

LOGICally simPLified

High Performance process control with logic

Flexible modular control

- ▶ PID control with temperature or process inputs.
- ▶ I/O modules to integrate PID with logic.
- ▶ Boolean, timer, counter & comparator logic functions.
- ▶ Logic can change set-points, switch outputs, run profiles & more.
- ▶ DIN-rail mount base-unit with integral comms.

system integration

logiCALly CALogix

The logical approach...CALogix

Flexible control options

- ▶ Integrate temperature/process loops and programmable logic.
- ▶ Modbus RTU comms for connection to PLCs, PCs and HMIs.
- ▶ Up to 124 loops on one RS485 network.

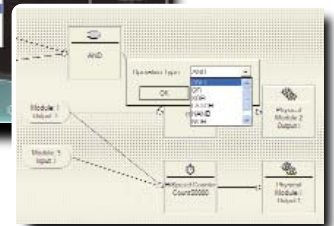

System customization

- ▶ CALopix range of operator panels can be configured to meet the application requirements.
- ▶ PC software for configuration, charting, logging, alarms & monitoring.
- ▶ CAL OPC server simplifies integrating CALogix with SCADA.

Simple to program

- ▶ Drop-down menus for easy parameter set-up.
- ▶ Simple to use function block logic programming.
- ▶ Click'n'drag profile creation.
- ▶ Application files can be saved for system reconfiguration.

Easy to install

- ▶ DIN-rail mount base unit.
- ▶ Plug-in terminals and modules.
- ▶ Wiring minimised by using integral timers, counters and relays.
