	THREAD TYPE
A	3/4" NPT
B	M25
TYPE	OUTPUT AND MEASUREMENT OPTIONS
1	4-20 mA with HART Protocol and RS-485: 0-100% LFL Full Scale Range
4	Eagle Quantum Premier Compatible Only: 0-100% LFL Full Scale Range
TYPE	OPTIONAL OUTPUTS
A	HART Communication Port
B	HART Communication Port and Relay Board (not compatible with EQP) Ex d only
D	No Optional Outputs
E	Relay Board (not compatible with EQP) Ex d only
TYPE	WEATHER PROTECTION
1	Weather Baffle with Hydrophobic filter
2	Weather Baffle without Hydrophobic filter
3	Weather Baffle with Hydrophobic filter and 1/16" threaded calibration port
4	Weather Baffle without Hydrophobic filter and 1/16" threaded calibration port
5	No Weather Protection installed
TYPE	APPROVALS
T	SIL/FM/CSA/ATEX/CE
W	FM/CSA/ATEX/CE
B	Brazil
BT	Brazil/SIL
R	VNIIFTRI (Russia)
U	TCCEExEE/Ukrmetrteststandart (Ukraine)
Y	CCCF (China)
TYPE	CLASSIFICATION*
1	Division/Zone Ex d e
2	Division/Zone Ex d

*Detectors are always Class I, Div 1. See Manual.

Typical PIRECL Customer Proposal

Qty	Model	Part Number	Description
1	PIRECLA1B1W2	007168-005	3/4 NPT, 4-20 mA, w/relays, w/hydrophobic filter, FM/CSA/ATEX/CE approvals

Spare Parts

Qty	Model	Part Number	Description
1	N/A	007165-002	Weather baffle with std inlet nozzle w/hydrophobic filter

Accessories

Qty	Part Number	Description
1	103922-001	Model 475 HART Field Communicator
1	006468-001	Methane Gas Calibration Kit
1	000118-020*	Remote HART Port Cable Kit - 20 meter
1	000118-021**	Extension Cord - 1 meter

*Kit requires the use of a Communicator-to-Cable Connector (p/n 000118-021) for connection to the HART field communicator.

**Qty 1 required per each 475 Communicator.

PIRECL Accessories and Sample Draw

The **Model 475 HART Field Communicator** is available from Detector Electronics Corporation under agreement with Emerson Process Management. The intrinsically safe 475 Field Communicator enables connection to the PIRECL via the onboard optional HART port connection. Features include a full color LCD display, 4x battery life and half the start up time from previous releases.

The **Remote HART Port Kit and Remote HART cable kit** (Manual: 95-8553) are used with the Model PIRECL PointWatch Eclipse IR gas detector to provide access to the Eclipse's optional onboard, intrinsically-safe HART port for a distance up to 20 meters. Cable set is 20 meter long, 2-core, shielded 20 awg conductors with overall PVC-jacket, and is IEC332 approved.

In addition to standard replacement **Weather Baffles** (Spec Sheet: 90-1155), special replacement weather baffles for PIRECL Eclipse are available including a version with a 1/16 inch FNPT, internally-threaded calibration gas opening, enabling users to install a threaded compression fitting (not supplied) into the baffle for use with plastic or metal tubing. Also available is a replacement weather baffle with an external, 7/16-20 threaded calibration gas opening, used within the PIRECL sample draw cup assembly p/n 007378-001. These special weather baffles are identical in all other respects to the standard, factory-installed weather baffles provided on all standard PIRECL models.

The **Sample Draw Cup Assembly** (Spec Sheet: 90-1154) enables the Model PIRECL Eclipse to function within a gas sampling system. It consists of an outer cup assembly with stainless-steel, inlet/outlet compression fittings for 0.25 inch diameter tubing, a special inner baffle assembly with external-threaded extension, and silicon gaskets to ensure proper cup assembly seal is provided.

Miscellaneous PIRECL Accessories

475 HART Communicator

Part Number	Description	Ship Weight
103922-001	475 HART Field Communicator	7.5 lb (3.4 kg)
103922-002	475 HART & Foundation Fieldbus Field Communicator	7.5 lb (3.4 kg)

PIRECL Weather Baffles

Part Number	Description	Ship Weight
007165-001	Weatherbaffle with std inlet nozzle, w/o hydrophobic filter	<1 lb (<0.45 kg)
007165-002	Weatherbaffle with std inlet nozzle, w/hydrophobic filter (standard)	<1 lb (<0.45 kg)
007165-003	Weatherbaffle with 1/16" FNPT cal gas inlet, w/o hydrophobic filter	<1 lb (<0.45 kg)
007165-004	Weatherbaffle with 1/16" FNPT cal gas inlet, w/ hydrophobic filter	<1 lb (<0.45 kg)
007165-005	Weatherbaffle w/ 7/16-20 ext threads (use w/sample cup 007378-001)	<1 lb (<0.45 kg)

Remote HART Replicator Kits for use w/ PIRECL and OPECL

Part Number	Description	Ship Weight
000118-010	Remote HART Port Kit, includes 20 meter prefab cable set	7.5 lb (3.4 kg)
000118-020*	Remote HART Cable Kit, includes 20 meter prefab cable set	7.5 lb (3.4 kg)

*Kit requires the use of a Communicator-to-Cable Connector (p/n 000118-021) for connection to the HART field communicator.

Spare Parts for HART Port Replicator Kit

Part Number	Description	Ship Weight
000118-011	Cordset, 20 meters intrinsically safe cable with prefab connectors	6 lb (2.7 kg)
000118-012	Stainless steel adapter for PIRECL HART connector	<1 lb (<0.45 kg)
000118-013	HART port connector box, IP67 rated, w/stainless connectors	<1 lb (<0.45 kg)
000118-016	SS Cap, Male	<1 lb (<0.45 kg)
000118-021*	Extension cordset, HART 475 to 000118-011	1 lb (0.45 kg)

*Qty 1 required per each 475 Communicator.

PIRECL Sample Draw Cup

Part Number	Description	Ship Weight
007378-001	Sample draw cup assembly for PIRECL (not included), 1/4" fitting	8 oz (0.23 kg)

PIRECL Miscellaneous Parts

Part Number	Description	Ship Weight
006672-002	PIRECL windshield calibration bag	<1 lb (<0.45 kg)
009192-001	Cover, cal port tethered, clear *	<1 lb (<0.45 kg)
007145-001	Relay Board	<1 lb (<0.45 kg)
107427-040	O-ring, 3.75" I.D., j-box cover	<1 lb (<0.45 kg)
107427-052	O-ring, 2.43" I.D., weathershield	<1 lb (<0.45 kg)
107427-053	O-ring, 3.25" I.D., front flange (internal)	<1 lb (<0.45 kg)

*Replaces discontinued calibration cap p/n's 102823-001 and 103035-001.

Duct-Mounting Kits for PIRECL PointWatch Eclipse

The **Direct Duct Mount Assembly** (p/n 007525-XXX series) (Spec Sheet: 90-1151) enables the model PIRECL PointWatch Eclipse sensing chamber to be installed directly within air handling ductwork. The assembly is mounted on the duct wall, with the PIRECL sensing chamber exposed directly to duct airflow, ensuring fast response to flammable hydrocarbon gases and vapors. A built-in calibration gas nozzle with an external, self-sealing fitting enables testing and calibration without removal of the detector from the duct. Not recommended for applications where duct air temperatures can exceed 167 °F (75 °C). Price includes all necessary hardware for proper operation, but does not include PIRECL PointWatch Eclipse. A factory pre-assembled Direct Duct Mount Kit is available (p/n 007529-XXX series) that provides a PIRECL PointWatch Eclipse detector prefit into the Direct Duct Mount kit assembly. Pricing for the 007529-XXX assembly includes the PIRECL PointWatch Eclipse.

The **Model Q900 Duct Mount Kit** (Spec Sheet: 90-1152) is used with the PIRECL PointWatch Eclipse to detect combustible hydrocarbon gases within air handling ductwork. The Q900 is mounted to the exterior of the duct wall and utilizes a duct inlet / return tube arrangement that provides cross-duct air sampling without the need for vacuum pumps or aspirators. High temperature rated, flexible teflon tubes are provided to enable easy access to optics for inspection purposes. Price includes all necessary hardware for proper operation, but does not include PIRECL PointWatch Eclipse (except where noted). One duct air inlet tube and one return tube are furnished with each Q900 kit.

Direct Duct Mount Kits

Part Number	Description	Ship Weight
007525-003	Direct-Duct Mount Kit for PIRECL, 316 SS (PIRECL not included)	1 lb (0.46 kg)

PointWatch PIR9400 IR Hydrocarbon Gas Detector

PointWatch PIR9400 Infrared Hydrocarbon Detector (Spec Sheet: 90-1074). For the detection of combustible hydrocarbon gases. Provides reliable operation in high concentrations of background hydrocarbon gases and has low maintenance costs. It is immune to poisoning. Five year warranty.

- 4-20 mA output
- Stand-alone or use with
 - FlexVu UD10 Universal Display STB
 - U9500 Ininiti® Transmitter
 - PIRTB Termination Box (not compatible with UD10)
- Automatic Calibration function
- Heated optics
- 0% to 100% LFL detection range
- Non-intrusive calibration capability
- Metric or English Configurations
- Stainless steel or aluminum option
- Aluminum or plastic baffle option
- Duct mount and sample draw options
- Can be terminated with full digital interface on the FlexVu UD10

FlexVu® UD10 Universal Display (for Infrared)

FlexVu UD10 Universal Display (Spec Sheet: 90-1200) is recommended for applications where a gas detector with digital read-out of detected gas levels are required. The FlexVu UD10 Universal Display Unit is designed for use with Det-Tronics' infrared gas sensor/transmitters such as PIRECL, PIR9400, PIRDUCT, or OPECL. The display unit is designed and approved as a 'stand alone' device and performs all the functions of a gas controller.

- Universal design supports a variety of Det-Tronics' sensors/detectors
- Continuously displays gas level, gas type, and units measured
- Heated backlit display
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- Relay, modbus, and linear isolated/non-isolated 4-20 mA output with HART

U9500H Infiniti® HC–PointWatch Transmitter

U9500H Infiniti HC–PointWatch Transmitter (Spec Sheet: 90-1099). For use with a single Det-Tronics PointWatch Eclipse or PIR9400 Infrared Hydrocarbon gas detector.

- Linear isolated 4-20 mA output
- Eight character LCD display
- Non-intrusive automatic calibration
- Easy pushbutton configuration
- Base version provides analog output only
- Optional relay package (three alarm, one fault)
- Extensive fault diagnostics
- Stainless steel or aluminum junction box options
- Optional reset/calibration pushbutton is preinstalled on some junction boxes (recommended where magnets are not preferred)

KEY: — = Required - - - = Option —●— = Choice Required

Model PIRTB Series PointWatch Termination Box

- Use for stand-alone PointWatch
- Required for remote separation from U9500H transmitter
- Use with PIRECL Eclipse or PIR9400 when remote calibration initiation is required
- Magnetic reed switch calibration and LED gives calibration feedback
- Tall cover boxes with window enable one person, non-intrusive calibration
- Short cover boxes without window require two people to accomplish non-intrusive calibration

KEY: — = Required - - - = Option —●— = Choice Required

PIR9400 PointWatch Accessories

The PointWatch Direct Duct Mount kit (Manual 95-8525) enables direct mounting of PointWatch PIR9400 Infrared Hydrocarbon gas detector into air-handling ductwork. Each assembly contains: PointWatch-modified w/shortened weatherbaffles mounting plate, adapters, and fittings to apply test gas to PointWatch without duct removal.

The PointWatch Model Q810 Duct Mount Enclosure (Manual 95-8459) is a different duct mount option for PIR9400, designed to provide hydrocarbon gas detection in air handling, heating, ventilating, and air conditioning ducts. Specially-modified PointWatch included.

- Mounts to a flat duct wall surface; keeps PIR9400 out of duct interior
- Stainless steel sample inlet tube spans the cross section of the duct; sample return tube returns stream back into duct
- Allows large volume, continuous air sampling with cross-sectional vapor capture
- Requires a 600 – 4000 fpm airflow velocity rate
- 316 stainless steel NEMA 4X enclosure
- 316 stainless steel sample tubes included. Must specify desired inlet tube length

Note: Model UD10 is strongly recommended for use with Direct Duct and Q810 assemblies for ease in performing calibration.

The PIR9400 Sample Draw Cup (Manual 95-8486) provides a sealed metal enclosure enabling use of PointWatch PIR9400 within a gas sample extraction system (not included). Requires removal of standard baffle and some field assembly. Not compatible with PointWatch Eclipse.

PointWatch Direct Duct Mount Assembly

Part Number	Conduit Entry	Material	Ship Weight
006575-001	3/4 in	AL	5.5 lb (2.5 kg)
006575-002	3/4 in	SS	7.5 lb (3.4 kg)
006575-003	20 mm	AL	5.5 lb (2.5 kg)
006575-004	20 mm	SS	7.5 lb (3.4 kg)
006575-903*	20 mm	AL	5.5 lb (2.5 kg)
006575-904*	20 mm	SS	7.5 lb (3.4 kg)

*Russian-approved PIR9400 models included.

All assemblies above include matching PIR9400 detector. Not recommended for use in high temperature or dirty applications. Standard PIR9400 models are not compatible with Direct Duct kits.

PointWatch Model Q810 Duct Mount Enclosure

Part Number	Thread	PIR9400 Material	Ship Weight
006739-001	3/4 inch	AL	10 lb (4.5 kg)
000810-002	3/4 inch	SS	12 lb (5.5 kg)
000810-003**	3/4 inch	AL	10 lb (4.5 kg)
000810-004	M20	SS	12 lb (5.5 kg)

**Includes PIR99400 PointWatch precalibrated for acetone vapor detection.

Model Q810 Sample Tubes

Part Number	Tube Length	Ship Weight
000214-281	1 ft inlet	8 oz (0.23 kg)
000214-282	3 ft inlet	1 lb (0.45 kg)
000214-283	6 ft inlet	3 lb (1.35 kg)
000214-284	10 ft inlet	6 lb (2.4 kg)
000214-285	13 ft inlet	9 lb (4.0 kg)
000214-280	1 ft return	8 oz (0.23 kg)

All tubes are 304 stainless steel.

PointWatch Sample Draw Cup

Part Number	Compression Fitting	Material	Ship Weight
006629-002	X	AL	2 lb (0.95 kg)
006629-004	X	SS	4.7 lb (2.2 kg)

NOTE: PointWatch is not included. Field assembly and additional sampling system hardware required.

PIR9400 Miscellaneous Parts

Part Number	Description	Ship Weight
009170-001	PIR9400 Cover removal tool	8 oz (0.23 kg)
009192-001	Cover, cal port tethered, clear **	8 oz (0.23 kg)
006672-001	PIR9400 Calibration windshield bag	8 oz (0.23 kg)
006876-001	Hydrophobic Screen Kit	8 oz (0.23 kg)
006743-001	Threaded Cal Tubing Adapter (PIR9400A only)	8 oz (0.23 kg)
006680-001	Silicone grease (for PIR9400 threads only)	8 oz (0.23 kg)
006873-002	Plastic weather baffle, (PIR9400S)	8 oz (0.23 kg)
006548-004	Outer weather baffle only (alum)	8 oz (0.23 kg)
006506-004	Slip ring, 316SS	8 oz (0.23 kg)
006506-005	Slip ring, 316SS, Direct Duct	8 oz (0.23 kg)
102740-002	Calibration magnet*	8 oz (0.23 kg)
162552-002	Regulator, 2.5 LPM flow	8 oz (0.23 kg)
SP006412-001	PIRTB replacement terminal board	2 oz (0.09 kg)

*Calibration magnet is provided on the order with a PIR9400/U9500

** Replaces discontinued calibration cap p/n's 102823-001 and 103035-001

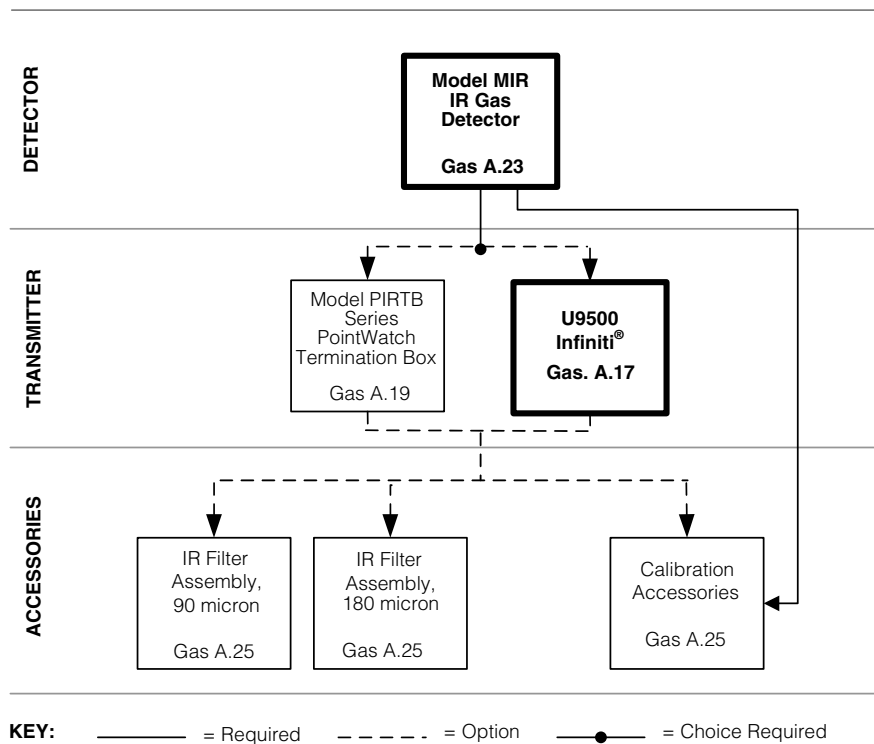

INFRARED

Model MIR MSHA Approved IR Gas Detector

Model MIR - MSHA Approved IR Gas Detector (Spec Sheet: 90-1196) is a diffusion based point-type infrared (IR) gas detector that provides continuous monitoring for hydrocarbon gases in underground mining applications. The gas detection system is approved by MSHA as permissible for use in gassy mines where increased levels of Methane exist (Approval No. 18-A070003-0).

- MSHA approved as a permissible gas detector system
- Responds appropriately to light hydrocarbons
- Transmitter display shows 0-5% methane by volume
- Minimum routine maintenance
- Longer service life than catalytic bead sensors
- Fail-safe operation

PIRDUCT IR Gas Monitor

The Model **PIRDUCT** DuctWatch (Spec Sheet: 90-1188) is an infrared (IR) based flammable gas monitoring solution designed for combustion turbine enclosure monitoring and similar air handling ductwork applications. The DuctWatch is easy to install and commission, and does not require expensive extractive sampling system hardware. Providing a full scale measurement range of 0 to 15% LFL (7500 ppm) methane vapor concentration, the DuctWatch delivers a new level of flammable hydrocarbon gas protection for high airflow environments. PIRDUCT is compatible for mounting on any flat mounting surface, and is provided with a solid mounting plate with seal gasket to prevent air leakage. Minimum internal duct width of 3 feet (1 meter) is required for proper instrument clearance and installation. Air movement is required for proper device performance.

PIRDUCT is available in the following configurations:

- Factory-fit with an aluminum 5-port Det-Tronics PIRTB wiring termination box
- Factory-fit with a Det-Tronics aluminum 2-port Eagle Quantum Premier DCU
- No junction box provided on type “5” models
- Fully compatible with FlexVu UD10 (sold separately), for display readout and calibration capabilities

PointWatch PIR9400, PointWatch Eclipse® and PIRDUCT Calibration Kits

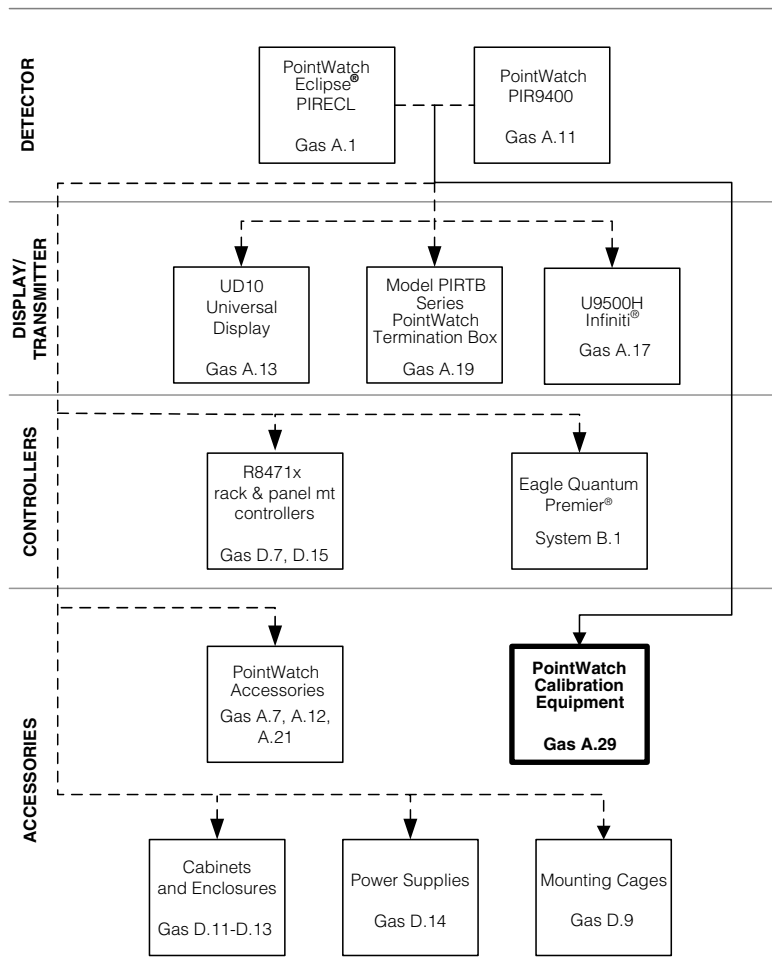

High accuracy compressed gas calibration kits provided for field calibration of all PointWatch IR detectors. Each kit includes:

- Two 3.6 ft³ (103 liters) cylinders of specified gas
- A 2.5 liter/minute regulator and pressure indicator
- 3-foot tube
- Sturdy plastic carrying case

The Windshield Calibration Bag enables calibration to be performed in high wind conditions. The bag is slipped over the gas detector and secured with a Velcro sealing strap. Gas is applied to the detector through a gas inlet nozzle on the end of the bag.

NOTE: PointWatch PIR9400, and PointWatch Eclipse each require their own unique calibration bag model (not included in Calibration Kit).

Open Path Eclipse OPECL Infrared Gas Detection System

The **Open Path Eclipse Infrared Gas Detection System** (Spec Sheet: 90-1159) is a stainless steel, IR beam-type hydrocarbon gas detection system. The system consists of two modules (transmitter and receiver) offering:

- Module separation distance range from 5-120 meters (optical aperture kit supplied with system is required for 5-30 meters)
- Dual xenon flashlamp technology for maximum performance in harsh environments
- Standard 4-20 mA output, HART communications (on receiver), RS485 Modbus
- Optional alarm relays (Ex d only)
- Compatible with FlexVu UD10 for full display capabilities
- Tri-color LEDs are provided on both modules for visual indication of operating status.
- Mounting hardware and pan-tilt brackets included with both modules
- Built-in locking adjusters deliver fine control of alignment angles
- Telescope alignment tool available
- Spare Xenon lamp module available
- Eagle Quantum Premier System-compatible version available
- Optional 475 field communicator unit for communication, diagnostic, and set up from point to point

PIRVOL Infrared Hydrocarbon Gas Process Monitor

PIRVOL Infrared Hydrocarbon Gas Process Monitor (Spec Sheet: 90-1137) is a point-type, infrared gas process monitor designed for use in extractive vapor sampling applications. All PIRVOL models provide a continuous 4-20 milliampere signal output that is proportional to a 0-90% for VR and 0-100% for LT and HV, by volume hydrocarbon vapor concentration. Each unit is provided with a sealed, aluminum vapor sampling enclosure fitted with brass compression tubing fittings (0.25 inch o.d. tubing) that are used to attach vapor sample stream inlet and exhaust lines. The PIRVOL-LT model is optimized for natural gas well-logging applications where accurate measurement of light hydrocarbon vapors such as methane and ethane is desired. The PIRVOL-VR model is optimized for gasoline vapor recovery applications where an accurate measurement of heavy hydrocarbon gases is required. The PIRVOL-HV model is optimized for natural gas well-logging applications where accurate measurement of heavy hydrocarbon vapors such as propane is desired.

NOTE: External vapor sampling conditioning and control equipment is generally required for proper operation of the PIRVOL gas monitors.

CATALYTIC

Combustible Gas Sensor (CGS)

Combustible Gas Sensor (CGS) (Spec Sheet: 90-1041). Stainless steel catalytic sensor that provides an accurate measurement of combustible gas concentration in the % LFL range. Requires FlexVu UD10, Model 505, U9500A or DCUJEX transmitter.

- Constant current or constant voltage options available
- Poison resistant construction
- 3/4" NPT or 20 mm thread option
- Wire lead options of 6" or 30"
- Sensor Separation Termination Box (STB) option available
- Variety of special accessories available
- FlexVu UD10 universal display provides full digital readout, calibration and user interface

KEY: ——— = Required - - - - = Option —●— = Choice Required

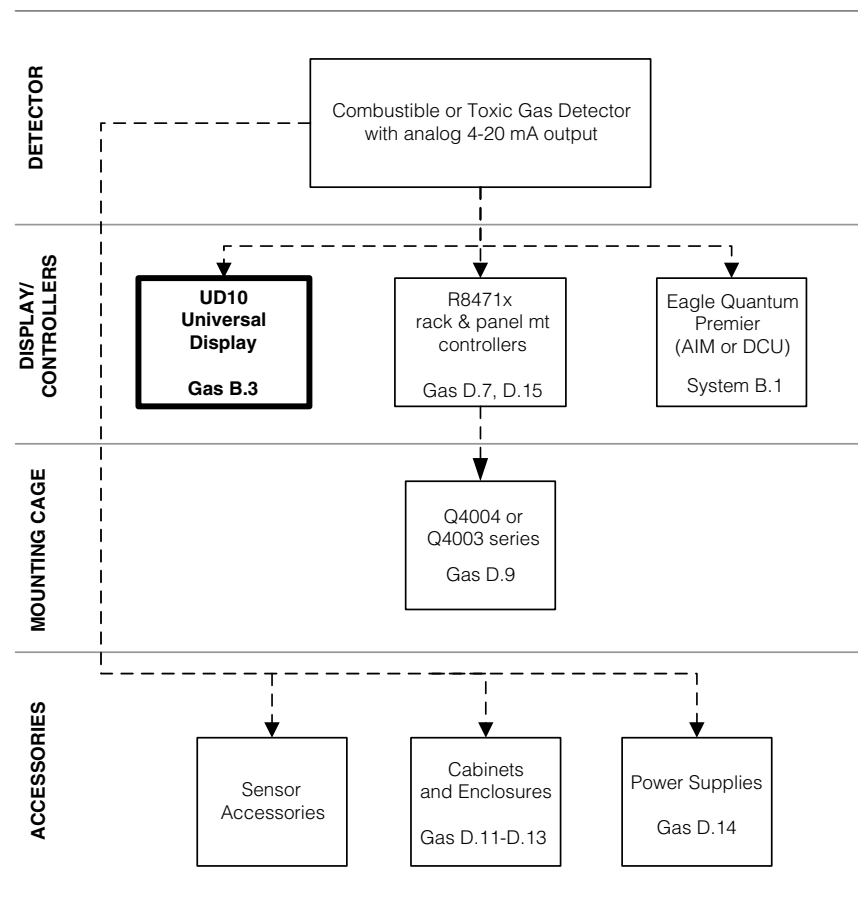

CATALYTIC

FlexVu UD10 Universal Display (for Catalytic)

FlexVu UD10 Universal Display (Spec Sheet: 90-1200) is recommended for applications where a gas detector with digital read-out of detected gas levels are required. The FlexVu UD10 Universal Display Unit is designed for use with Det-Tronics' catalytic gas sensor/transmitters such as Model 505 or CGS. The display unit is designed and approved as a 'stand alone' device and performs all the functions of a gas controller.

- Universal design supports a variety of Det-Tronics' sensors/detectors
- Continuously displays gas level, gas type, and units measured
- Heated backlit display
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- Relay, modbus, and linear isolated/non-isolated 4-20 mA output with HART

KEY: — = Required - - - = Option —●— = Choice Required

U9500A Infiniti Combustible Transmitters (sensor and junction box ordered separately)

U9500A Infiniti Combustible Transmitters (Manual: 95-8444). For use with CGS, the Infiniti provides an analog signal output and onboard readout of detected gas level. A number of optional features are also available.

- Linear isolated 4-20 mA output
- Eight character LCD display
- Non-intrusive automatic calibration
- Sensor sensitivity check
- Base version provides analog output only
- Optional relay package (three alarm, one fault)
- Extensive fault diagnostics
- Sensor separation capability
- Optional reset/calibration pushbutton is preinstalled on some junction boxes (recommended where magnets are not preferred)

Model 505 Combustible Transmitter (includes junction box, sensor ordered separately)

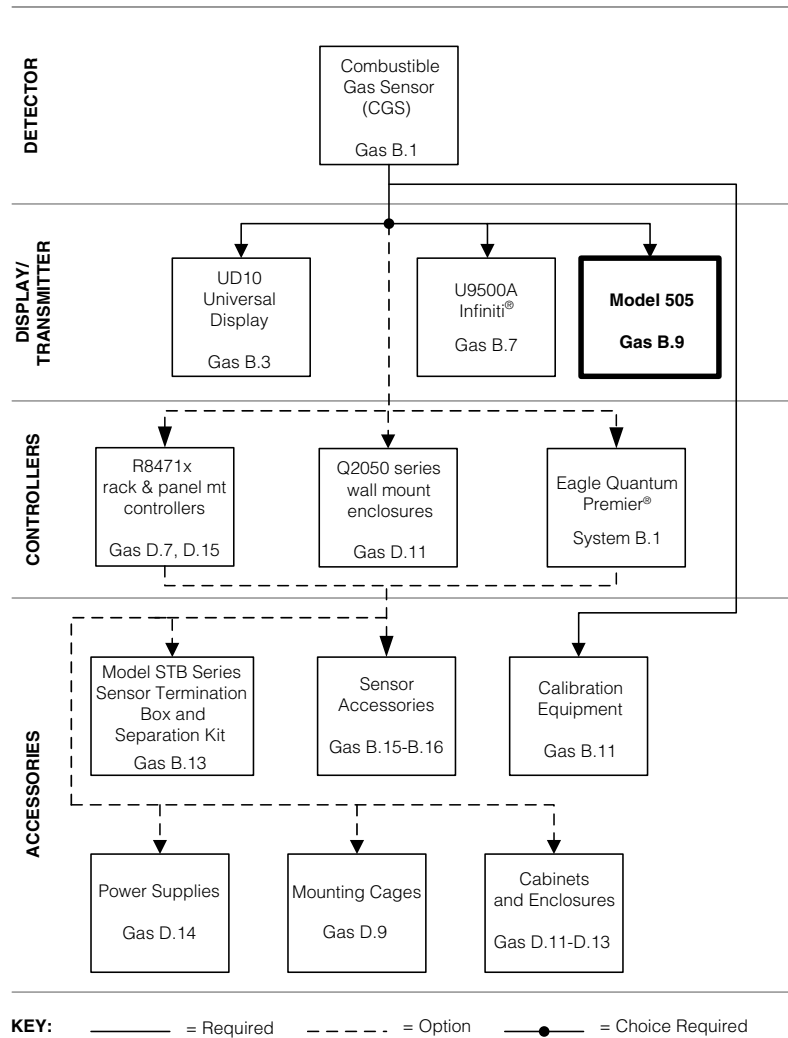

Model 505 Combustible Transmitter (Spec Sheet: 90-1114). Designed for use with CGS sensor, the 505 provides an analog signal output representing detected gas concentration. The 505 is always used with a gas controller, PLC or similar analog input signal receiver.

- 4-20 mA output
- Sensor sensitivity check function
- One person calibration
- Includes a variety of j-box options

Model 505 Retrofit Kits are available to upgrade an existing K-Series or Model 500 transmitter to the Model 505 transmitter using existing junction boxes and field wiring. The kit consists of:

- A transmitter board
- A label with calibration instructions for the junction box cover
- Instruction manual
- Junction box not included.

Combustible Gas Calibration Kits

Combustible Gas Calibration Kits (Spec Sheet: 90-1059) for combustible gas sensors. Kits include sturdy plastic carrying case containing:

- Two 3.6 ft³ (103 liters) cylinders of specified compressed gas
- Regulator/shutoff valve with gauge, 3-foot tubing and stainless steel CGS calibration cup
- Regulator provides fixed flow rate of 1 liter per minute designed for CGS sensors

Model STB Series Sensor Termination Box and Separation Kit

Model STB Series Sensor Termination Box and Separation Kit includes a junction box, proper connector board required hardware.

- Enables remote installation of sensor for optimum gas detection while offering easy calibration access to transmitter
- One sensor separation kit per sensor is required
- Optional remote calibration cups must be ordered separately (see CGS Accessories)
- Model 505 Transmitter Sensor separation wiring terminal block (part number 102883-001) is sold separately

CATALYTIC

Duct Mount and Sample Draw Assemblies for CGS

Direct Duct Mount Assembly (Spec Sheet: 90-1046). For mounting combustible sensors to air handling duct work. The Direct Duct Mount CGS assembly enables combustible gas detection in air handling, heating, ventilating, and air conditioning ducts. Designed for flat surface mounting only.

- Seal gaskets provided to prevent leakage
- Circular duct wall cutout required
- Positive pressure ducts only
- Calibration gas inlet enables in-situ calibration
- Flexible conduit/cabling recommended to enable sensor removal from assembly

Combustible Model Q811 Duct Mount Enclosure (Manual: 95-8459)

The Q811 provides combustible gas detection in air handling, heating, ventilating, and air conditioning ducts.

- Designed for flat surface mounting only
- Stainless steel NEMA 4X enclosure
- Includes catalytic bead sensor
- 316 Stainless steel sample inlet tube spans the duct's cross section
- 1 foot tube returns the sample
- Requires a 600–4000 fpm velocity

Sample Draw Cup Assembly for CGS

The Sample Draw cup assembly for CGS provides a sealed enclosure with compression fittings to enable the CGS to be used as part of an extractive gas sampling system.

- Aluminum enclosure with seals provides airtight flow chamber
- Brass compression fittings accept 1/4" OD tubing
- Threaded cover enables sensor removal
- Sampling system hardware required for proper operation

Part Number	Material	Ship Weight
000811-101	SS	10 lb (4.5 kg)

1 inlet and 1 return tube included at no extra cost. Specify length of inlet tube at time of order (1, 3, 6, 10 or 13 ft). Includes preinstalled CGS catalytic sensor. **Does not include transmitter.**

Model Q811 Sample Tubes

Part Number	Material	Ship Weight	Length
000214-281	316 SS	8 oz (0.23 kg)	1 ft
000214-282	316 SS	1 lb (0.45 kg)	3 ft
000214-283	316 SS	3 lb (1.35 kg)	6 ft
000214-284	316 SS	6 lb (2.4 kg)	10 ft
000214-285	316 SS	9 lb (4.0 kg)	13 ft
000214-280*	316 SS	8 oz (0.23 kg)	1 ft

*Return tube.

Sample Draw Cup Assembly for CGS

Part Number	Material	Ship Weight
009171-001	AL	1 lb (0.45 kg)

CGS Accessories: Rain Shields, Splash Guards, Dust Covers, Remote Calibration Cups

Rain Shields (Spec Sheet: 90-1046) protect combustible sensors from rain and snow.

Splash Guards (Spec Sheet: 90-1046) protect combustible sensors from ingress due to rain or splashing water.

Dust Covers (Spec Sheet: 90-1046) protect sensors against dust, oil, and high wind environments. Porex and stainless steel filters available.

Remote Calibration cups provide the means to apply calibration to a CGS gas sensor from a remote location. Tubing not included. Options include barbed fitting or 1/4" compression fitting.

NOTE: Only one accessory recommended to be fitted per catalytic sensor.

*Porex not recommended for outdoors or temperatures above 75 degrees Celsius.

TOXICS

GTS Toxic Gas Sensor Module (GT3000 Series)

GTS Toxic Gas Sensor Module (Spec Sheet: 90-1199) housings are incorporated into the GTX toxic gas transmitter, the electrochemical cell is embedded in the module.

- Sensor modules are available in a variety of gas types and concentration ranges
- Hot swappable capabilities with the GTX transmitter
- Easy install and removal with the GTX transmitter
- Intrinsically safe (IS) design
- IP66 rated

GTX Toxic Gas Transmitter (GT3000 Series)

GTX Toxic Gas Transmitter (Spec Sheet: 90-1199). Stainless steel, toxic gas transmitter that provides an accurate measurement of toxic gasses.

- Stainless Steel
- Approved as a stand alone device when combined with a GTS toxic gas sensor
- 4-20 mA output with HART
- Intrinsically safe (IS) or explosion proof design
- IP66 rated

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

NTM Nanotechnology MOS H2S Gas Detector

Model NTM Nanotechnology MOS H2S Gas Detector (Spec Sheet: 90-1195). Stainless steel, nanotechnology MOS detector that provides an accurate measurement of Hydrogen Sulfide (H2S) gas.

- 4-20 mA output
- Approved as a stand alone detector
- Performance approved to ANSI/ISA 92.0.01
- Fast speed of response – T50 < 5 seconds
- Use with FlexVu UD10 Universal Display, GDTB, U9500, or EQ2200DCU for use with EQP
- IP63 rated

Gas Detector Termination Box (GDTB)

Gas Detector Termination Box (Manual: 95-8644-2.1). Recommended for installations where an approved stand-alone 4-20 mA sensor is not connected directly to a transmitter/control device. The GDTB is a circuit board with the required connectors for proper field wiring.

- Use for stand-alone NTMOS applications
- Provides remote calibration capability
- Required for remote separation from FlexVu UD10, U9500 Infiniti or R8471B
- Magnetic reed switch calibration and LED gives calibration feedback
- Tall and short cover models are available

C706X Sensor/Transmitter

C706X Sensor/Transmitter (Spec Sheet: 90-1079) housing. Two-wire, stainless steel or aluminum toxic gas detector with 3/4" NPT or 20 mm threads. Purchase EC cell separately for monitoring H₂S, O₂, CL₂, CO and SO₂ toxic gases.

- 4-20 mA output is proportional to EC cell measurement range
- Electrochemical cell sold separately
- For use with:
 - FlexVu UD10 Universal Display
 - U9500 Infiniti Transmitter
 - R8471X Toxic Controller
 - STB Sensor Termination Box
 - DCU Digital Communication Unit
- Optional measurement ranges available for H₂S and CO versions
- Hydrophobic filter provided on C7064 housings

KEY: — = Required - - - = Option —●— = Choice Required

TOXICS

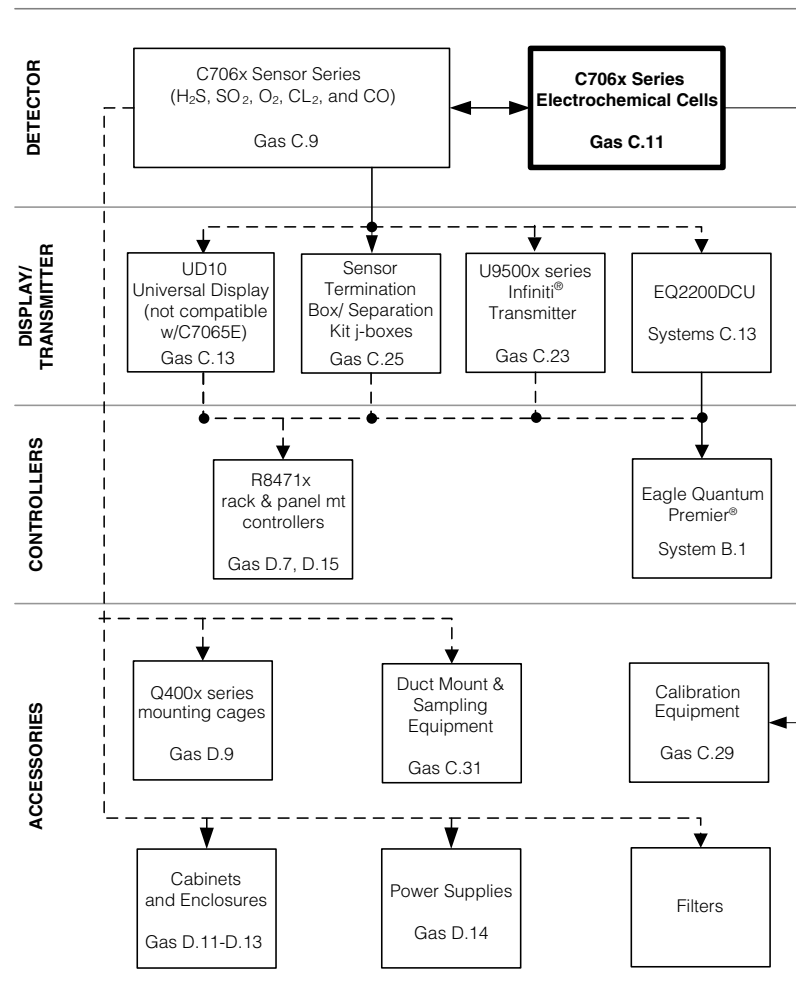

Electrochemical Sensor Cells for use with Model C706x housings

Electrochemical sensor cells are provided for use with the C706X (Spec Sheet: 90-1079) gas detector housings. Be sure to use the proper electrochemical sensor cell with the proper model C706x housing.

NOTE: Carbon monoxide sensors are available in three ranges—be sure to use proper CO cell with the matching C7066 housing.

All sensors are shipped in a sealed bag. Store in a cool, dry place until installation/ commissioning is required.

KEY: — = Required - - - = Option ● = Choice Required

TOXICS

FlexVu UD10 Universal Display (for Toxics)

FlexVu UD10 Universal Display (Spec Sheet: 90-1200) is recommended for applications where a gas detector with digital read-out of detected gas levels are required. The FlexVu UD10 Universal Display Unit is designed for use with Det-Tronics' toxic gas sensor/transmitters such as GT3000, NTMOS or C706x. The display unit is designed and approved as a 'stand alone' device and performs all the functions of a gas controller.

- Universal design supports a variety of Det-Tronics' sensors/detectors
- Continuously displays gas level, gas type, and units measured
- Heated backlit display
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- Relay, modbus, and linear isolated/non-isolated 4-20 mA output with HART
- IP66 rated

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

KEY: — = Required - - - - = Option —●— = Choice Required

TOXICS

GTD Toxic Gas Detector Assembly (GT3000 Series Toxic Gas Transmitter with FlexVu Universal Display or Separation J-Box)

GTD Toxic Gas Detector Assembly incorporates a GT3000 series toxic transmitter (GTX) with a FlexVu universal display (UD) or junction box (STB). The GTS toxic gas sensor module is sold separately.

- Non-intrusive automatic calibration
- Non-intrusive menu system
- Linear 4-20 mA output with HART
- Intrinsically safe or explosion proof designs
- Optional relay and RS485 package
- IP66 rated

KEY: — = Required - - - = Option —●— = Choice Required

TOXICS

U9500 Infiniti Transmitter

U9500 Infiniti Transmitter (Spec Sheet: 90-1099). For use with a single NTMOS or C706x electrochemical toxic gas detector.

- Linear isolated 4-20 mA output
- Eight character LCD display
- Non-intrusive automatic calibration
- Easy push button configuration
- Base version provides analog output only
- Optional relay package (three alarm, one fault)
- Extensive fault diagnostics
- Stainless steel or aluminum junction box option
- Optional reset/calibration pushbutton is preinstalled on some junction boxes (recommended where magnets are not preferred)

KEY: — = Required - - - = Option —●— = Choice Required

Model STB Series Sensor Termination Box and Separation Kit

Model STB Series Sensor Termination Box and Separation Kit includes a junction box, proper connector board, required hardware to enable proper mounting, and wiring of model GT3000 and C706x series detectors, or any 4-20 mA device.

- Enables remote installation of sensor for optimum gas detection while offering easy calibration access to FlexVu UD10 or U9500 Infiniti
- One Sensor Termination Box per sensor is required

GT3000 Calibration Kits

GT3000 Calibration Kit (Manual: 95-8643) consists of a sturdy carrying case containing:

- Two cylinders of specified gas
- A 1 liter/minute regulator and pressure indicator
- Three-foot tubing
- GT3000 Calibration Cup

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

TOXICS

Duct Mount and Sample Draw Adapters for Toxic Gas Detectors

C706X Series Duct Mount Adapter

- Enables monitoring of toxic gases within air handling systems while maintaining easy sensor access
- Recommended for use on positive pressure ductwork with homogenous air mix conditions (nonstratified)
- Use of flexible cabling recommended to enable sensor removal

Model Q812 Duct Mount Enclosure Series (Manual: 95-8459) Provides detection in environments involving air handling, heating, ventilating, or air conditioning ducts.

- Mounts to a flat duct wall surface
- A stainless steel tube spans the cross section of the duct; a one-ft tube returns the sample
- Allows large volume, continuous air sampling
- Requires 600-4000 fpm velocity for adequate differential pressure
- Stainless steel NEMA 4X enclosure
- Compatible with C706X sensors and NTMOS Detectors

C706X Series Sample Draw System Adapters

Adapter enables C706x sensors to function within gas sample extraction systems

- Stainless steel sampling system adapter
- Air-tight interface via seal O-ring eliminates gas sample leakage
- Includes inlet and outlet compression fittings for 0.25 inch outside diameter tubing

C706X Housing Duct Mount Adapters

Part Number	Use With	Ship Weight
226846-006	C7066, C7067, C7068, C7069	6 oz (0.17 kg)
226846-002	C7064C, C7064E	6 oz (0.17 kg)

NOTE: Not recommended for stratified or laminar air flow patterns.

Model Q812 Duct Mount Enclosure Series

Part Number*	Gas type and sensor	Material	Tube Length	Gas Measurement Range	Ship Weight
000812-001	C7064E-H2S	SS	**	0-100 ppm	10.5 lb (4.8 kg)
000812-005	C7064E-H2S	SS	**	0-50 ppm	10.5 lb (4.8 kg)
000812-003	C7066E-CO	SS	**	0-100 ppm	10.5 lb (4.8 kg)
000812-004	C7068E-SO2	SS	**	0-100 ppm	10.5 lb (4.8 kg)
000812-051	NTM1A10W	SS	**	0-100 ppm	10.5 lb (4.8 kg)

*Price includes preinstalled electrochem gas detector as noted.

**One inlet tube (000214-XXX) and one return tube (000214-130) at no extra cost, customer must specify desired inlet tube length at order entry.

Model Q812 Sample Tubes

Part Number	Material	Ship Weight	Length
000214-281	316 SS	8 oz (0.23 kg)	1 ft
000214-282	316 SS	1 lb (0.45 kg)	3 ft
000214-283	316 SS	3 lb (1.35 kg)	6 ft
000214-284	316 SS	6 lb (2.4 kg)	10 ft
000214-285	316 SS	9 lb (4.0 kg)	13 ft
000214-280*	316 SS	8 oz (0.23 kg)	1 ft

*Return tube

Sample Draw System Adapters – C706X Only

Part Number*	Material	Ship Weight
006517-001	SS	2.5 lb (1.28 kg)
006517-002	AL	1 lb (0.46 kg)

NOTE: Peripheral sampling system equipment required for proper operation

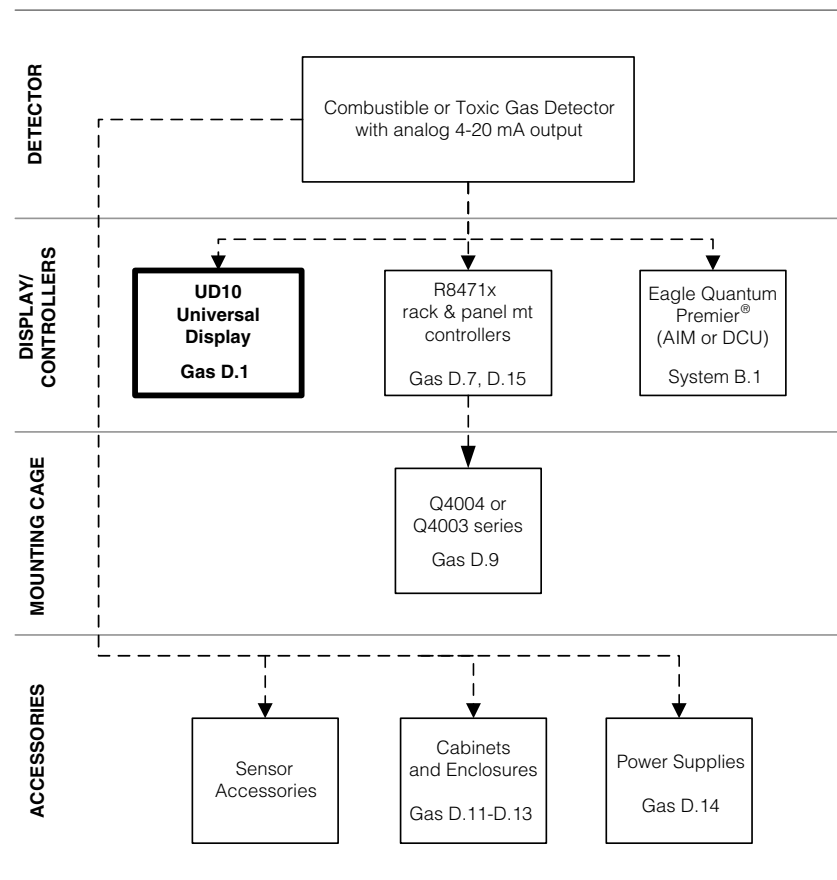

DISPLAYS AND CONTROLLERS

FlexVu UD10 Universal Display

FlexVu UD10 Universal Display (Spec Sheet: 90-1200) is recommended for applications where a gas detector with digital read-out of detected gas levels are required. The FlexVu UD10 Universal Display Unit is designed for use with Det-Tronics' gas sensor/transmitters. The display unit is designed and approved as a 'stand alone' device and performs all the functions of a gas controller.

- Universal design supports a variety of Det-Tronics' sensors/detectors
- Continuously displays gas level, gas type, and units measured
- Heated backlit display
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- Relay, modbus, and linear isolated/non-isolated 4-20 mA output with HART
- IP66 rated

KEY: ——— = Required - - - - - = Option —●— = Choice Required

DISPLAYS AND CONTROLLERS

FlexVu UD20 Universal Display

FlexVu UD20 Universal Display (Spec Sheet: 90-1201 - Explosion Proof Model, 90-1205 - Intrinsically Safe Model) supports the GT3000 Series toxic gas detectors.

- LCD display
- Non-intrusive automatic calibration
- Non-intrusive menu system
- Linear 4-20 mA output with HART
- Intrinsically safe and explosion proof design
- IP66 rated

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

DISPLAYS AND CONTROLLERS

R8471 Series Single Channel Rack-Mounted Gas Controllers

Features include:

- Analog 4-20 mA signal input receiver
- Digital and bar graph displays indicate detected gas level
- Individual low, high, auxiliary, and fault alarm outputs are field programmable
- Standard model offers open collector outputs only
- Premium model offers 4-20 mA output and 4 relay output package
- All support remote calibration capability
- Compatible with Det-Tronics' gas detector's transmitters
- Two controller height options: 4U (7") standard height, 3U (5.2") short height
- Two mounting cage options: 4U (7") standard height, 3U (5.2") short height
- Offered factory-installed in Q2050 enclosure
- Panel Mount versions available

DISPLAYS AND CONTROLLERS

Mounting Cages: Q4003 and Q4004

Q4004 Universal Mounting Cage for use with 4U-height (7") R8471 gas controllers. Also supports R74xx and R60xx flame detection cards. Same size as previous Q4001 rack used with R73xx controllers.

Q4003 Universal Mounting Cage for use with 3U-height (5.2") R8471 gas controllers.

DISPLAYS AND CONTROLLERS

Q2050 Series Wall Mount Enclosures

The Q205x series (Spec Sheet: 90-1075) are factory-built and tested NEMA 4X fiberglass enclosures with preinstalled R8471 gas controllers.

- Holds up to six channels of panel-mounted R8471 gas controllers
- Controllers are packed in two-controller assemblies
- Full view polycarbonate window with latching door
- Any combination of combustible or toxic controllers may be selected for installation
- Easy access terminal strip for controller wiring
- Field wiring terminal strip for units with power supplies is standard
- Virtual plug and play installation
- Optional factory-fit strobe warning lights, audible horns, and reset pushbuttons quoted upon request

DISPLAYS AND CONTROLLERS

Q1020A Wall Mount Enclosure

The **Q1020** (Manual: 95-8350) is a three-compartment, painted metal enclosure with preinstalled 19 inch Q4004 mounting cage and termination strip factory-wired and tested for easy installation. Additional equipment such as power supply or extra items (external relays, sounders, lights, etc.) may limit maximum controller capacity. Consult factory with specific requirements.

- Each Q1020 will hold a maximum of 16 or 32 R8471 series controllers
- Prewired internal power distribution including fuse protection
- Provides protection against dust and water spray; rated IP55 for indoor applications
- Locking door with full clear viewing window
- Each Q1020 provided with a standard electrical and standard mechanical design drawing

NOTES: Standard preinstallation service includes installation, wiring, and testing of controller backplates only. Any additional hardware cabling, additional drawings, and engineering provided at standard project engineering rates and will be quoted separately.

Q1020 list price does not include R8471 gas controllers.

Q1020A Wall Mount Enclosures

Model	Part Number	Dimensions	Use With	Ship Weight
Q1020A1001	000803-001	13" x 24" x 21"	up to (16) R8471 gas controllers	80 lb (36 kg)
Q1020A2001	000803-002	26" x 24" x 21"	up to (32) R8471 gas controllers	160 lb (72 kg)

DISPLAYS AND CONTROLLERS

Power Supplies

000507-005 and 000507-006 24 Vdc Power Supplies (Spec Sheet: 90-1035)

Ideally suited for Q1020 Wall Mount enclosures or other enclosures that contain Det-Tronics' gas detection equipment.

- Open frame construction
- Operates on 120/240 Vac 50/60 Hz

000604-012 Wall Mount Enclosure with 000507-006 Power Supply (24 Vdc) mounted inside

- For indoor use only
- Fused terminal strip provided for field wiring
- 24 Vdc at 12 amps power supply included

24 Vdc Power Supplies

000507 Series Open Frame Power Supplies

Part Number	Max Amperes	Ship Weight
000507-005	3.6	6.5 lb (2.95 kg)
000507-006	12	15 lbs (6.8 kg)

000604-012 Wall Mount Enclosure with 000507-006 Power Supply installed

Part Number	Housing	Ship Weight
000604-012	Aluminum, NEMA 1	6.5 lb (2.95 kg)

DISPLAYS AND CONTROLLERS

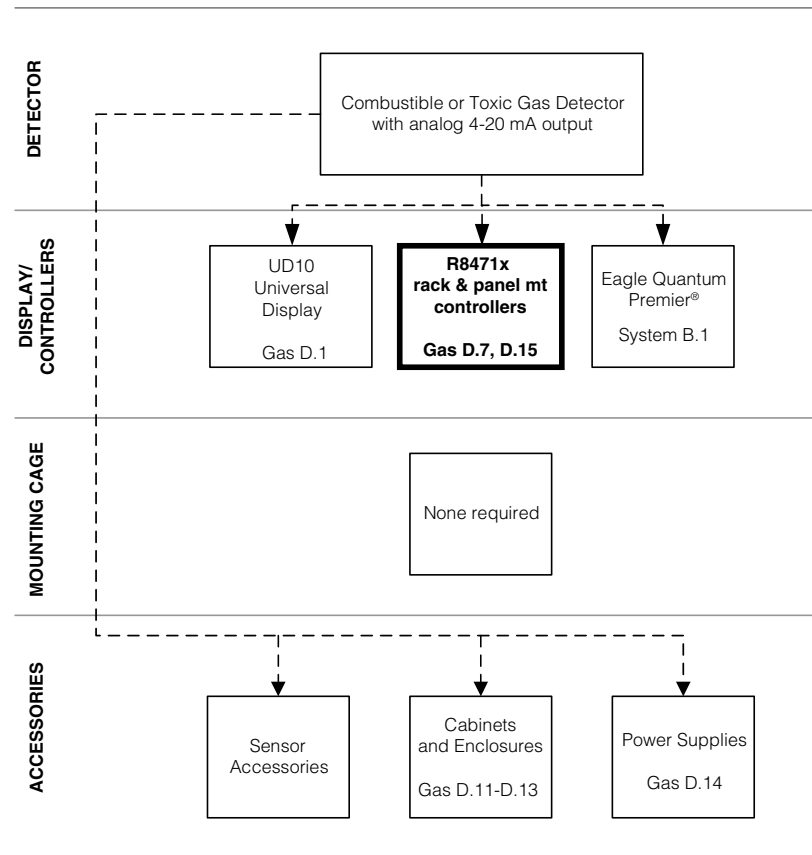

Panel Mount R8471 Controller Assembly

Panel Mount R8471 Controller Assembly

Each assembly consists of either one or two standard R8471 controllers modified for flat-panel mounting. Typical use includes installation within wall-mount enclosures such as the Q2050 series wall-mount fiberglass enclosure series.

- Controller faceplates and field wiring termination strips rotated outward for easy wiring and operator interface
- Standoffs used for mounting the assembly to a flat panel
- Operation and calibration identical to standard R8471 controller series
- No mounting cage required
- Four panel-mount controller configurations available:
 - 006631-xxx series for single-controller assembly field upgrades (one channel to two channels)
 - 006632-xxx series for new single-controller assembly requirements
 - 006633-xxx series for complete, two-controller assembly requirements
 - 007000-xxx series for spare controller board only requirements

OVERVIEW

Eagle Quantum Premier® System

The Eagle Quantum Premier System (EQP) (Spec Sheet 90-1150) combines “fire detection and extinguishing agent release” and “hazardous gas monitoring” in one complete package. The system is intended for use in hazardous locations and is designed to meet the requirements of approval agencies from around the world.

The system consists of a controller and a number of addressable microprocessor-based field devices. The controller coordinates system device configuration, monitoring, annunciation, and control, while the field devices communicate their status and alarm conditions to the controller.

The controller communicates with the field devices through a digital communications link referred to as the LON communications loop. As the name infers, the network topology is laid out as a loop that begins and ends at the controller. All of the field devices are connected into the communication loop. The communication loop is a specialized design to meet the requirements of a Signaling Line Circuit (SLC).

The LON communication loop offers several key advantages:

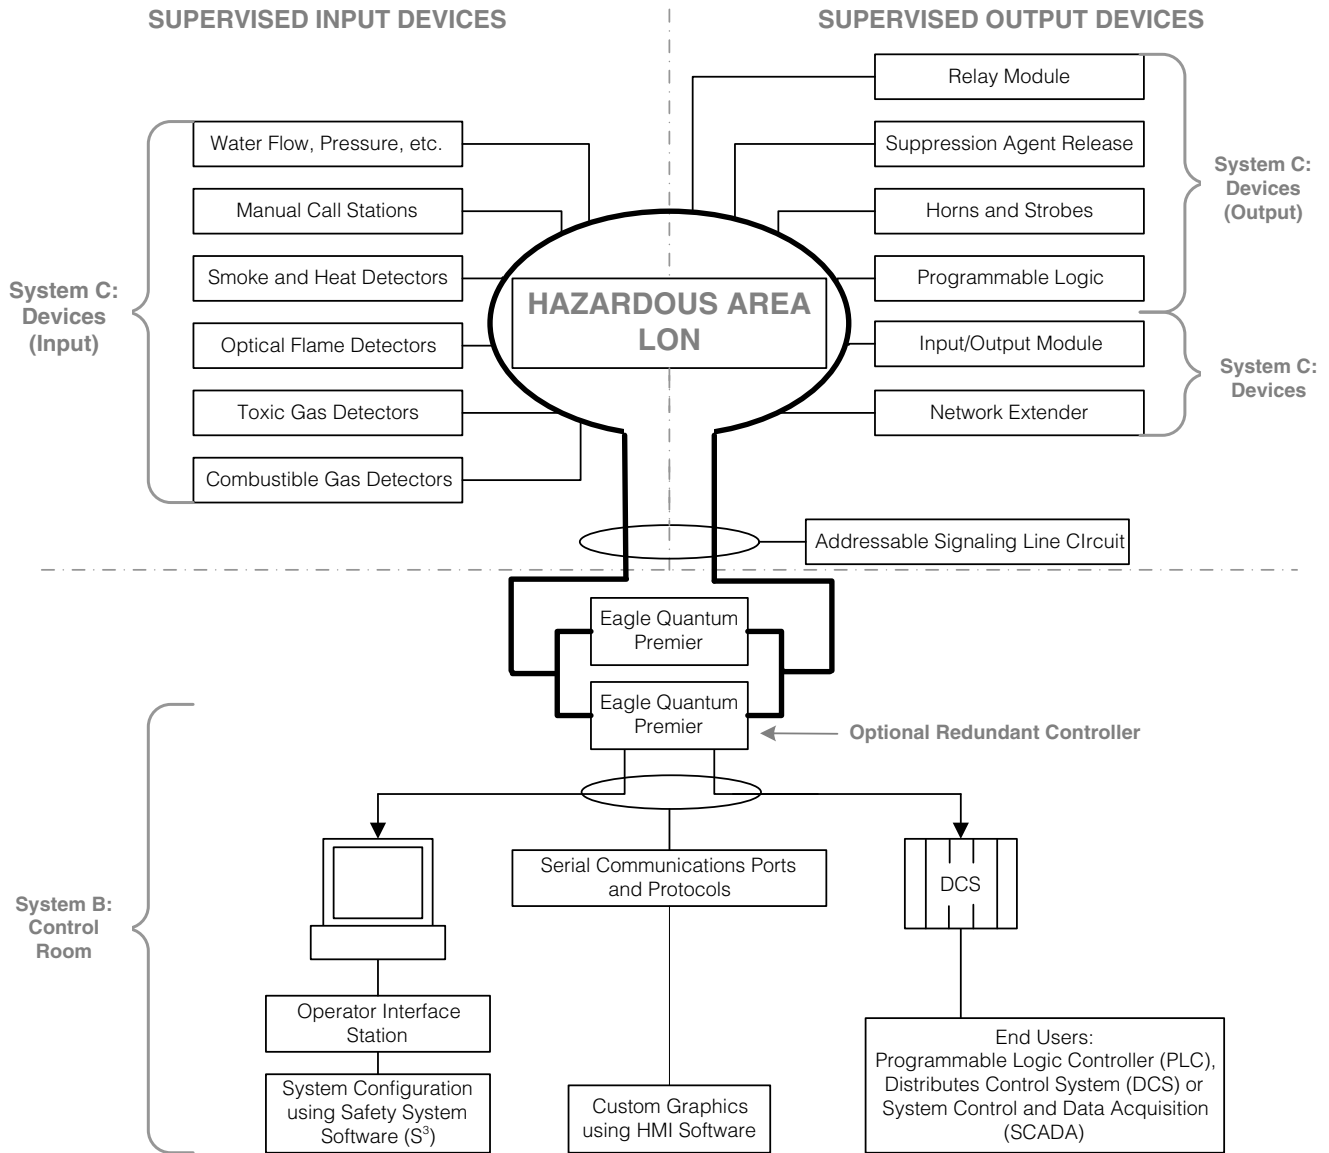

- ANSI/NFPA Class A, Style 7 performance of SLC
- Peer-to-peer communications
- Expandability

The controller continuously executes the user logic programs that are programmed into the controller. The user logic programs are set up in the same fashion as IEC 61131-3 programmable logic programmed into programmable logic controllers (PLCs). Function block diagram logic gates are tied together with inputs, outputs, and other logic gates to perform a specific task. A number of tasks can be tied together to perform a system function.

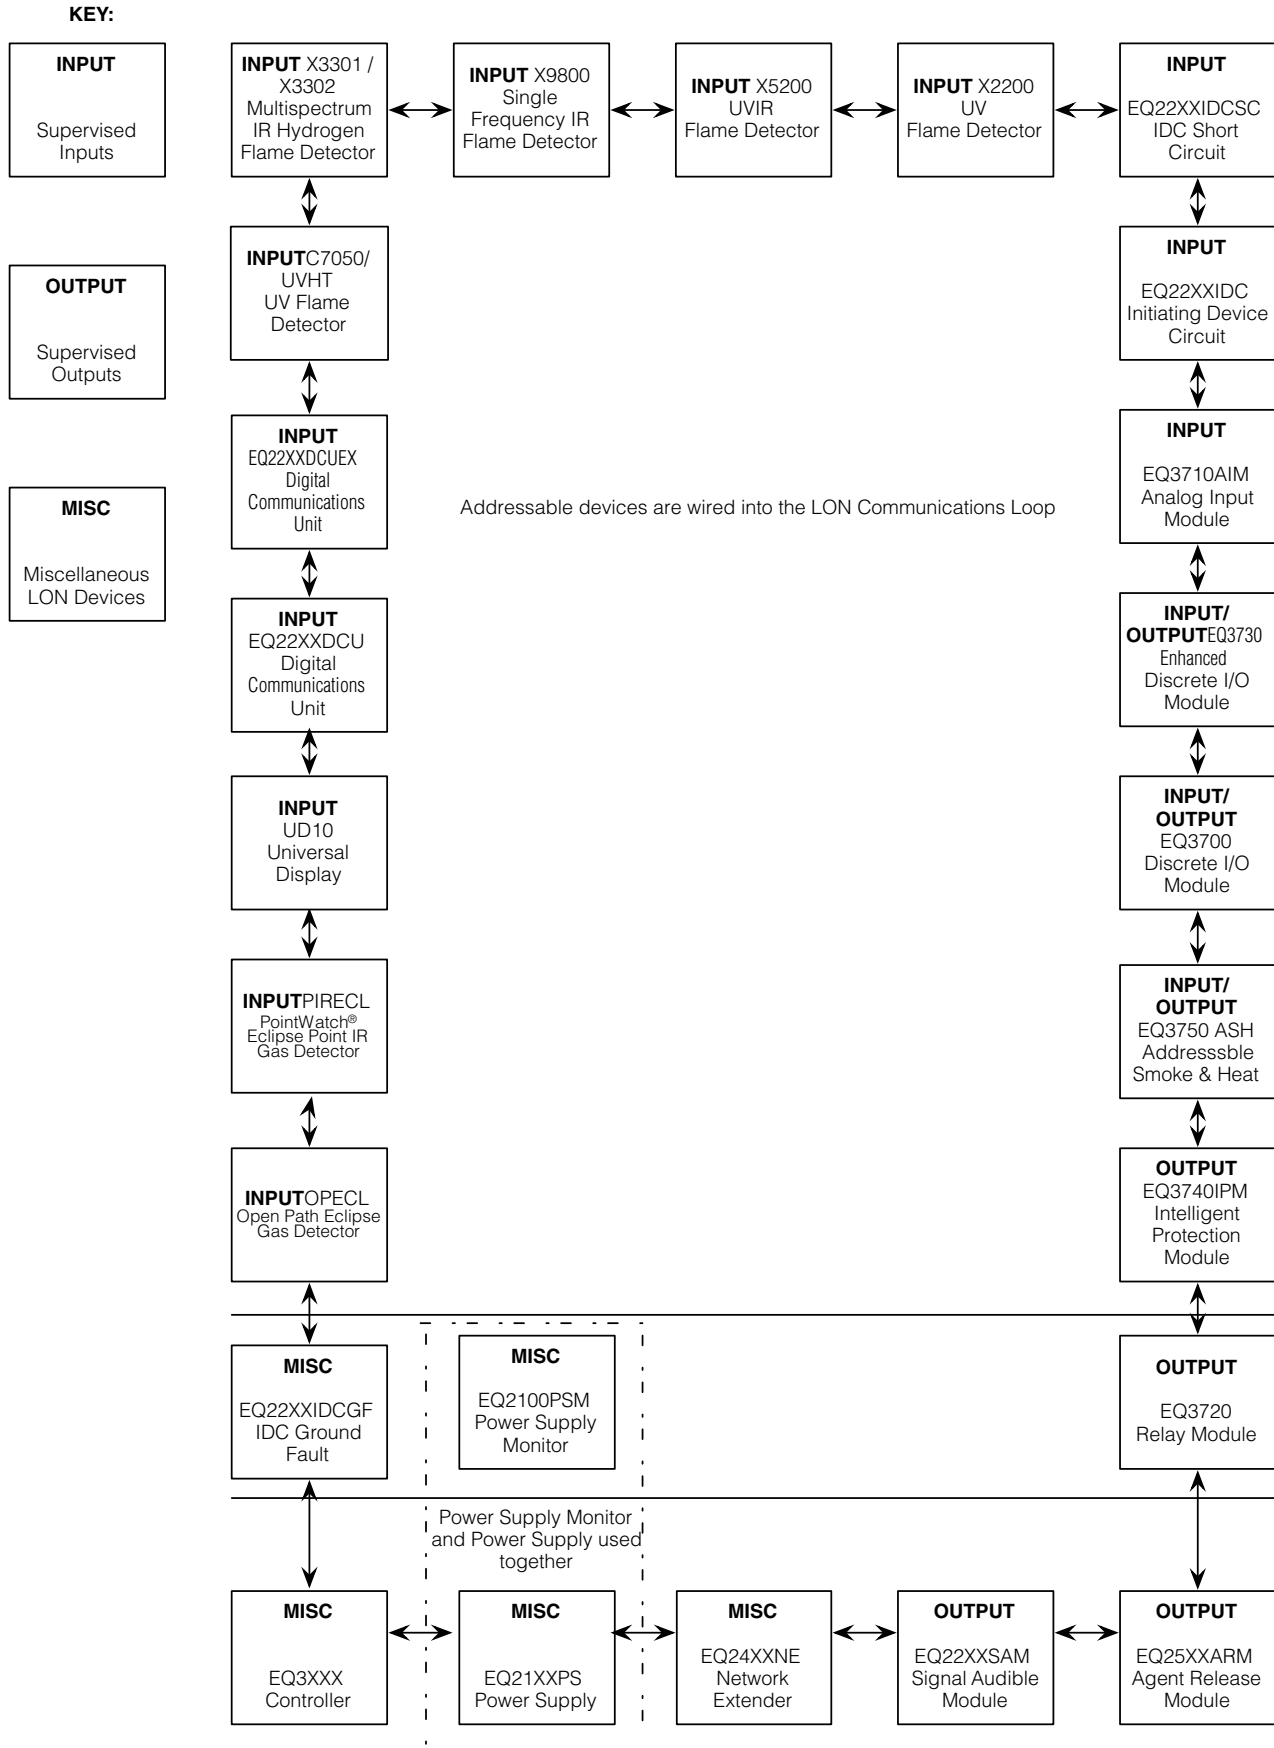

Typical programmed functions include flame/gas voting, timing delays, timing executions, latching conditions, alarm and trouble notification, suppression control, condition control, and process shutdown notification.

For complete system integration, the controller has the capability to communicate with other systems such as PLCs, distributed control systems (DCSs), and Supervisory Control and Data Acquisition (SCADA). Different communication protocols are supported, allowing the controller to communicate with other systems either directly or through communication gateways. The System Safety Software (S³) package supports an OPC server option that can publish system information to OPC clients.

- Simplex and redundant operation
- Deluge and pre-action release capability for fire suppression
- Agent release capability for fire suppression
- Supports up to 246 addressable field devices
- Fault-tolerant LON communication loop
- Up to 32,800 feet (10,000 meters) of LON network communication wire
- Eagle Quantum Premier LON version of Det-Tronics' flame and gas detectors
- Support for integrating third-party detectors (4-20 mA, “dry contact” type outputs or two wire smoke detectors) into EQP system
- Field devices have nonvolatile memory for alarm and calibration logging
- System and field device built-in system diagnostics
- IEC 61131-3 programmable logic
- Up to four Modbus RTU communication ports available
- ControlNet optional communication card (supports redundant communication channels)
- FM Approved to ANSI/NFPA-72-1999 National Fire Alarm Code
- FM, CSA, ATEX/CE
- Certified SIL-2 capable version available
- US Coast Guard type approval under 46 CFR 161.002.
- FM approved Proprietary Supervising Station System, defined in NFPA 72 2002

OVERVIEW

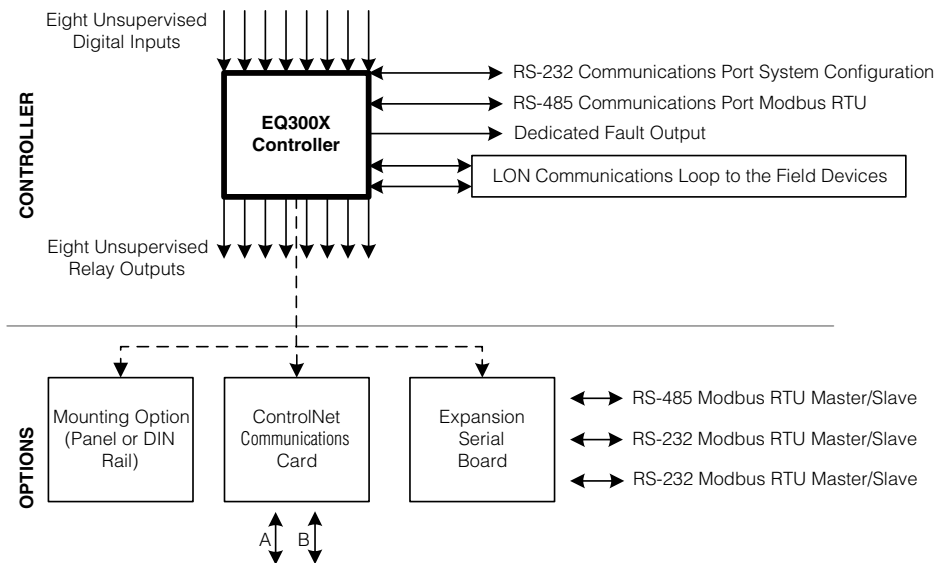

CONTROL ROOM

Eagle Quantum Premier Controller • EQ3001

Eagle Quantum Premier Controller EQ3001 (Spec Sheet: 90-1148) The Eagle Quantum Premier Controller is a microprocessor-based module that performs all the communication and control functions for the system. The controller can be configured in a simplex or redundant mode of operation. It includes all the required operator interface controls for a fire alarm and releasing system.

- Fire detection and alarm
- Fire suppression control
- Gas detection and alarm
- Simplex or redundant operation
- Models with SIL 2 certification
- Programmable logic
- Multiple serial ports (three RS-232 and two RS-485)
- Transformer isolation of network ports
- Utilizes Modbus RTU or Allen Bradley protocols
- ControlNet Interface (Optional)
- Eight Programmable Relay Outputs
- Dedicated Fault Output
- Eight Digital Inputs
- Four-line, 20-character alphanumeric display
- LED status indicators
- Fault-tolerant communication loop
- Extensive built-in diagnostics
- Real-time clock
- Compact design
- US Coast Guard type approval under 46 CFR 161.002.
- Lloyd's Register Type Approval.
- FM approved Proprietary Supervising Station System, defined in NFPA 72 2002

Power Supplies

EQP2120PS(-B) Power Supplies are used in pairs where the primary source of input supply is connected to one and the secondary source is connected to the other. A maximum of eight power supplies operated in parallel can be connected to each input supply. Both the primary and secondary sets must be individually capable of operating the system without the other supply. The secondary source is required to be continuously powered.

Power Supply. Six approved power supply options are available:

- 10 Amp / 60HZ (EQ2110PS)*
- 30 Amp / 60HZ (EQ2130PS)*
- 75 Amp / 60HZ (EQ2175PS)*
- 10 Amp / 50HZ (EQ2111PS)*
- 30 Amp / 50HZ (EQ2131PS)*
- 75 Amp / 50HZ (EQ2176PS)*

Contact the factory for additional options and current certifications
 *Requires the use of the DEC Power Supply Monitor, detailed below.

EQ2100PSM Power Supply Monitor (Spec Sheet: 90-1134) is used in conjunction with any of the above power supplies and backup batteries to provide an approved source of power for the Eagle Quantum Premier system. Since the power supply monitor resides on the communication loop (LON), any trouble condition related to system power will immediately be reported to the Operator Interface Station through the Local Control Unit. Status conditions being monitored include power supply failure, loss of AC power, loss of battery power, power ground fault, AC voltage, DC voltage, and battery changing current levels.

- Supports ANSI/NFPA 72 Class A, Style 7 communication
- Monitors primary AC supply and battery integrity
- Compatible with 10, 30 and 75 amp output power supplies
- Field addressable
- FMRC approved and CSA Certified for use in Eagle Quantum
- Feet for panel mounting

Ground Fault Monitor IDCGF (Spec Sheet: 90-1134). The Initiating Device Circuit Ground Fault module monitors the Eagle Quantum Premier system for ground faults and provides one supervised digital input for detection of power supply trouble. It is intended for use with a third-party power supply that supplies a dry contact output for indicating a trouble condition. This module is housed in an explosion-proof NEMA 4X rated metal enclosure for installation in hazardous locations and can be located at any point on the communication loop.

EQ2220GFM Ground Fault Monitor (Spec Sheet: 90-1134) provides ground fault monitoring in a system that includes reliable dual isolated 24 Vdc power. The output from the ground fault monitor is a contact closure in the presence of a ground fault. The ground fault monitor is DIN rail mountable and is intended to be mounted in the same enclosure as the controller.

Power Supply and Diode Block

Operator Interface Safety System Software

Safety System Software (S³). The Eagle Quantum Premier uses the safety system software to provide a user friendly, fully integrated, high performance package. The software provides convenient and accurate system configuration and status information including diagnostic and trouble shooting tools. An optional embedded OPC server provides additional flexibility.

The software database contains all of the information to easily configure the Eagle Quantum Premier system. All device information is presented in a series of user-friendly point configuration screens. Point display screens for each node are available to display detailed status information, recent alarms and calibration records.

In summary the software collects, tracks, displays, and distributes your safety system information while allowing intuitive operator input for command and control functions of these safety systems.

Operating System Requirements:

The software requires an Intel based computer (400 MHz Pentium or higher with a minimum of 128 MB RAM), running Microsoft Windows 2000 or Windows XP Professional. For installation purposes the software must have at least 30 megabytes of free memory space and an available CD-ROM drive.

The Safety System Software has the following features:

- Configure field devices
- Program, simulate, monitor and document controller logic
- Review real time status through pre-built point displays
- An optional OPC Server license is available

Package Includes:

- S³ Installation software
- 30 ft. serial cable with DB9 serial and EQP interface connectors
- Licensed software key

CONTROLLERS

DEVICES

EQ3750 Addressable Smoke and Heat (ASH) Module

The EQP **Addressable Smoke and Heat (ASH) Module** (Instruction Manual: 95-8654) is designed to expand the input and output capability of the Det-Tronics Eagle Quantum Premier® system.

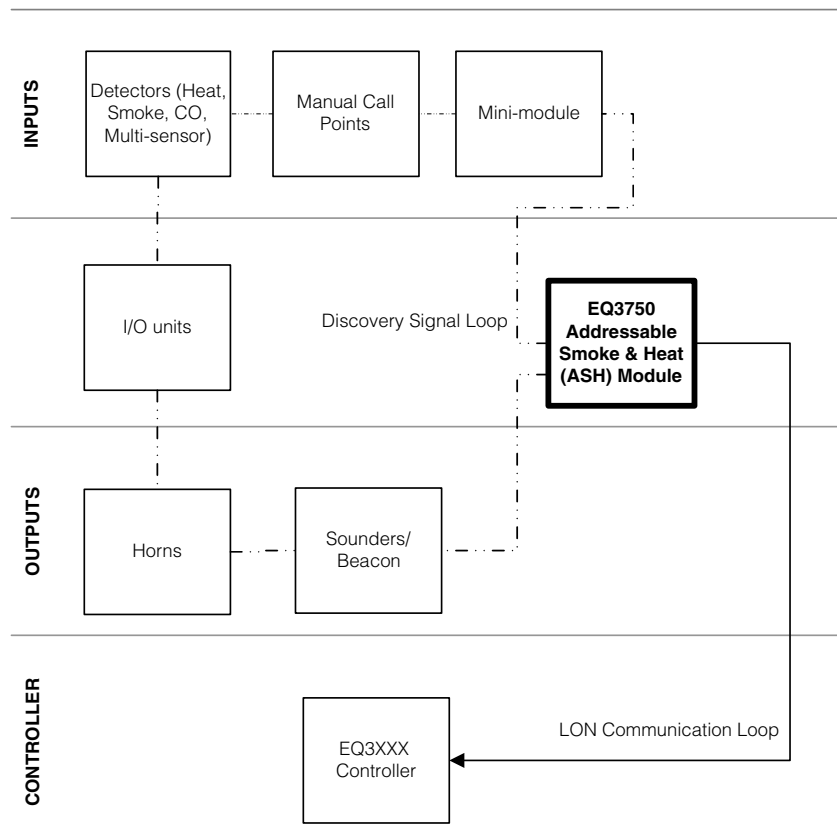

The ASH is an interface device designed to provide continuous and automated fire protection. It ensures system operation through continuous supervision of system inputs/outputs and Local Operating Network/Signaling Line Circuit (LON/SLC) monitoring in the controller.

The ASH is located directly on the LON of the EQP system, with a loop of up to 64 addressable devices tied into the ASH. This allows the EQP controller to annunciate a fire alarm from either its own LON based I/O or from the ASH connected addressable smoke and heat detection loops.

System status can be determined using the troubleshooting procedures, Eagle Quantum Safety System Software (S³), and the status indicators on the module.

- Expands the capabilities of the Det-Tronics Eagle Quantum Premier® system
- Provides power and communications to 64 addressable devices
- Uses Apollo Discovery smoke and heat detectors
- ASH alarm and fault status are logged in the EQP controller
- LEDs for easy annunciation of power, faults and an active device on the loop
- Monitors single addressable devices
- Provides remote I/O capabilities via LON/SLC
- DIN rail mounting
- Plug-in wiring connectors
- RFI and EMI hardened

DEVICES

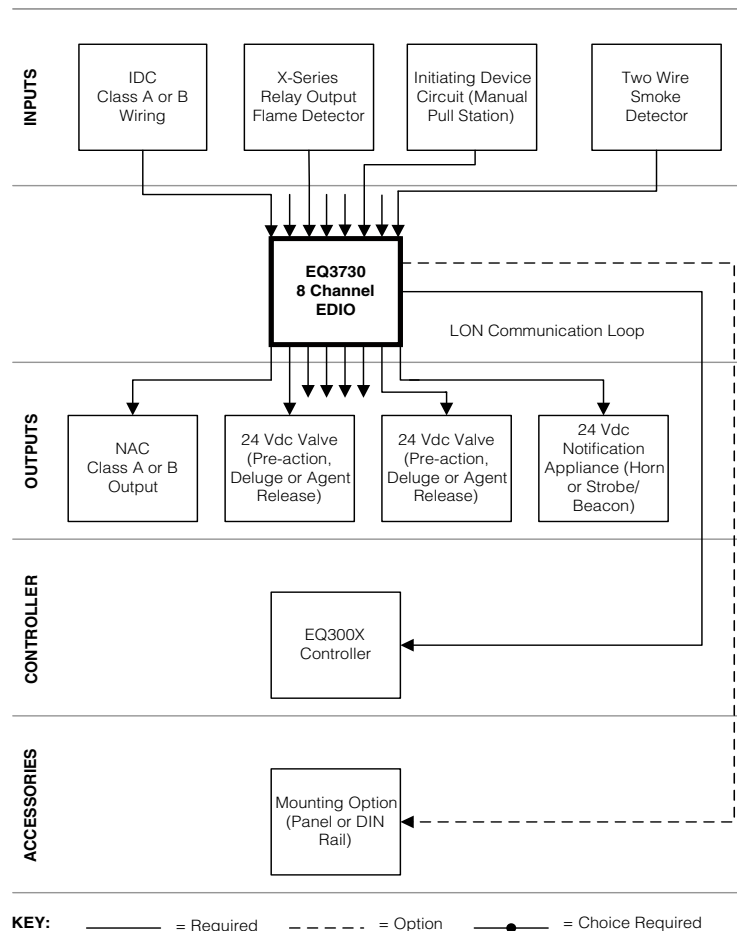

EQ3730EDIO Enhanced Discrete Input/Output Module (EDIO)

EQ3730EDIO Enhanced Discrete Input/Output Module (EDIO) (Spec Sheet: 90-1189)

The 8 Channel EDIO Module is specially designed to expand the input and output (I/O) capability of the Det-Tronics Eagle Quantum Premier System. The unit is designed to provide continuous and automated fire/gas protection while ensuring system operation through continuous supervision of system I/O and signaling line circuit (SLC). The EDIO module provides eight channels of configurable input or output points that can be configured as input/output, two-wire smoke/heat detector, Class A input, Class A output. Each input point can accept fire detection devices such as heat, smoke, or unitized flame detectors. Each output point can be configured for signaling or releasing output operation. Each channel on the module is provided with individual indicators for active and fault conditions.

- Monitors eight independent I/O channels
- Individual channels are configurable as an input/output/two-wire smoke/heat detectors/ Class A input/Class A output
- A smoke/heat channel can support up to 15 two-wire smoke and heat devices per channel
- For Class A input and output wiring two channels are required per Class A circuit
- Models with SIL 2 certification
- Individual point style is configurable as a supervised or an unsupervised point
- User configurable supervision for opens and/or shorts
- Individual point type is configurable for alarm/supervisory/other input styles, notification/releasing/dry contact output
- Exceeds the requirements of NFPA 72
- Panel or DIN rail mounting

EQ3700DCIO Discrete Input/Output Module (DCIO)

EQ3700DCIO Input/Output Module (DCIO) (Spec Sheet: 90-1149) The 8 Channel DC I/O Module is specially designed to expand the Input and Output (I/O) capability of the Det-Tronics Eagle Quantum Premier System. The unit is designed to provide continuous and automated fire/gas protection while ensuring system operation through continuous supervision of system I/O and signaling line circuit (SLC). The DCIO module provides eight channels of configurable I/O points that can be programmed for supervised or unsupervised operation. Each input point can accept fire detection devices such as heat, smoke, or unitized flame detectors. Each output point can be configured for signaling or releasing output operation. Each channel on the module is provided with individual indicators for active and fault conditions.

- Monitors eight independent I/O channels
- Individual channels are configurable as an Input or Output
- Individual point Style is configurable as a supervised or an unsupervised point
- Individual point Type is configurable for alarm/supervisory/other input styles, notification/releasing/dry contact output
- Meets the requirements of NFPA 72
- Panel or DIN rail mounting

DEVICES

EQ3740IPM Intelligent Protection Module

EQ3740IPM Intelligent Protection Module (Spec Sheet: 90-1184). The IPM is designed to provide continuous and automated local area fire protection, while monitoring system operation through continuous supervision of its inputs/outputs (I/O) and Local Operating Network/Signaling Line Circuit (LON/SLC) connection to the EQP controller. In addition, the module contains a unique “embedded logic program” that if enabled during configuration, allows the IPM to perform local area protection in a “back-up mode” without controller interaction. The IPM utilizes eight pre-configured I/O channels to perform its monitoring, supervision, and mitigation functions.

- Provides a pre-packaged single hazard protection solution to the Det-Tronics Eagle Quantum Premier system
- Eight independent, supervised I/O channels
- Individual channels have the pre-assigned functions necessary to deliver a single hazard protection solution
- Supports two conventional “two-wire” smoke/heat zones with upto 15 devices per zone, and the ability to reset latched zones. Does not require the use of “relay bases”
- Individual points are supervised in accordance with NFPA requirements for alarm/supervisory/other input styles, notification/releasing outputs
- Panel or DIN rail mounting
- Meets the requirements of NFPA 72

KEY: ——— = Required - - - - = Option —●— = Choice Required

DEVICES

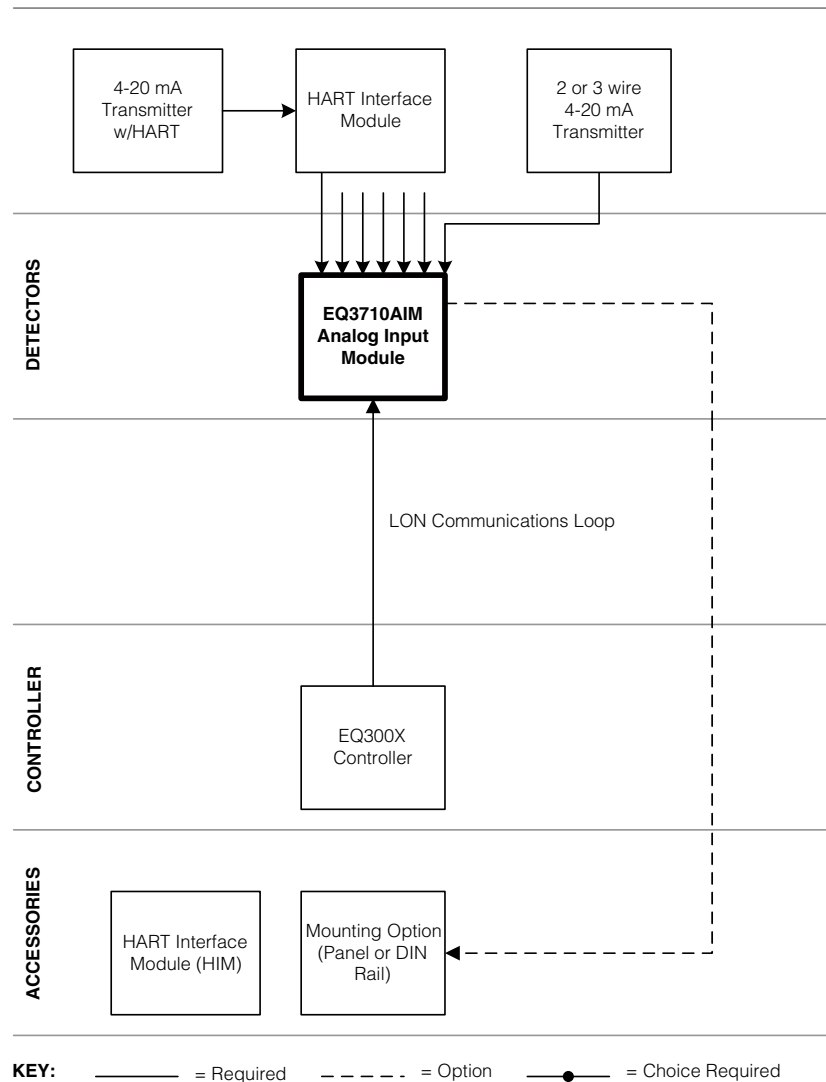

EQ3710AIM Analog Input Module

EQ3710AIM Analog Input Module (Spec Sheet: 90-1183). The 8 Channel Analog Input Module expands the input capability of the Det-Tronics Eagle Quantum Premier System. The unit provides a means of connecting devices with a 4-20 mA output signal to the Eagle Quantum Premier System.

Each channel is fully configurable to provide device and alarm information. This information includes tag name, descriptor, engineering units, fault alarm, low/high alarm, and alarm threshold limits.

- NFPA 72 Approved 4-20 mA flame detector input
- Monitors eight independent channels
- Panel or DIN rail mounting
- Optional HART Interface module (HIM) available
- Supports 2 or 3 wire 4-20 mA transmitters

DEVICES

EQ3720RM Relay Module

EQ3720RM Relay Module (Spec Sheet: 90-1181) The 8 Channel Relay Module is specially designed to expand the output capability of the Det-Tronics Eagle Quantum Premier System. The Relay Module provides eight channels of relay output points that are programmed for unsupervised operation. The output relays are rated up to 2 amps per channel at 30 Vdc maximum or 0.5 amps per channel at 120 Vac.

- Monitors eight independent channels
- Panel or DIN rail mounting
- "Hold last state" capable

DEVICES

FlexVu UD10 Universal Display

FlexVu UD10 Universal Display (Spec Sheet 90-1200) is recommended for applications where a gas detector with digital read-out of detected gas levels are required. The FlexVu UD10 Universal Display Unit is designed for use with Det-Tronics' gas sensor/transmitters. The display unit is designed and approved as a 'stand alone' device and performs all the functions of a gas controller.

- Universal design supports multiple Det-Tronics sensors
- Continuously displays gas level, gas type, and units measured
- Backlit display with heated optics
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- External log extraction using Gas Inspector program
- Accepts 4-20 mA input from a variety of detection devices (PointWatch, toxic sensors, pressure, flow, etc.)
- One person non-intrusive calibration
- Alarm setpoints adjustable via network
- Alarm history stored in nonvolatile memory
- Calibration history stored in nonvolatile memory

010817-001	Stop Plug, 20 Pack, 3/4"NPT, SS	2 lb (0.9 kg)
010818-001	Stop Plug, 20 Pack, M25, AL,IP66	1.5 lb (0.7 kg)
010819-001	Stop Plug, 20 Pack, M25, SS,IP66	3.25 lb (1.5 kg)
102804-001	Reducer, M25 to M20, AL	<1 lb (<0.45 kg)
102804-003	Reducer, M25 to M20, SS	<1 lb (<0.45 kg)

*NEMA 4/IP66 rating requires addition of Teflon tape.

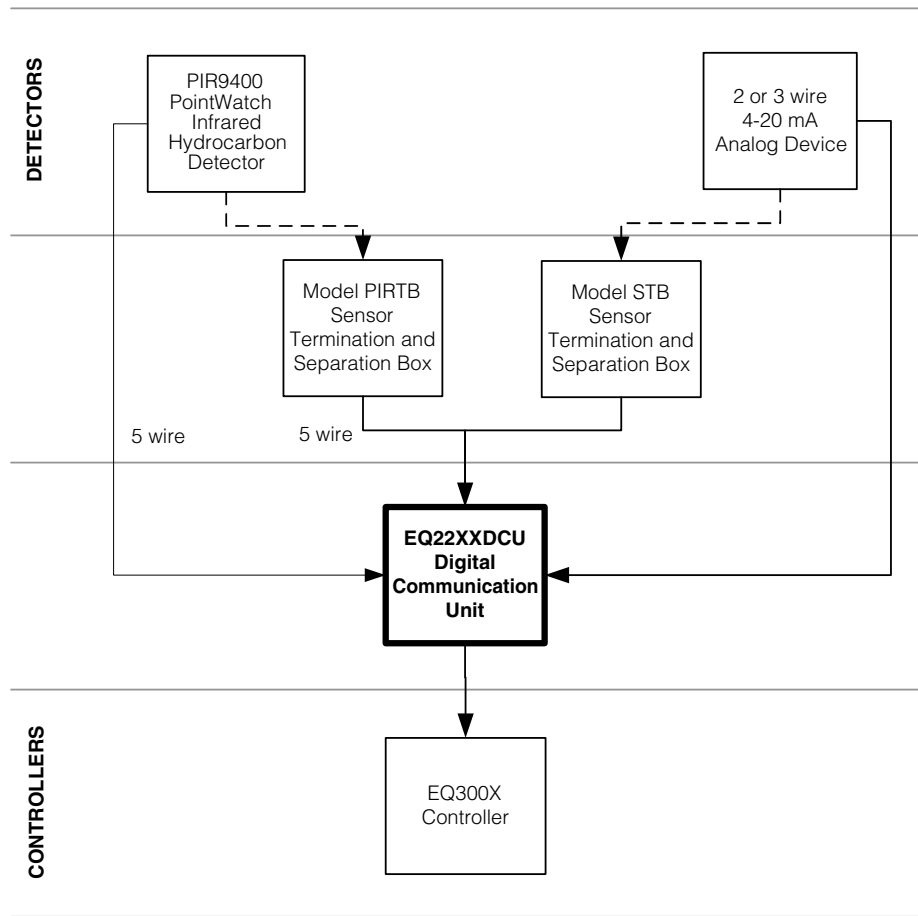

DEVICES

EQ2200DCU Series Digital Communication Unit

EQ2200DCU Series Digital Communication Unit (Spec Sheet: 90-1118) is approved for use with a variety of Det-Tronics' sensors including PointWatch IR gas detector and hydrogen sulfide (H₂S) electrochemical sensor (C706x Series). It will also accept any sensor/transmitter with a linear 4-20 mA output signal and allows for one person non-intrusive calibration. The DCU digitizes the analog signal and transmits the value to the controller.

- Accepts 4-20 mA input from a variety of detection devices (PointWatch, toxic sensors, pressure, flow, etc.)
- One person non-intrusive calibration
- Alarm setpoints adjustable via network
- Alarm history stored in nonvolatile memory
- Calibration history stored in nonvolatile memory
- Active fault isolation
- Self diagnostics
- Detector can be close-coupled or separated
- Supports sensor separation

KEY: ——— = Required - - - - - = Option —●— = Choice Required

NOTE: Refer to EQ22EMDCU above when requiring complete Electronic Module

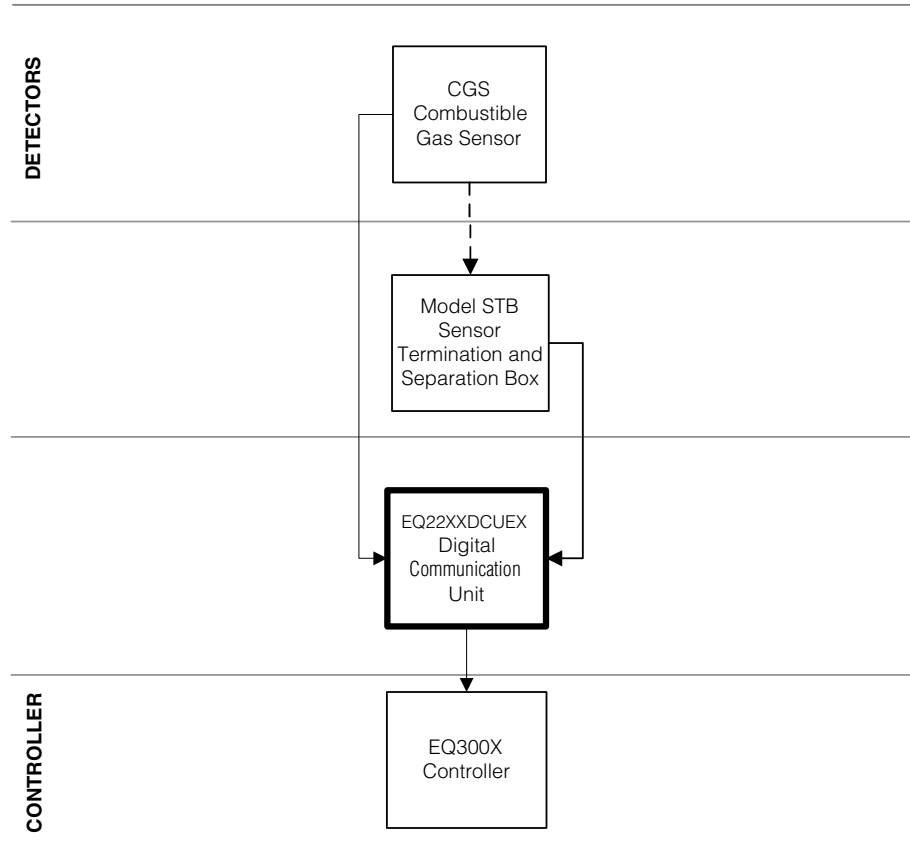

DEVICES

EQ2200DCUEX Series Digital Communication Unit

EQ2200DCUEX Series Digital Communication Unit (Spec Sheet: 90-1118) is a digital communication unit for catalytic combustible gas sensors (CGS). The DCUEX digitizes the analog signal and transmits the value to the controller.

- One person non-intrusive calibration
- Alarm setpoints adjustable via network
- Alarm history stored in non-volatile memory
- Calibration history stored in nonvolatile memory
- Active fault isolation
- Self diagnostics
- Detector can be close-coupled or separated
- Supports sensor separation

KEY: — = Required - - - - = Option —●— = Choice Required

DEVICES

EQ2200UVHT and C7050 Detector

EQ2200UVHT (Manual: 95-8570) combined with the **C7050 Detector** (Manual: 95-8214) on an EQP (or as a replacement on an older EQ system) provides fast, reliable flame detection in a wide variety of applications. The detector has the Automatic Optical Integrity (oi) feature, providing a continuous check of detector optical surfaces, detector sensitivity, and electronic circuitry of the detector/controller system. Not recommended for applications where welding or lightning may be present.

- Replaceable tube module
- External Automatic oi
- Internal Automatic oi
- Standard temperature option
- High temperature option, 125°C continuous duty
- Variable sensitivities available to match hazard
- FM, CSA, ATEX

KEY: ————— = Required - - - - - = Option —●— = Choice Required

C7050 LENS CAP/BODY	004907-022	SS	N/A	N/A	X	1 lb (0.45 kg)

*High temperature rating - continuous duty at 125 degree Celsius, for environments that normally exceed 75 degree Celsius operation.

**One (1) Electronic Module (EQxxxxUVHT) is required for use with each C7050B Detector (-037,-038, or -039 only).

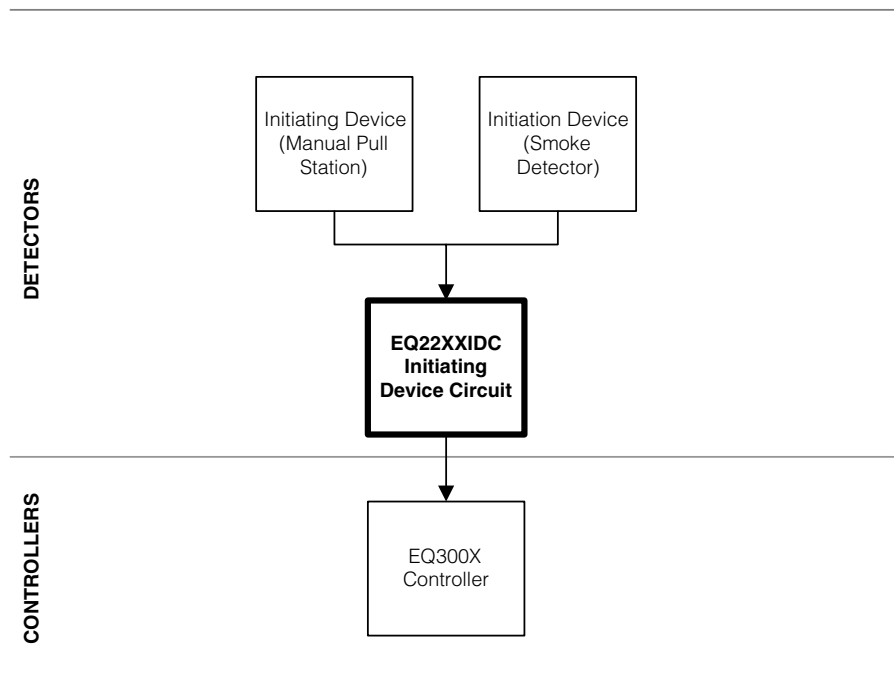

DEVICES

EQ2200IDC Series Initiating Device Circuit (IDC)

EQ2200IDC Series Initiating Device Circuit (IDC) (Spec Sheet: 90-1121) consists of a terminal wiring board and a communication module, mounted inside an explosion-proof, water-tight enclosure on a plate for mounting in an enclosure. The IDC accepts two dry contact inputs for use with devices such as relays, pushbuttons, and key switches.

- Provides two ANSI/NFPA 72 Class B Style B supervised input circuits
- Nonvolatile alarm history memory
- Active fault isolation
- Each input programmable for fire, supervisory, trouble, or normal service

KEY: ————— = Required - - - - - = Option —●— = Choice Required

NOTE: Refer to EQ22EMIDC above when requiring complete Electronic Module

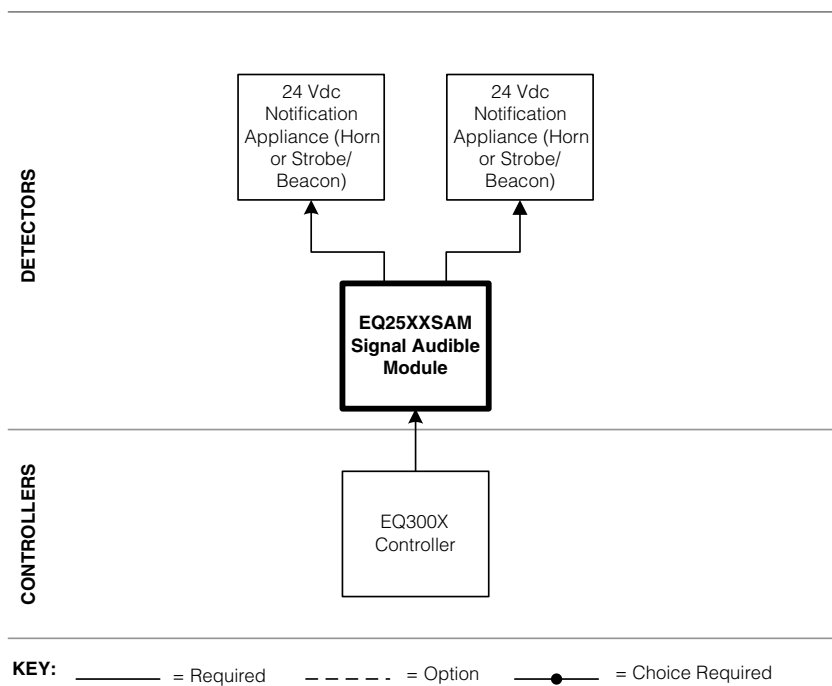

DEVICES

EQ2500SAM Series Signal Audible Module

EQ2500SAM Series Signal Audible Module (Spec Sheet: 90-1129) provides two indicating circuits for controlling UL Listed 24 Vdc polarized audible/visual indicating appliances. The SAM is located on the system LON and is controlled by programmable logic in the Eagle Quantum Premier Controller. Each output circuit is independently programmable to allow annunciation of separate events. In release applications, signal outputs can be programmed to provide signaling for prerelease, release, or post-release.

- Provides two ANSI/NFPA 72 Class “B” Style “Y” output notification appliance circuits
- Each circuit is individually supervised for opens and shorts
- Each circuit is individually controlled by user logic
- Each circuit supports a variety of programmable blink/flash rates
- Current reversal on activation
- 2 output channels
- Channels are individually activated
- Each channel is supervised for open/short circuits

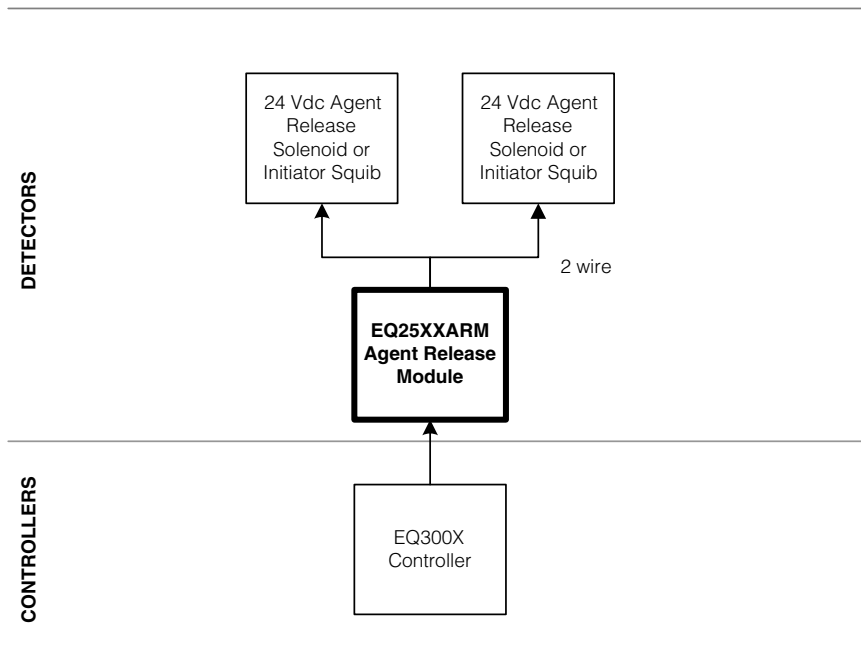

DEVICES

EQ2500ARM Series Agent Release Module

EQ2500ARM Series Agent Release Module (Spec Sheet: 90-1128) provides agent release capability for the Eagle Quantum System. The ARM is located on the LON and is controlled by programmable logic in the Eagle Quantum Premier Controller. The ARM can be programmed for “Single,” “Cross” or “Counting” Zone Style initiation. Optional time delay, abort, and manual release sequences allow the output to be programmed for use in unique applications. Provides local control of releasing solenoids.

- Capable of actuating a single solenoid or two solenoids simultaneously
- Provides up to 2 amperes at 24 Vdc (for each output)
- Monitors wire and solenoid coil for opens
- 2 output channels
- Release activates both outputs at the same time
- Each channel is supervised for open circuits

KEY: ——— = Required - - - - - = Option —●— = Choice Required

DEVICES

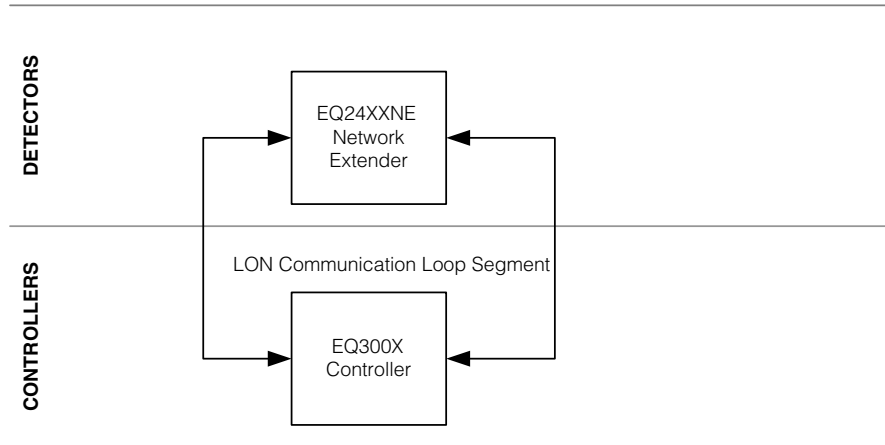

EQ2400NE Series Network Extender

EQ2400NE Series Network Extender (Spec Sheet: 90-1132) expands the capabilities of the Eagle Quantum Premier system by allowing additional nodes as well as additional wiring to be added to the LON communication loop. Without a network extender, the communication network is limited to 60 nodes on a 2,000 meter loop. Each network extender increases the capacity of the loop by 40 nodes and an additional 2,000 meters of wiring. The maximum system size is 246 field nodes and 10,000 meters of wiring. To ensure optimum performance, it is important to distribute the network extenders along the loop so that no more than 40 nodes or 2,000 meters of wiring are on either side of a network extender.

Network extender circuitry supports communication in both directions. If a network fault should occur, uninterrupted communication can continue in the opposite direction.

- Increases network capacity by 40 nodes per unit (system maximum = 246)
- Each extender increases wiring length by 2,000 meters
- Visual indication of network traffic
- Up to 6 extenders can be added per system

KEY: ————— = Required - - - - - = Option —●— = Choice Required

Junction Boxes and Accessories

Part Number	Description	Ship Weight
000120-021	J-Box for Hazardous Heats, Class 1, Division 1, Groups C & D, UL, CSA	2.5 lbs (1.2 kg)
000133-282	Loose Terminal Block can be used with the 000120-021 Junction Box	<1 lb (<0.45 kg)
226365-521	STB5A3NW Junction Box, AL, FM/CSA/ATEX/CE/IECEX	2.5 lbs (1.2 kg)
226365-541	STB5S3NW Junction Box, Stainless Steel Head, FM/CSA/ATEX/CE/IECEX	4 lbs (1.8 kg)
000505-001	J-Box for Hazardous Heats, includes mounted terminal strip, Class 1, Division 1, Groups C & D, UL, CSA	2.5 lbs (1.2 kg)
000505-006	J-Box w/terminals for Detect-A-Fires, NEMA 3R, general purpose	1.5 lbs (0.68 kg)
000214-139	Reducer 3/4 (M) NPT" to 1/2" (F) NPT, Aluminum	<1 lb (<0.45 kg)
000106-108	EOL Resistor, 10K Ohm	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory.

Smoke and Heat Detectors for Unclassified Areas (non-addressable)

Heat Detectors

Part Number	Description	Ship Weight
000119-066	Smoke Detector, ionization type, dual chamber, general purpose, cULus/FM/CSFM/MEA	2.20 lbs (1 kg)
000119-067	Smoke Detector, photoelectric type, general purpose, cULus/FM/CSFM/MEA	2.20 lbs (1 kg)
000120-149	Heat Detector, 135°F (57°C), electronic, fixed type with 15°F (8°C) rate-of-rise, general purpose, cULus/FM/CSFM/MEA	2.20 lbs (1 kg)
000120-150	Heat Detector, 135°F (57°C), electronic, fixed type, general purpose, cULus/FM/CSFM/MEA	2.20 lbs (1 kg)

NOTE: For additional options please consult the factory

2-Wire Smoke Accessories

Part Number	Description	Ship Weight
000119-021	Smoke Detector Base, 2-Wire for smoke & electronic heat detectors, remote LED & test capabilities, cULus	0.5 lb (0.23 kg)
000505-019	End of Line (EOL) Resistor (5.1K), for alarm supervision of smoke & electronic heat detectors	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory

4-Wire Smoke Accessories

Part Number	Description	Ship Weight
000119-005	Smoke Detector Base, 4-wire with aux. relay, remote LED & remote test capabilities, UL	0.5 lb (0.23 kg)
102385-002	End of Line Supervisory Relay for 4- wire Smokes	<1 lb (<0.45 kg)
000106-108	EOL Resistor, 10K Ohm	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory

Smoke & Heat Detection Accessories

Part Number	Description	Ship Weight
000161-005	Back Box, surface mount, alloy housing, five 1/2" NPT entries, cULus	1.5 lbs (0.68 kg)
000116-167	Remote Alarm Indicator, general purpose	0.5 lb (0.23 kg)
000119-063	Infrared Wireless Sensitivity Tester for Advanced Smoke Detectors	1 lb (0.45 kg)
000119-045	Smoke Detector Test Kit (No-Climb), includes Fiberglass 4 Section Telescopic Pole 14.7ft, Fiberglass Extension Pole 3.7ft, Universal Detector Removal Tool, Aerosol Smoke Dispenser, and Protective Carrying Bag	34 lbs (16 kg)
000515-095	Smoke Detector Testing Tool	8 lbs (3.6 kg)
000515-092	Telescopic Fiberglass Pole, 14.7 Ft	21 lbs (9.5 kg)
000119-046	Spare Smoke for Smoke Detector Test Kit	1.5 lbs (0.68 kg)
000515-097	Heat Detector Test Kit, includes detector test head, two (2) battery batons, and charger	14 lbs (6.4 kg)

NOTE: For additional options please consult the factory

DEVICES

Manual Call Stations (non-addressable)

Class 1, Division 1

Part Number	Description	Ship Weight
000115-195	Manual Pull Station, push button with lift flap (dual action), SPST contact, surface mount, alloy housing painted red, key for reset, 1/2" NPT bottom, includes "FIRE-PUSH BUTTON" label, Class 1, Division 1, Groups C-D, NEMA 4X, UL	5.5 lbs (2.5 kg)
000115-003	Manual Pull station, Dual Action Lift and Pull Ring, 3/4" Entry, Class 1, Division 1, SPDT Contacts, Groups C & D, Aluminum material, UL, ULC, CSA, CSFM Listed, Red Finish	5.5 lbs (2.5 kg)
000115-040	Manual Pull Station, pull ring with lift flap (dual action), SPDT contact, surface mount, Aluminum housing, two 3/4" NPT (F) entries, Class 1, Division 1, Groups B, C, & D, NEMA 4/7/9, ULC, Red Finish	5.5 lbs (2.5 kg)
000115-010	Manual Pull Station, Single Action (Dual if used with Lift Flap), DPDT Contacts, Aluminum material, Class 1, Division 1, Groups B, C, & D, NEMA 4X, UL Listed, Red Finish, Model B-9	3.5 lbs (1.6 kg)
000210-709	Lift Flap for B-9, "CO2 Release" label	0.5 lb (0.23 kg)
000115-011	Lift Flap for B-9, "FIRE ALARM" label	0.5 lb (0.23 kg)
000115-012	Lift Flap for B-9, "FIRE SYSTEM RELEASE" label	0.5 lb (0.23 kg)
000115-027	Lift Flap for B-9, "FM-200 Release" label	0.5 lb (0.23 kg)

NOTE: For additional options please consult the factory.

Class 1, Division 2

Part Number	Description	Ship Weight
000115-053	Manual Pull Station, pushbutton type with lift flap (dual action), Class 1, Division 2, Groups A, B, C, & D, NEMA 4X, SPST contact, surface mount, GRP housing painted red, key for reset, two 1/2" NPT (F) entries, includes "FIRE ALARM" label and 10K EOL resistor, UL	2.7 lbs (1.3 kg)
000115-054	Manual Call Station, break glass type, SPST contact, Class 1, Division 2, Groups A, B, C, & D, NEMA 4X, SPST contact, surface mount, GRP housing painted red, key for test, two 1/2" NPT (F) entries, includes "FIRE BREAK GLASS" label, no EOL resistor, UL	2.7 lbs (1.3 kg)

NOTE: For additional options please consult the factory.

General Purpose

Part Number	Description	Ship Weight
000515-012	Manual Pull Station, Dual Action w/ Labels, DPST Contacts, Red Finish, Model 3300	1.2 lbs (0.6 kg)
000115-051	Manual Pull Station, Dual Action w/ Labels, SPST Contacts, Red Finish, Model 3300	1.2 lbs (0.6 kg)
000515-013	Weatherproof Backbox for 3300 Pull Station	1 lb (0.45 kg)
000515-014	Indoor Backbox for 3300 Pull Station	0.5 lb (0.23 kg)

NOTE: For additional options please consult the factory.

Accessories

Part Number	Description	Ship Weight
000115-028	Glass Breakrods for B-9 (10 Pk)	0.5 lb (0.23 kg)
000515-015	Glass Breakrods for 3300 Pull Station (12 Pk)	0.5 lb (0.23 kg)
000515-016	Spare Key for 3300 Pull Station	0.5 lb (0.23 kg)
000106-108	EOL Resistor, 10K Ohm	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory.

Horns (non-addressable)

Class 1, Division 1

Part Number	Description	Ship Weight
000122-144	Horn, 27 Tones, marine grade alloy, Up to 100+/-3dB, UL Class 1, Division 1, Groups C & D, NEMA 4x, Voltage: 24VDC, Cable Entries: 1x3/4" NPT LHS, 1x3/4" NPT RHS, Duty Label: None, Tag Label: None, Other Features: None, Finish: Red Finish	12.3 lbs (5.6 kg)
000122-098	Horn, Alloy, Up to 100+/-3dB, UL Class 1, Div 1, Groups C & D, NEMA 4x, 24VDC, 3/4" NPT bottom entry, No duty or tag label, Fitted with 10K EOL Resistor), Red finish	12.3 lbs (5.6 kg)
000122-024	Horn, Explosion Proof, Class 1, Division 1, 24 Vdc, 3/4" Entry, 100 dB @ 10 ft., UL, cUL, CSFM	10.3 lbs (4.7 kg)
000122-036	Siren, Explosion Proof, Class 1, Division 1, Groups B, C, & D, 4 Selectable Tones, 24 Vdc, 108 dB @ 10 ft., NEMA 4X, UL, cUL	23 lbs (10.5 kg)

NOTE: For additional options please consult the factory.

Class 1, Division 2

Part Number	Description	Ship Weight
000122-079	Horn, up to 115 dB, UL Class 1 Division 2, Class 1 Zones 1 & 2, NEMA 4X & 6, GRP material, 24 Vdc, no labels, one (1) 1/2" NPT entry, no special features, red finish	13.2 lbs (6 kg)
000122-074	Horn, up to 118dB(A), GRP, UL Class 1 Division 2, Class 1 Zones 1 & 2, Class II Div 2, Groups F & G, NEMA 4x & 6, Voltage: 12V-48V d.c, Labels: None, Entries: 2x1/2" NPT, Options: None, Color: Painted Red	13.2 lbs (6 kg)
000122-099	Horn, up to 118dB, GRP material, Certified EExd IIC T5, ATEX approved Ex II 2GD, IP66 & 67, 24 Vdc, No labels, two M20 entries, Natural Black finish	13.2 lbs (6 kg)
000122-031	Alarm Horn, Class 1, Division 2, Groups A, B, C, & D, 24 Vdc, 0-110 dB @ 10 ft., NEMA 4X, UL, ULC, CSFM (requires tone module)	6.1 lbs (2.7 kg)
000122-052	Universal Tone Module, 32 switchable Tones, UL, ULC, CSA, CSFM	0.5 lb (0.23 kg)
000106-108	End of Line (EOL) Resistor, for supervision of end devices, 10K Ohm	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory.

General Purpose

Part Number	Description	Ship Weight
000122-039	Horn, 80 to 92 dB @ 10 ft, surface mount, diode polarized, UL Listed	1 lb (0.45 kg)
000122-037	Indoor backbox, general purpose	0.5 lb (0.23 kg)
000122-033	Horn, 24 Vdc, Non-Polarized, general purpose, Model 450	1.5 lbs (0.68 kg)
000122-034	Panel Mount Gasket Kit, 350/450	0.5 lb (0.23 kg)
000122-035	Back Box for 450 Horn	1 lb (0.45 kg)

NOTE: For additional options please consult the factory.

Accessories

Part Number	Description	Ship Weight
000106-108	EOL Resistor, 10K Ohm	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory.

DEVICES

Strobes (non-addressable)

Class 1, Division 1

Part Number	Description	Ship Weight
000121-121	Xenon Strobe (5 Joule), NEMA 4X & 6, Alloy, UL Class 1, Division 1, Groups C & D, 24 Vdc, Red lens with no guard, 1/2" entries, No duty or Tag labels, , Red finish	4.5 lbs (2 kg)
000121-116	Xenon Strobe 21 Joule, NEMA 4X & 6, UL Class 1, Division 1, Groups C & D, 24 Vdc, 3/4" NPT Entry, 60 flash per minute, Clear Lens with no lens guard, no duty or tag label, Alloy material, Red finish	14.5 lbs (6.6 kg)
000121-028	Strobe, Amber Lens, Class 1, Division 1, Groups C & D, 24 Vdc, 80 flash per minute, 3/4" Pendant Mount, NEMA 4X, UL, ULC, CSA, CSFM	18 lbs (8.2 kg)
000121-029	Strobe, Red Lens Class 1, Division 1, Groups C & D, 24 Vdc, 80 flash per minute, 3/4" Pendant Mount, NEMA 4X, UL, ULC, CSA, CSFM	18 lbs (8.2 kg)
000121-030	Strobe, Blue Lens Class 1, Division 1, Groups C & D, 24 Vdc, 80 flash per minute, 3/4" Pendant Mount, NEMA 4X, UL, ULC, CSA, CSFM	18 lbs (8.2 kg)

NOTE: For additional options please consult the factory.

Class 1, Division 2

Part Number	Description	Ship Weight
000121-155	Strobe, Xenon type, 15 Joule, 24 Vdc, Pipe mount, 3/4" NPT (F) entry, natural black GRP housing, 60 flashes per minute, diode polarized, red lens with wire guard, Class 1, Division 2, Groups A-D, NEMA 4X, cULus	5.8 lbs (2.6 kg)
000121-166	Strobe, Xenon type, 15 Joule, 24 Vdc, Pipe mount, 3/4" NPT (F) entry, natural black GRP housing, 60 flashes per minute, diode polarized, blue lens with wire guard, Class 1, Division 2, Groups A-D, NEMA 4X, cULus	5.8 lbs (2.6 kg)
000121-156	Strobe, Xenon type, 15 Joule, 24 Vdc, Pipe mount, 3/4" NPT (F) entry, natural black GRP housing, 60 flashes per minute, diode polarized, amber lens with wire guard, Class 1, Division 2, Groups A-D, NEMA 4X, cULus	5.8 lbs (2.6 kg)
000121-163	Strobe, Xenon type, 15 Joule, 24 Vdc, pipe mount, 3/4" NPT (F) entry, natural black GRP housing, 60 flashes per minute, diode polarized, clear lens with wire guard, Class 1, Division 2, Groups A-D, NEMA 4X, cULus	5.8 lbs (2.6 kg)
000121-133	Strobe, Clear Lens, Class I, Division 2, 4-wire with supervisory diode, NEMA 4X, 24 Vdc, 80 flash/per minute, 1/2" Pipe Mount, UL, ULC, CSA, CSFM	2 lbs (0.9 kg)
000121-122	Xenon Strobe 5 Joule, ATEX Approved Ex II 2GD, EExd IIB T5, IP66 & 67 GRP Material, two M20 entries, 24 Vdc, 60 flash per minute, Red Lens with guard, Backstrap mounting, No duty or tag labels, Red finish	5.5 lbs (2.5 kg)
000121-031	Strobe, Red Lens, 24 Vdc, 4X, Class 1, Division 2, Groups, A, B, C, & D, UL, cUL CSA, non-polarized	1.5 lbs (0.68 kg)
000121-035	Strobe, Amber Lens, 24 Vdc, 4X, Class 1, Division 2, Groups, A, B, C, & D, UL, cUL CSA, non-polarized	1.5 lbs (0.68 kg)
000121-037	Strobe, Blue Lens, 24 Vdc, 4X, Class 1, Division 2, Groups, A, B, C, & D, UL, cUL CSA, non-polarized	1.5 lbs (0.68 kg)

NOTE: For additional options please consult the factory.

Strobes (non-addressable) Continued...

General Purpose

Part Number	Description	Ship Weight
000121-073	Strobe, NEMA 4X, Xenon type, 2.2 Joule, 1/2" pipe mount, 24 Vdc, red lens, UL/ULc/CSA, non-polarized	<1 lb (<0.45 kg)
000121-115	Strobe, NEMA 4X, Xenon type, 2.2 Joule, 1/2" pipe mount, 24 Vdc, blue lens, UL/ULc/CSA, non-polarized	<1 lb (<0.45 kg)
000505-005	End of Line / Polarizing Assembly, 10k Ohm	<1 lb (<0.45 kg)
000121-038	Strobe, White Lens, 24 Vdc, 1/2" Pipe Mount, 300 Candlepower, NEMA 4X, UL, cUL, CSA, non-polarized	2 lbs (0.9 kg)
102778-003	Strobe, Blue Lens, 24 Vdc, 1/2" Pipe Mount, 300 Candlepower, NEMA 4X, UL, cUL, CSA, non-polarized	2 lbs (0.9 kg)
102778-004	Strobe, Red Lens, 24 Vdc, 1/2" Pipe Mount, 300 Candlepower, NEMA 4X, UL, cUL, CSA, non-polarized	2 lbs (0.9 kg)
102778-005	Strobe, Amber Lens, 24 Vdc, 1/2" Pipe Mount, 300 Candlepower, NEMA 4X, UL, cUL, CSA, non-polarized	2 lbs (0.9 kg)

NOTE: For additional options please consult the factory.

Accessories

Part Number	Description	Ship Weight
000121-053	Dome Guard for 121X & 27XST, Federal DGXC	<1 lb (<0.45 kg)
000121-054	Ceiling Mount for 121X & 27XST, Federal CMXC	1.5 lbs (0.68 kg)
000121-055	Wall Mount for 121X & 27XST, Federal WMXC	1.5 lbs (0.68 kg)
000106-108	EOL Resistor, 10K Ohm	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory.

Combination Horn/Strobe

Class 1, Division 2

Part Number	Description	Ship Weight
000121-075	Horn/Strobe Combination Unit Consisting of the following: Xenon Strobe, 5 Joule, Class 1, Division 2, NEMA 4X & 6, GRP Material, two (2) 1/2" NPT entries, 24 Vdc, 60 flash/minute, red lens with guard, no labels, red finish Sounder, up to 115 dB, Class 1 Division 2, Class 1 Zones 1 & 2, NEMA 4X & 6, GRP material, 24 Vdc, no Labels, one (1) 1/2" NPT entry, no special features, red finish 2-Way Baseplate	23 lbs (10.5 kg)
000121-079	Horn/Strobe Combination Unit Consisting of the following: Xenon Strobe, 5 Joule, ATEX Approved Ex II 2G, EExd IIB T5, IP66 & 67, GRP Material, 24 Vdc, 60 flash/minute, red lens with guard, two (2) 20 mm entries, no labels Sounder, Up to 115 dB, ATEX Certified EExd IIC T5, IP66 & 67, GRP material, 24 Vdc, no labels, one (1) 20 mm entry, no special features, red finish 2-Way Baseplate	23 lbs (10.5 kg)

NOTE: For additional options please consult the factory.

General Purpose

Part Number	Description	Ship Weight
000122-078	Horn/Strobe, outdoor general purpose, clear lens labeled "FIRE", requires outdoor backbox	1.5 lbs (0.68 kg)
000122-097	Outdoor backbox, general purpose	<1 lb (<0.45 kg)
000121-120	Horn/Strobe, indoor general purpose, clear lens labeled "FIRE", requires indoor backbox	1.5 lbs (0.68 kg)
000122-037	Indoor backbox, general purpose	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory.

Accessories

Part Number	Description	Ship Weight
000106-108	000106-108 End of Line (EOL) Resistor, for supervision of end devices, 10K Ohm	<1 lb (<0.45 kg)

NOTE: For additional options please consult the factory.

SIL 2 CERTIFIED SYSTEM

SIL 2 Certified Fire and Gas Detection System

Det-Tronics has the capability to offer a third-party approved SIL 2 rated fire and gas detection system fully TÜV certified to IEC61508.

EQ3001 Eagle Quantum Premier Controllers share a common hardware and software platform with standard EQP Controllers. The SIL rated version of the Controller conducts additional diagnostic checks and annunciates additional fault conditions. Using Det-Tronics EQP Safety Controllers in redundant mode will increase their availability, but will have no effect on their ability to perform a safety-related function. The redundant controller system is certified for use as part of a SIL 2 system.

EQ3730EDIO Enhanced Discrete Input/Output Module (EDIO) module provides eight channels of configurable digital input or digital output devices. The EDIO Module is specially designed and certified to meet the requirements of IEC 61508.

Multispectrum Infrared Flame Detector X3301 establishes a new benchmark in multiple-fuel fire detection performance and false alarm rejection. The detector utilizes advanced signal processing algorithms supported by an embedded 32-bit microprocessor to provide continuous protection in the presence of false alarm sources and environments with infrared radiation present. SIL 2 certified by TÜV to IEC-61508 for a 4-20 mA and relay output.

PointWatch Eclipse Infrared Gas Detector is a point infrared gas detector providing detection of flammable hydrocarbon gases in the lower explosion limit (LFL) range. SIL 2 certified by TÜV to IEC-61508 for a 4-20 mA and relay output.

SIL 2 CERTIFIED SYSTEM

EQ3001 Controller – SIL

Model	Part Number	Mounting	ControlNet	Serial Port Expansion	SIL/FM/CSA/ATEX/CE	Ship Weight

*The last 3 digits of the part number identify the software configuration. Please see table A1 to choose the correct option.
The standard EQP detectors are completely configurable using the S³ software and are shipped defaulted to the -001 setting.
NOTE: All X3301 models are approved for Class I, Div. 1.

PointWatch Eclipse Models – SIL 2 Certified (SIL/FM/CSA/ATEX/CE/IECEX)

Product Life Cycle Definitions

Active: An active product is one that is being actively promoted, with new versions being released. These products are manufactured on a regular basis and are promoted as the latest technology from Det-Tronics.

Retired Product Status (RPS): An RPS product will continue to be manufactured for a *maximum* of five years after being given this status. No further development work will be done, or new certifications pursued, on RPS products.

Repair Only Status (ROS): An ROS product will no longer be manufactured. An ROS product will remain on this status for a maximum of five years.

Obsolete (OBS): An OBS product will no longer be manufactured or repaired.

Ordering Information

Ordering Information If unit required is not listed, it may be possible to order a special model that better fits the requirements. The manufacturer reserves the right to offer a particular model. Consult factory for pricing and availability.

**Detector Electronics Corporation
6901 West 110th Street
Minneapolis, Minnesota 55438 USA**

The manufacturer reserves the right to make substitutions or changes to products without notice.

All prices are in U.S. Dollars. Prices are F.O.B. factory, Minneapolis, Minnesota, USA. Prices shown contain no provision for V.A.T. National, State or Local taxes or customs duty that may apply. Prices shown do not contain provision for special export crating. Prices are subject to change without notice. Prices are effective for shipments after September 1, 2010.

Terms are Confirmed Letter of Credit with order unless open account terms are established in advance. Invoices to customers with approved credit are payable

30 days net (Domestic) from date of invoice.
35 days net (International) from date of invoice.

A minimum of 30% restocking charge will be applied to all returns. Actual credit will depend on age and condition. Prior to returning products, contact Detector Electronics Corporation to obtain a Return Material Identification (RMI) number.

Expedited Shipments Any order received (telephone or wire) requesting same day shipment will be treated as an "expedited shipment." There will be a minimum charge for "expedited shipments" of \$350 and an additional 10% expediting charge for all counter-to-counter rush orders. Detector Electronics cannot guarantee same day shipment for orders placed after 3:00 PM CST.

MINIMUM ORDER: \$250.00

General Terms and Conditions for Sales Contract

(Rev. 14 September 17, 2010)

All sales by Detector Electronics Corporation (hereinafter called "Det-Tronics") of equipment offered and sold by it shall be subject to the following General Terms and Conditions which shall be deemed incorporated into all orders and offers to purchase submitted to Det-Tronics for acceptance and into all of its acceptances and contracts for sale.

1. **EXCLUSION OF WARRANTIES.** DET-TRONICS MAKES NO WARRANTY THAT THE EQUIPMENT SOLD HEREUNDER SHALL BE MERCHANTABLE OR THAT SUCH EQUIPMENT SHALL BE FIT FOR ANY PARTICULAR PURPOSE. MOREOVER, DET-TRONICS MAKES NO EXPRESS OR IMPLIED WARRANTIES EXCEPT FOR THE LIMITED WARRANTY OUTLINED IN PARAGRAPH 2. IN ADDITION, NO REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, MADE BY ANY DISTRIBUTOR, SALES REPRESENTATIVE, OR FIELD AGENT OF DET-TRONICS WHICH IS NOT SPECIFICALLY SET FORTH HEREIN SHALL BE BINDING ON DET-TRONICS.

2. **WARRANTY.** Det-Tronics makes the following limited warranty: Det-Tronics warrants to Buyer that the equipment represented by this contract shall be free from defects in material and workmanship upon delivery. If such equipment is not as warranted within eighteen months after date of manufacture, or within twelve months after date of installation, whichever occurs first as evidenced by a certification by the installer, is found by Det-Tronics' inspection to be defective in material and workmanship upon delivery within twelve months after date of installation, Det-Tronics' liability and Buyer's exclusive remedy against Det-Tronics is expressly limited, at Det-Tronics' option, to the repair or replacement of the defective good(s). Any part, item or equipment repaired or replaced and returned to Buyer shall be warranted by Det-Tronics for the remainder of the original warranty period. Extended warranty periods are offered for specific detectors and are shown in the notes below.

NOTE #1: The PointWatch PIR9400 and PointWatch Eclipse PIRECL Point Infrared Hydrocarbon Detector and the X3301 and X3302 Multispectrum Infrared Flame Detector warranties for parts and labor shall be five (5) years from the date of manufacture.

NOTE #2: The X2200 UV Flame Detector and X9800 Single Frequency IR Flame Detector and X5200 UV/IR Flame Detector warranty for parts and labor shall be three (3) years from the date of manufacture.

NOTE #3: The OPECL Open Path Eclipse and NTMOS Gas Detector warranty for parts and labor shall be two (2) years from the date of manufacture.

Repair or replacement of the detector equipment as provided in this warranty is the Buyer's exclusive remedy. If Det-Tronics fails to provide Buyer with free repair or replacement, Det-Tronics' entire liability shall not exceed the lower of the repair value, the replacement value or the amount paid by Buyer to Det-Tronics for the equipment. Det-Tronics will not have any liability of any kind under this limited product warranty unless the Buyer notifies Det-Tronics within one year after the cause of action has accrued.

This warranty applies only to the equipment delivered which after shipment from Det-Tronics' factory have not been altered, changed or repaired in any manner. The products of other manufacturers are covered only by such warranties as made by these original manufacturers even though such items may have been included as components. Due to the extreme environmental locations where the detectors are used cosmetic issues with paint and surface conditions may not be covered by this warranty.

3. **LIMITATIONS ON WARRANTY.** IN NO EVENT SHALL DET-TRONICS OR ITS SUBCONTRACTORS OR VENDORS BE LIABLE IN CONTRACT, TORT, STRICT LIABILITY, WARRANTY, OR OTHERWISE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL LOSS OR DAMAGES WHATSOEVER, INCLUDING BUT NOT LIMITED TO DAMAGE TO OR LOSS OF PROPERTY OR EQUIPMENT, LOSS OF ANTICIPATED PROFITS OR REVENUE, CLAIMS OF CUSTOMERS, OR HARM TO GOODWILL OR BUSINESS REPUTATION, LOSS OF USE OF SYSTEM, NON-OPERATION OR INCREASED EXPENSE OF OPERATION OF OTHER EQUIPMENT DIRECTLY OR INDIRECTLY ARISING FROM THE SALE, HANDLING OR USE OF THE EQUIPMENT, OR FROM ANY OTHER CAUSE RELATING THERETO AND DET-TRONICS' LIABILITY HEREUNDER. The remedies set forth above and the obligations and liabilities thereunder are exclusive and in lieu of all other remedies, warranties, guarantees or liabilities expressed or implied, arising by law or otherwise including without limitation, any obligations of Det-Tronics with respect to merchantability and fitness for a particular purpose/use or whether or not occasioned by Det-Tronics' negligence. Det-Tronics shall not be liable to the Buyer for any claims, demands, injuries, damages, actions or causes of action whatsoever based on negligence or strict liability.

If, after inspection of the returned equipment, Det-Tronics determines that the defect is a result of damage, misuse, mishandling, installation, abnormal conditions of storage or operation, unauthorized repair or modification, or due to the Buyer's failure to install, maintain or operate the equipment in compliance with the written instructions, all expenses incurred by Det-Tronics in connection with the replacement or repair of the equipment shall be for the account of the Buyer. Any equipment returned to Det-Tronics for replacement shall become the property of Det-Tronics.

The validity, performance and interpretation of the limited warranty shall be governed by the internal laws (and not the laws of conflicts) of the State of Minnesota. All disputes arising in connection with the limited warranty shall be resolved, if not sooner settled, by a court of competent jurisdiction located in Hennepin County, Minnesota, USA.

REFERENCES

4. ACCEPTANCE STATES THE ENTIRE CONTRACT. The acknowledgment by Det-Tronics of the Buyer's order or offer to purchase is an acceptance of the Buyer's order and intended to embody the complete and exclusive contract of sale in relation to the subject matter hereof, and no understandings or agreements, verbal or otherwise, in relation thereto except as herein expressly set forth or incorporated herein by reference shall be binding on either party.

The acknowledgment by Det-Tronics of the Buyer's order(s) is accepted on the condition that the terms and conditions set forth herein shall apply and shall constitute complete agreement between the parties. Any provisions or conditions of the Buyer's order forms or any verbal or other understandings or agreements which are in any way in conflict with or in addition to these terms and conditions shall not be binding on Det-Tronics and shall not be applicable, unless expressly agreed to in writing by Det-Tronics herewith or hereafter. Buyer shall be deemed to have assented to the exclusive terms and conditions hereof unless objection by the Buyer hereto in writing has been received by Det-Tronics at its office in Minneapolis, Minnesota within ten (10) working days after receipt of the acknowledgment by the Buyer, or if a shipment has been requested in less than said ten (10) working days, then prior to such date shipment, and in the event of such objection and at Det-Tronics' option, the acknowledgment shall thereupon be revoked and the sale contract terminated.

5. DELIVERY. Delivery shall be FCA. Det-Tronics' factory, unless otherwise agreed and indicated on our order acknowledgment. Shipping dates are approximate and are based upon current and anticipated manufacturing capabilities and upon receipt of all necessary information from the Buyer. Det-Tronics reserves the right to make delivery in installments and the contract shall be severable as to each such installment. Delay in delivery or other default in any installment shall not relieve the Buyer of its obligation to accept and pay for remaining deliveries. If delivery of goods is delayed due to default in payment of the purchase price or to delay in receipt of shipping instructions, documents for payment, required inspection, export license or authorization or other cause for which Det-Tronics is not responsible, charges for demurrage and storage shall be paid by the Buyer. All claims for a delay in delivery shall be deemed waived unless presented to Det-Tronics in writing thirty (30) days after the delivery of each shipment.

Unless otherwise indicated by the agreed upon incoterm, all shipping and insurance charges, any duty and all taxes related to the Buyer's order shall be paid by the Buyer. Claims for damages in transit must be asserted against the Carrier. Within (7) days after receipt of shipment, the Buyer must report to Det-Tronics any shortage or damage not due to the carrier, otherwise claims for such shortage or damage will be deemed waived.

6. FORCE MAJEURE. Fulfillment of this order is contingent upon the availability of materials. Det-Tronics shall not be liable for any delays in delivery, or for non-delivery or nonperformance, in whole or in part, caused by the occurrence of any contingency beyond the control of either Det-Tronics or suppliers of Det-Tronics, including but not limited to one or more of the following causes: fires, destruction of plant; strike; lockout; dispute with workmen; epidemic; flood; accident; delay in transportation; war (whether declared or undeclared); insurrection; riot; blockage; embargo; acts, demands or requirements of the United States, or the country in which or through which delivery is to be made or any state or territory thereof, or of any governmental subdivision of any thereof; restraining orders for decrees of any court or judge; or any other cause whatsoever, whether similar or dissimilar to those herein before enumerated. The existence of any such cause or causes of delay shall extend the time of performance by the time or times measured by any such cause or causes of delay. If delivery is not completed within sixty (60) days after the date stipulated in the acceptance of the order due to any said causes, either Det-Tronics or the Buyer may cancel this contract on ten (10) working days notice to the other. If any contingency occurs, Det-Tronics reserves the right to allocate production and deliveries among its customers.

7. ACCEPTANCE OF ORDERS. Orders and offers to purchase received by or on behalf of Det-Tronics are subject to acceptance only at its office in Minneapolis, Minnesota. No Det-Tronics distributor, sales representative, or field agent has authority to accept orders or make contracts of sale on behalf of Det-Tronics.

8. CANCELLATION, COUNTERMAND AND RETURN OF GOODS. Orders accepted by Det-Tronics cannot be cancelled or countermanded, or shipments deferred or equipment returned except with the prior written consent from Det-Tronics' office in Minneapolis, Minnesota, and upon terms that will indemnify Det-Tronics against all losses resulting therefrom, including the profit on any part of the order that is cancelled. When Det-Tronics authorizes the return of equipment, the Buyer shall prepay the shipping charges on such returned equipment unless otherwise expressly stated by Det-Tronics in its written return authorization.

9. PRICES, TAXES AND TRANSPORTATION CHARGES. The sales price stipulated in this contract is exclusive of all customs duties, charges or surcharges, consular fees, sale, use, excise, turnover, occupational or transportation taxes, or any other taxes imposed by any country or political subdivision thereof. If any such tax or charge is imposed by law on the Buyer on account of this sale and Det-Tronics is obligated to pay such tax or charge, the amount of such disbursement shall be reimbursed to Det-Tronics by the Buyer forthwith in addition to the purchase price. Freight and insurance quotations are merely estimates based upon currently prevailing rates and, because Det-Tronics has no control over such quotations, any variations in the actual rates at the time of shipment shall be for the Buyer's account. Det-Tronics may add a charge for export packing to the price, and Det-Tronics reserves the right to impose an additional reasonable charge for packing and/or packaging to comply with Buyer's specifications or instructions.

REFERENCES

10. TERMS AND PAYMENT; INSTALLATION CHARGES, OTHER CHARGES. Absent contrary provision on the order acknowledgement and subject to approval and continuance of approval of credit by Det-Tronics, terms of payment are thirty days net from the date of invoice. In the case of equipment for destination outside the United States, terms of payment are by satisfactory confirmed irrevocable Letter of Credit or Sight Draft with documents attached as Det-Tronics may elect. All payments shall be in legal currency of the United States. Acceptance and endorsement by Det-Tronics of an instrument for less than the full amount which claims to be due shall not be deemed to be an admission of payment in full and any conditions to the contrary which are noted on such an instrument shall not be binding on Det-Tronics. Det-Tronics' prices prevailing at time of each shipment shall apply. Prices are subject to correction for error.

All costs of installation shall be done by Buyer. It is contemplated that any installation or supervision labor and services agreed on the face hereof to be performed by Det-Tronics are to be performed during regular working hours on regular working days. If for any reason the Buyer requests Det-Tronics to furnish any such labor or services outside of such regular working hours, any overtime or other additional expense occasioned thereby shall be billed to and paid by the Buyer as an extra.

Det-Tronics reserves the right to place any delinquent invoices with a third party collection agency. Delinquent invoices that are sent to an agency will be assessed a collection fee.

11. TITLE AND RISK OF LOSS. Risk of Loss shall pass to the Buyer upon delivery to the carrier, Buyer or Buyer's agent, unless specified otherwise by the agreed upon incoterm. Title shall pass to the Buyer upon delivery to the carrier, Buyer or Buyer's agent unless specified otherwise in the contract. If, however, payment of the purchase price is not contemporaneous with, or does not precede delivery of the merchandise to the carrier or the Buyer, the Buyer agrees at Det-Tronics' request to execute, acknowledge and record appropriate financing statements so as to perfect a security interest in the products in favor of Det-Tronics, including, but not limited to, a UCC Form 1204 - Retail Installment Contract or the execution of a contract of conditional sale containing the provisions as Det-Tronics shall deem proper.

12. PATENTS. Buyer shall indemnify and hold Det-Tronics harmless from any claim of patent infringement if such patent infringement or claim involves machines produced by Det-Tronics at Buyer's direction or is based upon the use of the product in combination with other items where such infringement or claim thereof would not have occurred from the normal use for which the product was designed.

13. GENERAL PROVISIONS. Det-Tronics reserves the right to correct any stenographical or clerical errors in any of the writings issued by it. Except as otherwise set forth herein, the terms and conditions of sale and any description on the face of this acknowledgement constitute a complete and exclusive statement of the terms and conditions of the sale of the products by Det-Tronics to the Buyer. There are no other promises, conditions, understandings, representations or warranties. This Agreement may be modified only in a writing signed by Det-Tronics. No waiver of any right will be effective against Det-Tronics unless supported by consideration and expressly stated in the writing signed by Det-Tronics, and the failure of Det-Tronics to enforce any right will not be construed as a waiver of Det-Tronics' right to performance in the future. The Buyer may not assign any rights to, or delegate any performance owed under this Agreement without the written consent of Det-Tronics. Det-Tronics shall have the right to credit toward the payment of any monies that may become due Det-Tronics hereunder and any sums which may now or hereafter be owed to the Buyer by Det-Tronics. The validity and performance in all matters relating to the interpretation and effect of this Agreement and any amendment hereto shall be governed by and construed in accordance with the internal laws (and not the laws of conflicts) of the State of Minnesota. The Buyer shall pay Det-Tronics all fees, costs and expenses of Det-Tronics reasonably incurred in the enforcement of Det-Tronics' rights under or with respect to this Agreement, including, without limitation, reasonable attorneys' fees.

14. LICENSES AND PERMITS. Where Buyer is a U.S. company located in the United States, or has provided a duly executed power of attorney to its agent, Buyer shall be solely responsible for obtaining all export licenses or governmental permits necessary to export the products from the United States. At Buyer's request, Det-Tronics will endeavor to assist Buyer in obtaining such licenses and permits. Buyer shall be solely responsible for obtaining all import permits or other documents necessary for the importation of the products into another country or political subdivision thereof.

15. ULTIMATE DESTINATION. United States Law prohibits disposition of the equipment to certain countries, entities and end uses. It is the responsibility of Buyer to inform Det-Tronics of the parties to the transaction, ultimate destination and application or end use.

16. EXPORT. For all transactions subject to U.S. Export Control Laws, performance is contingent upon obtaining all required export authorizations.

17. NON-DISCLOSURE OF CONFIDENTIAL AND/OR PROPRIETARY TECHNICAL INFORMATION. The Buyer shall not disclose any technical/proprietary information furnished by Det-Tronics or acquired by Buyer or by virtue of or as a result of the implementation of this order to any person, firm or body or corporate authority and shall make all endeavors to ensure such technical/proprietary information is kept CONFIDENTIAL. Title to such technical/proprietary information imparted/supplied by Det-Tronics to Buyer shall at all times remain the absolute property of Det-Tronics.

REFERENCES

18. SOFTWARE LICENSE. All software programs which are embodied in a human readable media or machine readable media and which include, but are not limited to, programs having a series of instructions, statements and data, and are related materials furnished by Det-Tronics, are trade secrets and proprietary to Det-Tronics. Det-Tronics provides such programs under a non-transferable and non-exclusive license to use them on the system for which Det-Tronics provided it; the Buyer may not assign, sublicense or otherwise transfer said license and programs or materials without the prior written consent of Det-Tronics. In the event information/data is exchanged between Det-Tronics and the Buyer, both parties mutually agree not to expose said programs to any claim, lien, conversion or any other encumbrance. Det-Tronics and the Buyer further agree to exercise due care and employ reasonable efforts to prevent disclosure of said technical information/data/ program(s) unless it was or is:

- [i] Known to the receiving party without restriction when received or thereafter developed independently by the receiving party, or
- [ii] Obtained from a source other than the originating party, or
- [iii] In the public domain when received or thereafter enters the public domain through no fault of the receiving party, or
- [iv] Disclosed by the originating party to a third (3rd) party without restriction.

19. CHANGES. The Buyer may make changes, additions or deletions to specifications, drawings and other descriptions and conditions recited in the related document(s) upon written notice to Det-Tronics. If any such change(s), addition(s) or deletion(s) initiated by the Buyer affects the cost of manufacture or time of delivery, Det-Tronics shall give the Buyer written notice thereof within two (2) weeks from the date of Buyer's notice, and the Buyer shall give the instruction within a period of two (2) weeks from the date of Buyer's receipt of whether to accept Det-Tronics' proposed cost or delivery changes or to withdraw such change(s). In case of withdrawal of change(s), addition(s), deletion(s) during the above period(s), the original contract price and/or delivery shall remain unchanged.

20. EQUAL EMPLOYMENT OPPORTUNITY. Det-Tronics is committed to the maximum use of its employees' abilities and to complying with all applicable federal, state, and local laws and the principles of the Equal Employment Opportunity Act. The opportunities afforded throughout Det-Tronics are available equally to all. Applicants and employees are evaluated based on job qualifications without regard to race, color, religion, sex, sexual orientation, national origin, age, disability that does not prevent one from performing the essential functions of the job, veteran status, marital status, citizenship, or any other characteristic covered by federal, state, or local law.

Equal employment opportunity applies to all terms, conditions, and privileges of employment, including hiring, promotion, demotion, transfer, recruitment, termination, rates of pay, other forms of compensation, and selection for training. Every employee has access to Company-sponsored educational, training, and recreational activities.

21. FEDERAL ACQUISITION REGULATIONS. The components, equipment and services proposed by Seller are commercial items as defined by the Federal Acquisition Regulations ("FAR") and the prices in any resulting contract and in any change proposal are based on Seller's standard commercial accounting policies and practices which do not consider any special requirements of U.S. Government cost principles and do not meet the requirements of Part 31 of the FAR or any similar procurement regulations. Seller agrees only to perform a contract for the sale of a commercial item on a fixed-price basis. In addition, Seller will not agree to submit or certify to any cost or pricing data nor will Seller agree to any requirements to establish price reasonableness under FAR Part 15 or such similar regulations. In stating its position, Seller refers to FAR Part 12 - "Acquisition of Commercial Items." All Sales under \$3,000 are made pursuant to FAR Part 13, Simplified Acquisitions.

22. NUCLEAR LIABILITY INDEMNIFICATION. The Purchaser hereby releases and agrees to save Detector and its subcontractors and vendors harmless from claims, liability, or exposure occasioned by injury to, or death of any person, or loss of, damage to or loss of use of property caused by, or arising, in any manner, out of a "nuclear incident", as defined in the Atomic Energy Act of 1954 as amended, whether alleged to arise out of breach of contract, tort (including negligence), warranty, strict liability, or otherwise. The Purchaser shall, at its cost, secure and maintain in force insurance protection (in which Detector and its subcontractors and vendors by name or description are additional insured or beneficiaries of waivers of subrogation) against liability or loss arising out of or arising from a nuclear incident (as defined above), including the following:

- a. Nuclear property and liability insurance of the type issued by American Nuclear Insurers (ANI) or equivalent insurance, in the maximum obtainable amounts and in such form as shall meet the financial protection requirements of the Nuclear Regulatory Commission pursuant to Subsection 170(b) of the Atomic Energy Act of 1954, as amended.
- b. A government indemnity agreement with the Nuclear Regulatory Commission pursuant to Subsection 170© of the Atomic Energy Act of 1954, as amended.

The insurance and indemnities required above shall be maintained in effect as to each unit on the site from the day nuclear fuel is first shipped to the site at which such unit shall be located and shall continue in effect, to the extent the same is available, for so long as such unit is operated or there is any chance of a nuclear incident.

Test Data	\$150.00
Courier of Documents (Letter Envelope only):	
Domestic (within U.S.)	\$45.00
International	\$75.00

Note: The above prices are not discountable.

Miscellaneous Charges

	Each
Assembly of product with another product Example: Transmitter and Sensor	\$250.00 per set
Paper Tags (P/N = PAPER TAGS)	\$22.00
Stainless Steel Tags (P/N = STAINLESS TAGS)	\$30.00
Labor cost only (P/N = STAINLESS TAGS ATTACHED)	\$40.00

Example: SS Tag (\$30) + Labor (\$40) = Total (\$70)

Inspection at factory Add \$2000 to orders up to \$250,000.
Please consult the factory for Inspections of orders greater than \$250,000 (This is based on a local inspector.)

Note: The above prices are not discountable.

Engineering testing for gas curves (must pre-qualify) \$200

Det-Tronics may not accept some items for testing, such as hazardous, toxic, carcinogenic, pyrophoric, or hypergolic materials. In this case, an estimated gas curve may be provided based upon the Material Safety Data Sheet (M.S.D.S.), previous test data and engineering judgement. All requests for testing must be accompanied with an M.S.D.S for that material before any shipment of the material is made. Recent Minnesota State law also may preclude Det-Tronics from accepting or handling certain hazardous materials. Following is the recommended procedure for requests gas curve testing:

1. The request for gas curve testing, complete with appropriate M.S.D.S., should be issued to Det-Tronics Customer Service Dept. A purchase order issued to Det-Tronics for testing services will be required upon request approval.
2. A one ounce sample of liquids or 7.5 liters of gaseous materials shall be packaged and shipped in the appropriate container to the attention of: Gas Sensor gas curve Test Lab.
3. A Material Safety Data Sheet must accompany each sample to be tested.
4. Technical information typically required for each compound includes: specific gravity, molecular weight, vapor density, flashpoint, and lower and upper flammability limit.
5. All sample materials will be returned to the customer after test completion for proper disposal.

Repairs and Rentals

REPAIR CENTER

Available only for active models listed in this price schedule. Before returning equipment for repair, contact Detector Electronics Customer Service Department to obtain a Return Material Identification (RMI) number that will be reserved for your specific return order, and referenced in all documentation. Pack the return shipment carefully to avoid damage in transit. Place the RMI number, with your name and address as sender, plainly on the outside of the package.

RENTAL EQUIPMENT PRICING

Class 1

\$350 per day, including day of shipment

- 009360-001 W867 EX Lamp Kit

NOTE: The rental charges listed include overnight shipping. They begin on the day the product ships from the factory, apply to both weekdays and weekends, and end the day before the product is received back at the factory. When returning the product, reference the RMI number (found on the rental product packing list) on the outside of the package and on any paperwork returned with the product. Ship the rental product prepaid via overnight delivery.

FACTORY REPAIR PRICING POLICY

In order to provide faster turnaround time on product repairs at our factory in Minneapolis, Detector Electronics has initiated standard or fixed pricing. The standard pricing will apply to groupings of similar products. In order for the program to be successful in providing the shortest repair time, we will be requesting that an authorized purchase order for the amount of the standard pricing be issued prior to our issuing a return authorization number. Please note that no guarantees for repair lead time can be given for product returned without return authorization and an authorized purchase order.

The standard pricing does not apply when a unit is returned for repair and is tested with no defect or problem discovered. A standard test fee will apply for out of warranty units that are tested only. Also, units requiring major component assembly replacement such as circuit boards, sensor modules and faceplates etc., will be invoiced at actual time and material costs. Det-Tronics will contact the customer for approval before proceeding if the repair falls out of our standard guidelines. Test fees will be waived if the returned unit is repaired or a replacement purchased in the same transaction.

Typical repair lead times are one to two weeks after receipt.

Standard Pricing: (Freight costs and applicable taxes will be added to invoices at actual costs.)

Any product that does not fall into one of the above classes will be charged at 40 percent of the current list price.

REPORTS**Service Report: No fee or extra charge for this.**

This is a report that is generated by the Repair Technician that has been assigned to repair a product that has been sent back to the factory. The report is based on the state of the defective product compared to Product Specifications of a new product. This report will consist of the following:

- The Part Number and Model Number of the product returned.
- The Serial Number (if applicable), Date Code and Warranty status.
- Description of problem the customer is experiencing, if provided.
- What the initial diagnosis was when the product was received compared to the New Product Specifications.
- Parts used to correct or repair the product.
- Product ECO's (Engineering Change Orders) that were done to the product to get the product up to the latest rev.

Failure Analysis: Fee for this = \$1500 per device (also applicable for in-warranty products).

This is a report that is generated by a Quality Engineer that has been assigned to analyze a product that has been sent back to the factory to determine the root cause(s) of failure. At a minimum this report will consist of the following:

- The Part Number and Model Number of the product returned.
- The Serial Number (if applicable), Date Code and Warranty status.
- Customer name, address and contact name.
- Description of problem the customer is experiencing (background discussion).
- Performance analysis.
- Graphic data (where appropriate).
- Root failure cause(s) - Determination of initial event(s) leading to the direct cause of the failure.
- Recommend corrective action
- Verification of corrective action.
- Final or interim report.

What is required:

1. Purchase Order Number to cover \$1500 per product.
2. Detailed problem of what the product is doing or not doing.
3. Application - Where and what type of facility the product is being used in.
4. End user Contact and Telephone information.

Repair Center Warranty Policy

Repair Center services performed (excluding all gas sensor inspections and software-related repairs) are warranted against defects in material and workmanship for a period of two (2) months from date of shipment from Detector Electronics Corporation (Det-Tronics). This warranty applies only to the material and workmanship directly related to the specific repair services performed, and does not apply to unrelated device or component failures. This warranty does not cover device failures due to exposure to corrosive environments, unauthorized field repairs or alterations, damage caused by accident, abuse, negligence, abnormal use or acts of Nature. Fuses will be considered to have failed due to external causes and therefore are not covered under this warranty.

Det-Tronics' liability and Buyer's exclusive remedy against Det-Tronics is expressly limited, at Det-Tronics' option, to the repair or replacement of the defective good(s), with Det-Tronics returning the repaired or replaced good(s) to the Buyer F.O.B. destination at the lowest cost. Any part, item or equipment repaired or replaced and returned to Buyer shall be warranted by Det-Tronics for the remainder of the original warranty period.

This warranty applies only to the equipment delivered which after shipment from Det-Tronics' factory have not been altered, changed or repaired by others. The products of other manufacturers are covered only by such warranties as made by these original manufacturers even though such items may have been included as components.

IN NO EVENT SHALL DET-TRONICS OR ITS SUBCONTRACTORS OR VENDORS BE LIABLE IN CONTRACT, TORT, STRICT LIABILITY, WARRANTY, OR OTHERWISE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL LOSS OR DAMAGES WHATSOEVER, INCLUDING BUT NOT LIMITED TO DAMAGE TO OR LOSS OF PROPERTY OR EQUIPMENT, LOSS OF ANTICIPATED PROFITS OR REVENUE, CLAIMS OF CUSTOMERS, OR HARM TO GOODWILL OR BUSINESS REPUTATION, LOSS OF USE OF SYSTEM, NON-OPERATION OR INCREASED EXPENSE OF OPERATION OF OTHER EQUIPMENT DIRECTLY OR INDIRECTLY ARISING FROM THE SALE, HANDLING OR USE OF THE EQUIPMENT, OR FROM ANY OTHER CAUSE RELATING THERETO AND DET-TRONICS' LIABILITY HEREUNDER. The remedies set forth above and the obligations and liabilities thereunder are exclusive and in lieu of all other remedies, warranties, guarantees or liabilities expressed or implied, arising by law or otherwise including without limitation, any obligations of Det-Tronics with respect to merchantability and fitness for a particular purpose/use or whether or not occasioned by Det-Tronics' negligence. Det-Tronics shall not be liable to the Buyer for any claims, demands, injuries, damages, actions or causes of action whatsoever based on negligence or strict liability.

If, after inspection of the returned equipment, Det-Tronics determines that the defect is a result of damage, misuse, mishandling, installation, abnormal conditions of storage or operation, unauthorized repair or modification, or due to the Buyer's failure to install, maintain or operate the equipment in compliance with the written instructions, all expenses incurred by Det-Tronics in connection with the replacement or repair of the equipment shall be for the account of the Buyer. Any equipment returned to Det-Tronics for replacement shall become the property of Det-Tronics.

The liability of Det-Tronics, its subcontractors or vendors with respect to any contract, or anything done in connection therewith or from the Field Service; Technical Assistance, manufacture, sale delivery, resale, installation, repair, replacement or use of any service or equipment covered by or furnished under this Contract, whether in contract, in tort, in warranty, in strict liability, or otherwise, shall not exceed the original purchase price paid on the contract. If the Contract provides for the furnishing of more than one unit of equipment or materials, the limitation prescribed hereinabove shall be applied to each individual unit with respect to which such breach has occurred and "contract price" shall be deemed to mean the unit price specified in the Contract, or if none is specified, a proportionate part of the total price stipulated for all such units.

The validity, performance and interpretation of the limited warranty shall be governed by the internal laws (and not the laws of conflicts) of the State of Minnesota. All disputes arising in connection with the limited warranty shall be resolved, if not sooner settled, by a court of competent jurisdiction located in Hennepin County, Minnesota, USA.

2011 DET-University Field Training Rate Schedule

Training Deliverables

All courses provide verbal presentation, practical hands-on with applicable equipment or software, course material handouts, and respective product documentation for each participant. Certificates of Completion are issued on request.

Factory-Certified Technical Trainer Rates

On-Site Per Day Rate (not to exceed 4 persons or 8 hours).....	\$1,700.00
Day Rate for Each Additional Person (not to exceed 10 total persons)	\$425.00
Webinar/Phone Training Hourly Rate.....	\$200.00
Custom Course Development Hourly Rate	\$250.00
Custom Demonstration Setup (Requiring Project Engineering) Day Rate	\$1,700.00
On-Site Hourly Rate	\$212.50
Time and One-Half	\$318.17
Double Time	\$425.00
Travel Per Hour Rate.....	\$150.00

NOTES: Prices are effective September 1, 2010 and subject to change without notice.
Customer cancellations received less than 14 days from the scheduled delivery date may be subject to a charge of up to 30% of the purchase order price.

Travel, Shipping, and Living Expenses

Airfare, Auto Rental, Parking, Tolls, Hotel, Meals, etc.	Cost +10%
Mileage	\$0.50 / mile
Shipping (each 2-person training demo kit weight can reach 100 lb)	Cost +10%

Workday Defined

The above charges are for a normal eight-hour working day with time and one-half charged for Saturdays, and time over eight (8) hours for a weekday; Sundays and holidays and work after twelve (12) continuous hours will be charged at double time. Det-Tronics will supply receipts and documentation for the substantiation of reasonable travel and living expenses. These shall include (1) air travel receipt if used, (2) hotel receipt if used, and (3) car rental receipt if used. No other receipts for living expenses will be furnished unless specifically requested by the purchaser in writing prior to the start of the assignment.

NOTES

1. Det-Tronics personnel are not required to work more than 12 hours in any 24-hour period.
2. All weekday or weekend travel time will be charged accordingly.
3. Eight-hour minimum charge for all one-day sessions with four-hour minimum per day thereafter.
4. Hazardous Duties, Offshore or other duties defined as hazardous (offshore platforms, chemical exposure, etc.) are subject to an additional charge of \$200 per day above the standard daily rate.
5. All rates are in U.S. dollars. Work performed in areas with a current U.S. State Department of Transportation Warning of "Not Recommended for Travel for US Citizens" will be invoiced at a "Hazardous Duties" rate.
6. Trainer time, if put on "hold" at job-site or hotel, will be charged at the regular daily rate.

*Holidays**

New Year January 1 st	Independence Day July 4 th	Christmas December 26 th – 30 th
Good Friday April 22 nd	Labor Day September 5 th	New Year's Eve December 31 st
Memorial Day May 30 th	Thanksgiving November 24 th – 25 th	

*Dates are subject to change

Training Event Scheduling

Typically scheduled within 8-12 weeks of receiving purchase order; dependent on trainer and equipment availability.

Terms of Payment

Purchase Orders must be received prior to shipping equipment and conducting training sessions. Fax to 952-829-8750. Training Invoices are due and payable upon receipt. International Training Support is by Letter of Credit or Prepaid (estimated amount).
